Daniel Robert

Morning Review (α & β Strategy)

Good morning, community members!

I'm Daniel Robert, and yesterday marked our sixth consecutive win in the Passion December 80% Profit Challenge! Many participants have already neared the 80% profit goal. Congratulations to those who saw the opportunity, chose to believe, and took decisive action!

Now, let's talk about the power of seeing opportunities and seizing them. Every day, opportunities knock quietly at our door. Some people can recognize them and take that bold first step, while others hesitate, doubting their potential, only to watch those opportunities slip away.

Imagine standing at a crossroads: one path leads to significant profits, life-changing experiences, and a chance to achieve your dreams; the other leads to

NAS COMMUNITY

regret and missed chances. To those who have already joined us, you've made the right choice! Your success is a testament to your courage and vision.

However, for those still hesitating, I must tell you this: opportunities won't wait. The market is dynamic and ever-changing, hesitation will only leave you far behind.

Look at our recent track record, it's not just a collection of cold numbers. It's the result of trusting the process, believing in the system, and taking decisive action. Imagine, while others are still doubting and watching, you've already taken your first step toward financial freedom and joined a community that not only dreams big but also turns those dreams into reality.

Friends, the world doesn't reward hesitation, it rewards those who dare to act. Stop waiting for the so-called "perfect moment" because the perfect moment is now! See the opportunity, believe in yourself, and take action! For those already on the right path, keep going, your journey isn't over yet, this is just the beginning of even greater success. For those still undecided, this is your moment to change your destiny. Join us, accept the challenge, and let's continue this winning streak together!

NAS COMMUNITY

Remember, success favors the brave and decisive. Let's keep the momentum going, trust the opportunities ahead, and take action to watch your life transform. This is your chance, don't let it slip away!

I am a beneficiary of NAS community. Through the guidance and sharing of our helmsman, I've finally broken past the shackles in the investment world and achieved true success. Along the way, I deeply understood one of the helmsman's sayings: "Pass on the legacy of love."

Yes, I will continue to share my journey, hoping my story inspires you all. Success is never about being pushed by others, it's about awakening and transforming yourself. When you truly realize your potential and take that courageous first step, that's when real breakthroughs happen.

We all have the ability to change our destiny, the key lies in whether we're willing to act. Waiting for others or relying on external pushes won't suffice. Success demands that we rise, take initiative, and seize opportunities.

NAS COMMUNITY

So, folks, don't wait for others to guide you. What you need is an inner awakening, a yearning for the future, and an unwavering belief in change. Action is the key to success. When you decide to take that step, you're already on the path to achievement.

Remember, every action takes you closer to your goal, every effort moves you nearer to your dreams. Success doesn't belong to those who hesitate but to those who dare to change and act decisively. Let's work together, pass on this legacy of love, and create a brighter future through our awakening and determination!

Yesterday, the three major U.S. stock indices continued their slow climb. The Dow Jones broke through the 45,000-point mark for the first time, and the S&P 500 recorded its 56th all-time high closing in 2024! This is undoubtedly a milestone moment. Driving these achievements is Federal Reserve Chair Powell's optimistic view of the U.S. economy and the strong performance of tech stocks.

At "The New York Times" DealBook Summit, Powell remarked that the U.S. economy is in good shape, with a stable labor market and growth exceeding

NAS COMMUNITY

expectations. He stated that the Fed would adopt a more cautious approach when adjusting rates to a neutral level, a balance that neither stimulates nor restrains the economy. While his comments were slightly hawkish, market expectations for a December rate cut remain unchanged.

According to the CME FedWatch Tool, traders now see a 77% probability of a 25-basis-point rate cut in December, up significantly from 67% last week. Additionally, the Fed's Beige Book showed slight growth in economic activity for November, with businesses more optimistic about future demand, further boosting market sentiment.

The recently released initial jobless claims for the week ending November 30th came in at 224,000, which is relatively stable, further confirming the stability of the labor market. While the data is not particularly eye-catching, it sends an important signal to the market: the economy has not weakened, rather, it shows signs of resilience and the potential for continued improvement.

But folks, let's take a closer look at the current situation. While the indices are showing slow growth, this type of increase offers limited profitability for investors. There are two key reasons for this:

NAS COMMUNITY

- 1. The market's growth is primarily driven by small gains in major tech stocks.**
- 2. Sector rotation is ongoing, with no clear leading trend.**

The result is that many investors see the indices hitting new highs, but when they check their accounts, the profits are minimal. This is the most honest reflection of the current market reality.

