Daniel Robert

Morning Review (α & β Strategy)

Good morning, community members!

I'm Daniel Robert, and today, let's seriously think about a critical question: What is the right choice in the current investment market? I believe that joining the AlphaStream 5.0 "Millionaire Club" is the most correct choice you can make!

Over the past two days, we've captured four trading signals with excellent returns. This has further convinced me that AlphaStream 5.0 is the perfect tool for the cryptocurrency market. While this may sound straightforward, it's undeniable that its performance in the crypto market is significantly better than in the stock market. Why? Because stock markets operate on auction mechanisms, and price movements rely heavily on fundamental drivers. In contrast, the cryptocurrency market operates 24/7, allowing AlphaStream 5.0 to fully unleash its powerful potential.

NAS COMMUNITY

If possible, I would want the institutional version of AlphaStream 5.0 right now! Do you know why? The high liquidity and continuous trading nature of the crypto market allow it to seize every opportunity in market fluctuations. It's like having a financial advisor working around the clock to find the best trading opportunities for you.

The past four signals have not only brought me significant profits but also reinforced a belief: Making the right choice is the beginning of success. Imagine, friends, we're now standing on a mountain of gold, and AlphaStream 5.0 is the precise and efficient tool that continuously mines wealth for us.

To those still hesitating, I want to say: Don't waste time! Opportunities never wait, especially in a market full of opportunities like crypto. Join us, use the powerful capabilities of AlphaStream 5.0, and make your investment portfolio shine to achieve the goals you've always dreamed of. Seize this opportunity now, the future belongs to those who act decisively!

NAS COMMUNITY

Folks, let's be honest, in today's stock market, can you find a stock capable of delivering an 80% total fund return in seven days? The answer is quite clear: almost impossible.

NAS COMMUNITY

Remember when we used the $\alpha\&\beta$ strategy to buy AFRM and WIX earlier? We locked in about 15% profit within two weeks. But compared to KEYS and VIST, which we followed and bought last week using the $\alpha\&\beta$ strategy, as of today, they're only showing small gains. This realization made me understand one thing: Even though the $\alpha\&\beta$ strategy has a high success rate, achieving significant profits under the current stock market conditions is still challenging. Even with strong short-term trading techniques, if the direction is wrong, it's a selection error. Adjusting direction in time is the wise choice.

Speaking of future, I have the same thoughts with Helmsman, I have full confidence in Bitcoin's trajectory and remain bullish that it will exceed \$100,000. However, is now the time to decisively go long? The answer is obviously not yet. Instead, the fluctuations around \$100,000 provide the most profitable opportunities at this time. This volatility is exactly where AlphaStream 5.0's quantitative trading excels.

Why has short-term profitability in the stock market become so challenging? The answer lies in the stock market's strict dependence on time cycles. Stock price increases rely not only on technical patterns but also on support from fundamental performance. This stands in stark contrast to the crypto market's

NAS COMMUNITY

24/7 continuous trading model. The high liquidity and rapid responses of the crypto market provide more short-term profit opportunities, and in this domain, AlphaStream 5.0 is truly unparalleled.

Folks, for me, the most important principle now is the rule of focus. If the current stock market doesn't give me the confidence to operate with full positions or leverage, I'll decisively choose to take a temporary break and shift most of my energy toward the crypto market's profitability challenge plan. Why? The answer is simple, because there are opportunities with certainty here!

What constitutes an opportunity with certainty? Just look at the performance of AlphaStream 5.0: four precise signals, each flawlessly achieving its target. This is not just the result of technology and intelligence but also the product of our joint efforts and validation. Most importantly, these results strongly confirm the correctness of our beliefs and direction.

At this critical moment, I want to emphasize the immense importance of the power of belief. Belief is an invisible yet powerful driving force, it keeps us calm amid market turbulence and enables us to act decisively in the face of fluctuations. The power of faith is limitless. As long as we remain steadfast in

NAS COMMUNITY

our beliefs and seize the opportunities before us, nothing can stop us from moving forward.

Now, take action! Focus your attention on the most valuable areas and leverage the powerful capabilities of AlphaStream 5.0 to accurately seize opportunities in the crypto market's volatility. This is the right path to higher profits! Don't let market fluctuations hinder you. Instead, make them your wealth accelerators!