In today's environment, selecting the right strategy is more critical than ever. We must precisely identify opportunities rather than blindly follow the surface-level prosperity of the indices. Grasping the true rhythm of the market is the key to breaking through and achieving returns.

For stocks that have already surged significantly and lost their value proposition, I strongly recommend reducing positions or locking in profits to prepare for potential adjustments. The market is ever-changing, and taking proactive action is the best way to stay ahead. As for fundamentally sound stocks with solid logic, continue to hold them patiently but remember do not add positions recklessly. Sector rotations are ongoing, and the next wave of opportunities is brewing, this requires both time and patience.

NAS COMMUNITY

Listen carefully, folks! Based on feedback from the team and the captain, I've decided to lead us in live contract surfing. Now is the time to prepare as we analyze Bitcoin's technical movements and seize the opportunity before us!

According to the Helmsman Montgomery Keane Box Theory, Bitcoin has successfully broken through the consolidation range around \$99,000 and has established itself above \$100,000. This is a historic moment! The Helmsman's strategic goal has been perfectly achieved, demonstrating his exceptional foresight and precise judgment.

NAS COMMUNITY

Two months ago, those who followed the Helmsman advice to buy Bitcoin for the medium term should now be experiencing the power of the medium to long-term trend. This is not luck; it's the reward for strategy and patience, substantial returns are sure to come!

What's even more exciting is that the entire crypto market is about to boil over. This is the opportunity for us bold movers, and a crucial moment to prepare for the next wave of even greater gains.

Yesterday, Bitcoin experienced a short-term rally following the news that crypto-friendly Trump nominated Paul Atkins as SEC chairman. Known for his pro-crypto stance, Atkins' nomination undoubtedly injected fresh optimism into the market. However, the price remains constrained near the resistance zone of previous highs. Today, it's expected to maintain a consolidation pattern, though short-term spikes cannot be ruled out.

Guys, looking at the daily chart, it's clear that Bitcoin's lows are gradually rising. Although the MACD once formed a death cross, the price didn't experience a significant pullback. On the contrary, after consolidating, it made a strong and sharp rally, showing a classic divergence pattern. Currently, both the 5day and

NAS COMMUNITY

20day moving averages are in a clear bullish alignment, with the bulls having gained absolute dominance. This is the signal the market is giving us: buying at lower levels is the best strategy right now.

Listen, folks, this is the moment to dive into the market and seize opportunities with precision! However, before we begin, one critical rule must be established: position management.

Under normal circumstances, we operate with 20–30% of our position size. However, since today marks our first collective trade, we'll uniformly apply a 10% position size. This is not a suggestion but a strict rule that I expect everyone to follow diligently.

To ensure discipline, I've arranged for helmsman's assistant to randomly check your trade positions or closed orders. Let me be clear: if anyone fails to fully adhere to the strategy, I won't hesitate to stop leading these trades.

NAS COMMUNITY

Folks, this opportunity is something we've fought for from the captain, it's incredibly valuable, so let's treasure it. Are you ready? Let's bring our best, prove our strength through discipline and action, and seize this chance!

Guys, let me tell you, this trade I just completed? The entire crypto market was in a downtrend this morning, primarily correcting and consolidating. This is absolutely a perfect example of a trend-following strategy, and also an exciting part of our α & β bearish strategy! You know what? These strategies aren't just randomly put together, they all come from the quantitative model designed for us by the Helmsman, and they are a core component of the magical power of the AlphaStream 5.0 system.

Today, by strictly adhering to these quantitative conditions, we achieved success in our trade. This wasn't luck, it's the result of wisdom and the strength of the system! And folks, the market is always the best teacher. As helmsman often says, every practical experience is an opportunity to learn and grow.

Think about it, how does it feel to complete your first crypto contract trade and achieve a 70% profit in such a short time? Incredible, isn't it?

NAS COMMUNITY

Listen up, folks! We just completed an outstanding trade and secured an excellent victory. Now it's time to solidify our profits and protect our gains.

Here's my plan: Every time we strike gold through contract trading, I recommend you stash away half of the profits into a 30-day fixed-income product. Imagine this, it's like planting half of your harvest back into the soil, ensuring that no matter how the market fluctuates, you have a steady return waiting for you.

This isn't just a cautious move, it's the blueprint for building a fortress around our wealth. It ensures that while we're riding the waves of the market, part of our treasure is securely anchored on the shore, laying a solid foundation for our future.

To put it plainly, this strategy is the key to maintaining steady growth! Allocating half of the profits to these short-term "safety nets" isn't about being conservative, it's about paving the way for even greater profits.

For today's trade, we only used 10% of our position and achieved a 70% profit! In other words, in under 30 minutes, our total asset returns rose by 7%. If you

NAS COMMUNITY

had \$10,000 in your account, you just made \$700. If you had \$100,000, that's \$7,000. This level of efficiency is unbeatable!

Even more importantly, today wasn't just about earning money, it was about understanding how to earn it. Every practice is an opportunity for improvement. The more you get hands-on, the better you'll perform, better than me! With experience, you'll naturally start asking the right question: How do I earn more with less risk? That's the essence of contract trading.

Now, let's dive deeper into strategies for playing the big-money game and how it changes the rules. Take the 5-minute quick trade we just executed, we earned 70% profit. If we expand the timeframe to 15–60 minutes, the profit potential increases 3–5 times. On the daily level? We could be looking at over 10x returns!

However, adapting to larger cycles requires understanding that greater price fluctuations also bring higher risks. That's where big accounts shine. Smaller accounts might panic over volatility but larger accounts can calmly navigate through it when dealing with broader cycles. This is precisely why our custom group members have achieved returns exceeding 200%.

NAS COMMUNITY

By adjusting cycles and risks, we can not only pursue higher profits with lower risks but also maintain composure in the market's ups and downs, elegantly growing our wealth.

And let's not forget this afternoon's meeting with helmsman. It's not just another meeting, it's our blueprint for continued victories! Strategies, insights, techniques, it's all there. This is what sets us apart.

Finally, friends, let me ask you a critical question:

You joined NAS community to realize your dreams through investing. Now, as you embark on the Millionaire Club's million-dollar profit journey, are your investment amount and execution truly at their maximum effort?

Send your answer to the assistant to earn 30 points. This is our opportunity. Don't miss it, let's continue creating miracles together!

- 3. Passion December 80% Profit Challenge - Eighth Trade Signal**

Good afternoon, my friends!

I'm Montgomery Keane, your old friend. Today is a historic moment, a day worth celebrating for global investors! BTC has finally broken through and stabilized above the \$100,000 mark, fulfilling the anticipation of countless investors. This is not just a jump in numbers, it's a milestone for the crypto market as it moves toward becoming a mainstream asset.

NAS COMMUNITY

When Bitcoin was still hovering around \$60,000, I repeatedly urged everyone to firmly buy into mid-term long positions, with a target of \$100,000. In less than two months, that target has been reached as expected. For those who seized the opportunity back then, this moment is undoubtedly a happy one, you embraced it with decisiveness and execution, reaping rich rewards. As for those who missed the opportunity, at this point, aside from sighing, there is likely more regret over their hesitation.

But friends, the opportunity has not completely slipped away from us! The reality has already happened, and whether you agree with the crypto market or not, its influence can no longer be ignored. If you still don't recognize the wealth opportunities brought by the crypto market at this moment, you will miss out on the most generous gift this era has to offer investors.

Just as we choose to go heavy and use leverage when a bull market arrives in the stock market, when the crypto market presents such certain opportunities, we also need to go all in! The current market not only has unprecedented upside potential but is also driven by the "Crypto President" policies, redefining the investment landscape and bringing us a new American dream.

NAS COMMUNITY

Missing this opportunity means letting wealth slip through your fingers. But if you choose to seize it, hold on, and take action, you will be holding a ticket to future wealth.

Now is the time to reassess your investment portfolio and make room for the crypto market. Let's move forward with firm belief and clear goals toward the new opportunities this era offers us! The opportunity is right in front of us, seizing it is the best investment for the future!

Recently, many friends have been asking me: How can I quickly become a millionaire? This question reveals everyone's desire for financial freedom. But I must be honest: If you currently only have \$5,000 in investment capital, even if you have achieved brilliant results in the "Passion December 80% Profit Challenge," the road ahead is still long, especially without any investment mistakes along the way.

So, is there a faster way? The answer is: increase your principal investment.