Folks, I've always considered Helmsman to be a great visionary. His foresight and decision-making abilities are truly admirable! After reviewing numerous survey responses, he launched the AlphaStream 5.0 Millionaire's Club and decisively chose the crypto market as the main battleground for the million-dollar profit journey. The outcome was destined, this is a venture bound for success.

The Passion December 7-Day Challenge with an 80% Profit Plan has already seen some participants achieve their goals ahead of schedule. This not only proves the precision of Helmsman's strategy but also demonstrates his impeccable timing and exceptional insight. Friends, let's give the Helmsman our

NAS COMMUNITY

warmest applause and express our heartfelt gratitude for his tremendous contributions to NAS community and charitable endeavors.

Reflecting on the detours I've taken in the past is truly heart-wrenching. While I achieved some success through entrepreneurship, I found it challenging to make breakthroughs in investments. It wasn't until I met the Helmsman that he became my mentor in the world of investing, always guiding us in the right direction when it came to critical decisions.

Do you still remember the last "Practical Trading Boot Camp"? Helmsman introduced his self-created Breakthrough Box Buying Strategy, leading us to invest in premium stocks like SMCI, NVDA, and MSTR. While these stocks saw decent gains, regular buying always had its limits. Helmsman did encouraged us to boldly use leveraged funds, and as a result, everyone reaped significant rewards.

Although that bootcamp didn't have a powerful tool like AlphaStream 5.0, but Helmsman's guidance helped many of us achieve our dreams. This success stemmed not just from strategy but also from belief and action.

NAS COMMUNITY

Now, we're starting from an even higher point, equipped with an investment weapon like AlphaStream 5.0. Is there any reason not to chase even greater glory? Thank you to Helmsman, and thank you to ourselves, for daring to believe and seizing the opportunity.

Folks, I understand that for some of you, the crypto market may still feel unfamiliar. Transitioning from traditional stock market thinking to crypto thinking may naturally bring resistance. But let me tell you this: the era of change has arrived, and we have no reason not to embrace it.

Investment relies on time cycles, and the current cycle is tilting toward the crypto market. If you choose to stand still, you risk being left behind in this rapidly evolving era. Consider Warren Buffett's returns in recent years, they've been surpassed by many hedge funds. This isn't because Buffett has worsened but because the times have changed.

As retail investors with smaller capital, we need to respond more flexibly. The Gecko Trading Rule, move to where the opportunities are, is one of the strategies to quickly grow your funds. Learn to focus, and don't let overly diversified investments weigh down your profitability. That's how I've made my

NAS COMMUNITY

journey, and I deeply understand the pain of feeling powerless to change. But the good news is, the opportunity is here now!

AlphaStream 5.0 is the brightest beacon before us, guiding us on the path to success. This is not just the power of technology, it's divine guidance. Our responsibility is to believe in and seize such opportunities. If you're still holding onto loss-making stocks or underperforming individual picks and need the most timely trading advice, reach out to me, Helmsman, or an assistant. We'll provide you with sound strategies.

For fundamentally strong stocks, as long as the rationale for buying them hasn't changed, there's no need to worry excessively. However, the current stock market remains in a state of fluctuation. The slow upward trend amidst volatility has significantly increased the difficulty of trading. If you haven't joined the 'Millionaire's Club', I respect your choice, maybe it's because you no longer aspire to higher dreams for the future. There's no right or wrong here.

That said, if you've already joined the 'Millionaire's Club' but missed the Passion December 80% Profit Challenge Plan, the issue lies in your lack of action. If

NAS COMMUNITY

you're feeling regret right now, don't worry, just adjust your direction promptly. The opportunity is still here.

Today, AlphaStream 5.0 will present us with new strategies and signals. For those who have restructured their portfolios, cleared out losing stocks, and set aside some capital, the key question now is: should you continue buying new stocks or shift to the crypto market?

If you're still pondering this, it may indicate that you haven't fully grasped the current market conditions. The stock market operates on specific cycles, and the current cycle is no longer conducive to heavy positions. The main upward wave of the first half of the year has long ended, and the slow upward rotations of the second half are nearing their conclusion. December serves as a transitional period. To see a new wave of opportunities under current market conditions, two key factors must align: the indices filling the lower gaps and Trump's official return with new favorable policies. If these conditions aren't met, the weak rotational pattern of the market may persist for some time.