NAS COMMUNITY

Let's be realistic. Most people's investment capital is accumulated little by little through their work income. If you want to achieve financial breakthroughs quickly, simply accumulating slowly is not enough. At this point, investing in Bitcoin becomes an excellent path to changing your destiny. As Robert Kiyosaki, the author of Rich Dad Poor Dad, said: "Bitcoin is the simplest way to become a millionaire." This is not blind enthusiasm, but the investment truth revealed by Bitcoin's growth potential and market volatility.

Why choose the crypto market?

- 1. Huge growth potential: Bitcoin's price increases have repeatedly shattered expectations since its inception. Against the backdrop of global economic uncertainty, it is becoming the preferred asset for combating inflation and preserving value.**
- 2. Market volatility provides opportunities: High volatility means high potential returns. With the right strategies and tools, volatility is not a risk but an engine for wealth growth.**
- 3. Lower entry barriers, relatively higher returns: Compared to entrepreneurship, which often requires substantial startup capital and long operational periods, crypto market investments offer a more direct and transparent path to wealth creation.**

NAS COMMUNITY

4. Rather than considering entrepreneurship as another road to wealth, it's more honest to admit that the success rate of entrepreneurship is astonishingly low. It requires exceptional intelligence, dedication, execution, and luck. In the crypto market, however, by acquiring professional investment knowledge and leveraging top-tier tools and strategies like AlphaStream 5.0, you can achieve your financial goals much faster.

The question now is: Are you ready to accelerate your investment journey?

Are you willing to increase your investment capital, seize this era's great opportunity, and let the crypto market become your bridge to a million-dollar fortune?

Remember, opportunities always favor those who dare to take action. Whether you're new to the market or already have some success, the crypto market has opened a door to a new world for us. Let's move forward with unwavering belief, equipped with the right strategies and tools, and create our own legend in this opportunity-filled market! The opportunity is right in front of you, and the decision to act is in your hands. Join us, and turn your dreams into reality with wisdom and execution!

NAS COMMUNITY

First of all, I want to sincerely thank Daniel Robert for the brilliant presentation this morning. He showcased the powerful capabilities of the $\alpha\&\beta$ system with exceptional skill, especially through a precise short-selling strategy that delivered an astonishing 70% profit in just 30 minutes. This not only proves the efficiency and smoothness of the strategy but also perfectly highlights the core value of combining trend-following and contract trading, making trading simpler, more flexible, and achieving stable and significant returns with higher capital efficiency.

Daniel Robert's trading system is profound and comprehensive, containing a fully validated set of efficient strategies. The precise application of these strategies in trending markets undoubtedly unleashes tremendous profit potential. His presentation today opened a door to a higher level of trading mindset, and it is something every one of us should study and learn from seriously.

Here, I strongly encourage everyone to learn more, whether through private discussions or direct questions. Don't miss any opportunity to gain deeper insights into his trading philosophy and techniques. I will also do my best to

NAS COMMUNITY

arrange more opportunities for him to share his unique perspectives and valuable experiences with everyone.

Later, I will reveal a major wealth opportunity for this week, an extraordinary chance to achieve a 200% return. This is not just a great opportunity to make money but also a journey of deep learning and self-improvement. I strongly urge everyone to fully commit and carefully understand the investment logic and strategies I am about to share. Success waits for no one, and this opportunity is no exception.

Let us seize this pivotal moment together and stride toward the peak of success. On this exciting journey, each of you is our most valuable partner. Your active participation and unwavering commitment will be the core driving force behind our shared achievements.

Are you ready? Now is the moment to embrace this great opportunity. Let us use our wisdom and actions to write our extraordinary investment story! The future is here, let us create greatness together!

NAS COMMUNITY

This Friday, we will witness the highly significant U.S. November Non-Farm Payrolls report, which is undoubtedly the market's focal point. After the dismal performance in October, with only 12,000 jobs added, the economy seems to have no room for further decline. Wall Street widely expects a strong rebound in November's data.

So, has the job market really regained momentum? Perhaps not. Here are some key points to watch: According to The Wall Street Journal survey, November is expected to add 214,000 jobs. This number may seem encouraging, but it is more of a correction to October's weak figures. Two months ago, Boeing's large-scale strike and the impact of hurricanes in the South significantly suppressed employment levels. Only by combining the average data from October and November can we get a more accurate picture of the actual state of the job market.