NAS COMMUNITY

Thus, I strongly urge you: seize the new profit points and immediately participate in the Passion December 80% Profit Challenge Plan. Right now, the crypto market is the best battleground, and AlphaStream 5.0 will provide you with definitive trading opportunities. Take action, don't hesitate, and let's together grasp the pulse of the times and embrace even greater glory!

Folks, please note that the fifth trading signal has been publicly shared in the Telegram trading signal sharing group just now.

For those who have already benefited from our profit plan, I want to say: treat this as the beginning of your next big move!

Doubling down not only reflects your commitment to your financial future but also opens doors to more trading signals and higher profits. This is an opportunity for deeper growth, learn more and earn more!

Whether you've joined the plan or are still on the fence, now is the time to enhance your strategies and elevate your gameplay. Join a personalized plan, focusing on yourself, your growth, and your profits.

NAS COMMUNITY

Our goal isn't just participation, it's domination! Are you ready? You're investing not just money but your trust in a system designed to amplify success. Trust the learning process, trust the customized strategies, and watch more opportunities unfold before you.

This isn't just a trading plan; it's your wealth accelerator. Take action, be confident, and give it your all. Together, we'll conquer this market!

The latest round of trading has me exhilarated! The trading signals we captured were not just precise, they were pure gold. Let's talk about the numbers and efficiency.

Folks, the cumulative profit rate has surged to an astonishing 309%! The total asset return rate has also exceeded 66%! We are getting closer to the profit plan's target and are already on track to exceed expectations!

Isn't that level of efficiency impressive? Take a look at your wallet, isn't it starting to feel heavier? This is the perfect result of our hard work and strategy, and it signals even greater success on the horizon!

NAS COMMUNITY

Next, we must focus on this Friday's release of the non-farm payroll data. As one of the most critical economic indicators, it will significantly impact the stock market while also increasing volatility in the crypto market. This volatility is a golden opportunity to accelerate profits. If your funds aren't ready yet, I recommend enhancing execution and increasing capital before Friday to prepare for this event. Remember, every major data-driven market movement is a chance for profit.

Yesterday, someone asked me how difficult it is to turn \$5,000 into \$1,000,000. I won't lie, it's a challenge. However, achieving returns of 100%-800% is entirely feasible. Simply put, turning \$100,000 into \$800,000 is a very realistic goal! Becoming a millionaire is just the first step. With so many millionaires in America, why can't you be one of them? As Helmsman says, if you're already a multimillionaire, your next target should be to become a billionaire.

Now that we are reaping these victories, how do we ensure our profits continue to work for us? My suggestion: after completing a profitable contract trade, invest 50% of the earnings into 30-day fixed-income financial products. Why? Think of it as adding a top-tier shock absorber to your investment portfolio.

NAS COMMUNITY

Regardless of market fluctuations, your hard-earned money stays secure while continuing to generate steady returns.

Folks, this is not just a strategy, it's our safety net, ensuring we balance market agility with risk management. The key? Pay close attention to the Helmsman's daily summaries. These aren't just sharing, they're the secrets to our continued success, a perfect blend of technique and insight.

As we prepare for the next wave of trades, make sure to diligently learn these skills. They are the key to maintaining our edge and ensuring profits continue to flow.

AI 5.0

To summarize:

- 1. After earning profits, wisely invest half to balance risk.**
- 2. Continuously learn from Helmsman's insights.**
- 3. Maintain winning momentum and seize every opportunity!**

NAS COMMUNITY

Now, imagine a market full of opportunities right before you, waiting for someone with boldness and vision to seize them. That person is you. Don't let fear hold you back. Embrace the challenge and take that critical step forward. Every great achievement begins with a small step. Act now and let the world see your strength!

This is your moment, don't wait, don't hesitate. Charge ahead and let success cheer for you!

Professor Montgomery Keane (Helmsman)

Sharing Topics:

- 1. Tensions between South Korea and France, can the December 2024 Non-Farm Payrolls turn the tide?**
- 2. The Passion December 80% Profit Challenge, the 6th trading signal is coming soon!**

Good afternoon, my friends!

I am Montgomery Keane, your old friend. Thanks to Daniel Robert for the wonderful insights shared this morning, his success is a model for each of us to learn from. Daniel Robert's success not only comes from his wisdom and strategy, but also from his firm belief and strong execution. He never hesitates and always seizes every opportunity, executing each strategy with determination. By learning from his experiences and methods, we can not only gain knowledge, but also significantly improve our ability to take action.

NAS COMMUNITY

Friends, please believe in yourselves. Believe that through learning and persistent effort, we too can achieve our own glorious moments, just like Daniel Robert. In the AlphaStream 5.0 "Millionaire Club" practical profit plan, we have used the AlphaStream 5.0 quantitative trading system, valued at over one hundred million dollars, for the first time. This system achieved a 100% success rate in two tests, and it has maintained a flawless record in this week's Passion December 80% Profit Challenge. However, despite this, some friends have not met their expected profit targets and have even experienced losses.

Where is the root of the problem? The answer is simple: execution and attitude.

We hold in our hands the most advanced trading system in the world, but without firm execution and a rigorous attitude, even the most powerful tools cannot perform as they should. Friends, attitude determines everything. Success not only depends on external conditions, but also on our own efforts and perseverance.

Every trading signal is a key to our success, and every strategy is a guide to our wealth. Only by taking every detail seriously and executing every action rigorously can we truly achieve our goals.

NAS COMMUNITY

I call on everyone to face each upcoming trading opportunity with the most serious attitude and the most determined execution. Actively participate in our plan, believe in the power of faith, and believe in your own abilities. By continuously improving our execution and focus, we will surely achieve even greater success in future trades. Let us work together to reach the profit goal of the "Millionaire Club" challenge and welcome our glorious moment!

Today, global stock markets showed mixed results as the market digests the impact of multiple events, ranging from South Korea's earlier announcement and lifting of martial law to the upcoming no-confidence vote in the French parliament. These political upheavals have drawn investors' attention to the performance of the euro. Meanwhile, retail and tech stocks helped drive the STOXX 600 index up by 0.2%. French Prime Minister Michel Barnier's government is facing a crucial no-confidence vote, and if passed, it could impact the stability of the French government and market confidence.

The latest ADP employment data released this morning came in slightly below expectations, with an increase of only 146,000 jobs. Despite signs of a slowdown in the labor market, job openings for October saw a significant rise, and layoffs dropped to their lowest level in a year and a half, leading investors

NAS COMMUNITY

to have greater expectations for the future direction of the job market. The market's focus is now on Friday's November non-farm payroll report, which is not only a key data point for assessing the U.S. economy but also an important reference for determining the Federal Reserve's policy direction. Currently, the market expects a 72% probability of the Fed lowering interest rates by 25 basis points this month, and the total rate cut by the end of 2024 could reach 80 basis points. If the non-farm data exceeds expectations, U.S. stocks may see a rebound in the final stage of the year, helping to kick off 2024 with strong momentum.

In addition to traditional markets, the crypto market may also be significantly impacted by the non-farm payroll data. Changes in the economic environment typically influence investors' risk appetite in highly volatile markets, and the performance of Bitcoin and other crypto assets may experience a new round of volatility. Adjustments in global economic policies, particularly the growing expectations of monetary easing, could further increase the appeal of crypto assets.

Friends, now is the best time to take action. The non-farm payroll data will not only inject vitality into the U.S. stock market but may also trigger significant

NAS COMMUNITY

volatility in the crypto market. For those who have already joined the "AlphaStream 5.0 Millionaire Club," you are in the golden opportunity for wealth growth. For those who are still on the sidelines, I sincerely invite you to join us and seize this rare historic opportunity.

Let us, under the guidance of the AlphaStream 5.0 system, embrace the market fluctuations with precise data analysis and unparalleled strategic planning, together welcoming the lucrative returns. The outcome of non-farm week is determined at this moment, so let us take action and seize this pivotal point that can change our destiny!

NAS COMMUNITY

As shown in the chart, taking the Dow Jones index as an example, from the daily candlestick chart, we can see that the upper Bollinger Band has not opened an upward channel but instead is sloping downwards, forming resistance, indicating that the current market is in a typical consolidation pattern. Meanwhile, sector rotation continues, making short-term trading more difficult, and the target profit space is constantly shrinking.

The choice investors make at this time will directly determine future returns. If you lean towards short-term trading, the crypto market may be a better option. In the current high volatility environment, short-term trading opportunities in crypto assets are more abundant, and the potential for returns is more attractive. For investors who prefer long-term positioning, holding quality stocks requires patience and time to wait for the return of the market cycle.

In the current market environment, diversified trading is undoubtedly one of the best ways to navigate challenges. Especially when the three major indices of the traditional stock market are in high-level consolidation, diversifying investments into the crypto market can effectively increase the likelihood of returns. It is particularly important to note that for investors with relatively smaller capital, relying solely on medium- to long-term trading may be difficult

NAS COMMUNITY

to achieve ideal returns. Instead, it is better to seize the golden opportunity in the crypto market right now and profit from the high volatility.

Currently, the stock market is in a high-level consolidation phase, and the gaps below could potentially be filled at any time. This is an inevitable part of market dynamics. However, this adjustment is not an obstacle, rather, it paves the way for future opportunities. If you are able to seize the current opportunities in the crypto market and quickly expand your capital in this volatile and promising field, you will have a stronger operational space when the stock market eventually pulls back to an ideal entry point. This will not only allow you to leverage greater capital for higher returns but also establish a more solid investment foundation.

The core of investing lies in timing and going with the market trend. During a stock market correction cycle, shifting to the crypto market to capitalize on volatility for short-term profits is a wise and efficient strategy. Through this flexible asset allocation, you can not only generate returns in the current market environment but also be well-prepared for the next stage of stock market positioning.

NAS COMMUNITY

Currently, the crypto market is also in a consolidation phase, as Daniel Robert shared this morning. Fluctuating around \$98,000 presents an excellent opportunity for swing profits. This consolidation pattern will intensify when important data is released, and the non-farm payroll data coming this Friday will present a fantastic profit opportunity. If you've already joined the "Millionaire Club," I strongly recommend you seize this opportunity. If your funds aren't yet in place, be sure to finalize your deployment before Friday to fully prepare for the significant market fluctuations triggered by the non-farm data. The profit potential from such large movements is definitely worth anticipating.

In the world of investing, success is not a matter of chance, but the perfect combination of market, timing, strategy, and tools. Only when these elements

NAS COMMUNITY

work together closely can an investment legend truly be forged. And each one of you has the chance to become the next Daniel Robert. Why can't the next person to create a legendary success be you? Now, this opportunity is right in front of you. Passion December 80% Profit Plan has been fully launched, and this is the perfect moment for you to reach the peak of your life.

Important reminder:

Friends, please note that I have just shared the sixth trading signal of this profit plan in the Telegram trading signal sharing group. Please check and follow the instructions carefully.

Friends, this moment calls for your decisiveness and action. If you have already made up your mind not to miss this opportunity, stay tuned for my next share: the supplementary plan for the "Passion December 80% Profit Challenge", a personalized plan. The future is yours to define, and success is yours to create. Take action now, and let this challenge be the starting point of your journey to greatness!

NAS COMMUNITY

For those with foresight, eager to turn dreams into reality and firmly support charitable causes, personalized customization is not just an option, but a higher pursuit of investment strategy. It represents the creation of a tailored investment plan for each investor, providing the best investment portfolio and strategies based on individual risk tolerance, investment goals, and market dynamics. This not only enhances the security and returns of investments but also fully demonstrates our respect and commitment to each investor.

As it is said in the Bible: "For the Lord is the source of wisdom, and his wisdom is vast and boundless." We continue to uphold this wisdom and faith, constantly exploring and innovating, striving to provide the best investment experience and substantial returns for every participant. In the upcoming "Passion December 80% Profit Challenge," the AlphaStream 5.0 system will continue to demonstrate its powerful data analysis and forecasting capabilities, providing strong technical support for our investments.

For those who are willing to stay at the forefront of the market and seize every opportunity, now is the best time to take action. Success always belongs to those with vision and the courage to pursue their dreams. Let us start this

NAS COMMUNITY

extraordinary investment journey with wisdom and faith, and together create a brilliant future that belongs to us.

In the journey of investing, we understand that every investor's background, schedule, and goals are unique. Based on this understanding, we customize the most suitable investment strategies for each investor. For those with tight schedules, we have designed a strategy focused on medium-term trades, with short-term opportunities as a supplement, aiming to bring you returns beyond expectations. Currently, CBF/USDT shows greater volatility and growth potential compared to BTC/USDT. Through carefully designed personalized strategies, many friends have already achieved an impressive total asset return of over 60% with just 1-2 trades, and the feedback has been overwhelmingly positive.

For investors with larger amounts of capital, trading using longer time-frame charts is undoubtedly a wiser choice. This method not only carries lower risk but also offers greater potential returns. This is beyond question. Our strategies are not only highly effective in the short term but also excel in the medium and long term, providing investors with stable and substantial returns.

NAS COMMUNITY

The market is ever-changing, and only through precise strategies and strong execution can one remain invincible in investments. As Proverbs says, "Keep your heart with all diligence, for out of it spring the issues of life." On the path of investing, maintaining a calm mindset, firm belief, and continuous learning and progress are the keys to our success.

Share your investment dreams with us! Let us tailor a personalized journey just for you. Based on your financial situation, interests, risk preferences, investment timeline, and return goals, we will design an efficient and straightforward investment plan. Our goal is to ensure that your investment journey is not only profitable but also safe and worry-free through customized strategies and careful guidance.

Whether you're seeking short-term gains or aiming for long-term stable growth, we will tailor the optimal investment plan for you. Let's seize every opportunity together and step toward a successful future.

Let's demonstrate the powerful impact of a personalized investment plan with a simple yet profound example: imagine if your funds doubled, not only bringing higher investment efficiency but potentially multiplying your returns, this is the

NAS COMMUNITY

extraordinary value that a personalized investment plan can create for you. Starting now, please take your investments seriously, this million-dollar profit journey is destined to be spectacular.

So, what does it truly mean to "take your investments seriously"? With the certainty of opportunities provided by AlphaStream 5.0, some people see significant returns, while others see modest ones. The answer is simple: the amount you invest determines the scale of your returns, while execution determines your return rate.

Take a look at Daniel Robert's success story. He has achieved remarkable results in the investment market. His secret to success is his exceptional learning ability and strong execution. He never wastes any learning opportunity and always follows every trading strategy with full dedication. As a result, he seized every profitable opportunity and achieved enviable returns.

Now, ask yourself sincerely: Do you also possess this ability to learn and execute? Have you truly studied and understood every investment strategy? Have you strictly followed every trading signal? Investing is not just about putting in money, it's a full commitment of time, energy, and wisdom. Only by

NAS COMMUNITY

truly dedicating yourself can you secure your place in this market and truly achieve your goals.

Friends, now is the time to take your investments seriously. With your ability to learn and execute as your foundation, create the brilliant future that belongs to you. Let's take action, seize every opportunity, and together achieve our investment dreams, writing your own legend!

Today's learning achievement reward:

- 1. In the face of a completely new investment landscape, what is your strategy? Let's make an assumption together: by investing through contract trading, after 50 trades, what would be the difference in profit between an initial capital of \$10,000 and \$150,000, assuming an average return of 50% per trade? Does this make you truly understand the importance of investment capital in determining the scale of profits? This is a question worth deep thought! (20 points)**
- 2. Are you ready for the supplementary plan of the 'Passion December 80% Profit Challenge'? What is your action plan? This plan is not only a key part of our current investment journey, but also a great opportunity for you to enhance your profits and optimize your strategy! (20 points)**

NAS COMMUNITY

It is also a great opportunity to help you think deeply and plan your next steps. Use your wisdom and belief to actively participate in the discussion and preparation. Looking forward to your wonderful sharing!

Here, I would like to extend my heartfelt congratulations to everyone participating in this profit plan. With the success of the sixth trading signal, we have collectively achieved nearly an 80% return on total assets! Your effort and execution are truly commendable. To establish a secure investment barrier, fixed income financial products are a key part of our strategy. I strongly recommend that each member, after making profits from contract trading, voluntarily transfer 50% of the profits into the 'Fixed' fixed-income financial products, prioritizing a 30-day investment term.

This approach not only ensures the safety of our funds but also guarantees their continuous growth, representing an important step in our wise investment strategy. Please remember and implement this strategy diligently, as we aim to build an invincible investment defense together. Let us continue to achieve our investment goals with stable strategies and firm execution, creating an even more brilliant future!

NAS COMMUNITY

Wishing you all a pleasant day!