Returning to the market, the three major indices continued to fluctuate at high levels today, with sector rotation trends becoming more apparent. The focus remains firmly on the crypto market. The release of the non-farm payroll data is expected to trigger significant market volatility once again, which, for us investors, represents a rare trading opportunity. Friends, tomorrow could be a

NAS COMMUNITY

critical moment for our returns! Let's stay highly vigilant, leverage the advantages of AlphaStream 5.0, and seize this golden opportunity amidst the volatility. Opportunities are always reserved for those who are prepared, now is the time to demonstrate your decisiveness and action!

Compared to the relative steadiness of the stock market, the profit potential in the crypto market is truly remarkable. In this dynamic market, the NAS community token delivered an outstanding return of over +102%. Our first AlphaStream 5.0 test achieved an impressive +74% gain, followed by +72% in the second test. Meanwhile, in the current Profit Challenge Plan, many participants have already exceeded +90%. This means we have achieved an average return of +70%, and all within a significantly shorter timeframe.

When we introduce the concept of "total asset return," it becomes evident that contract trading not only maximizes capital utilization but also provides optimal overall returns. This is a question every dedicated investor must consider: How can you maximize profits while minimizing risks? This is not only our guiding principle but also the core of every investment decision.

NAS COMMUNITY

Recently, under the guidance of AlphaStream 5.0, we completed nearly 20 trades in the cryptocurrency market, and every single one was successful. These successes were no coincidence, they stemmed from our choice of strategies with high "stability parameters," meaning low-risk strategies. These strategies have not only proven the system's stability but also demonstrated its extraordinary profitability.

Building on this solid foundation, it is now time to embrace even bigger dreams and carve out new pathways to wealth creation. As I often tell friends and community members, the goal of this Million Dollar Profit Challenge is to ensure that every participant achieves success. While this is an ambitious target, we have absolute confidence in both the system and everyone involved.

Looking ahead, the global launch of AlphaStream 5.0 in March next year and the upcoming charity fund initiative will require everyone's participation and support. We are not just pursuing profits, we are creating opportunities to give back to society and leave a lasting impact.

NAS COMMUNITY

The opportunity before us is both rare and transformative. Let us seize this moment with clear thinking, unwavering determination, and focused effort. The path to success lies ahead, together, let's stride toward a brilliant future!

Dreams are the soul of outstanding investors, and without them, we risk losing our direction in the waves of the market. Recently, I have received many enthusiastic messages from friends, filled with hope and aspiration for the future. You've asked me: Is it possible to achieve or even surpass the million dollar profit target through the cryptocurrency market and the AlphaStream 5.0 system? My answer is yes, it's not only possible but also the best demonstration of our boundless passion and vision for the future.

Next, I would like to share two key strategies that can significantly boost profits:

- Optimize the investment portfolio by increasing the proportion of short-term trading strategies.**

The AlphaStream 5.0 system has already demonstrated its exceptional profitability and stability in past trades. By optimizing the investment portfolio and increasing the proportion of short-term trading strategies, we can more flexibly capture opportunities arising from market fluctuations while effectively managing risks associated with market adjustments. The advantage of short-

NAS COMMUNITY

term trading lies in its efficiency and precision, enabling the rapid maximization of profits, an essential choice in the current market environment.

- **Go all-in to achieve this week's 200% profit target.**

With the dual support of AlphaStream 5.0 and cryptocurrency contract trading, we have repeatedly validated the feasibility of this strategy. This week, we will go all-in, striving to achieve the 200% target return. This is not only a bold challenge but also a perfect test of our team's conviction and strategy. Through this effort, we can not only achieve significant short-term profits but also lay a solid foundation for long-term wealth accumulation in the future.

Dreams are the driving force that propels us forward, and the AlphaStream 5.0 system is the powerful tool to realize those dreams. At this moment, the crypto market is brewing new opportunities, especially with its 24/7 continuous operation, providing a vast stage for everyone willing to participate.

Why now?

My confidence comes from an important fact: friends who participated in the customized investment plans have already achieved returns of 200%-300% this

NAS COMMUNITY

week. Through precise strategies and unwavering execution, we are fully capable of surpassing 200% returns by the end of this week. This is not just a chance for profit but an opportunity to change your destiny.

Considering the volatility of the crypto market, this weekend's plan suggests using only 10% of your investment position to ensure steady operation while maximizing returns. For those who have already prepared for fund transfers, I strongly recommend contacting me or my assistant immediately. We will assist you in formulating your weekend profit plan as soon as possible.

Finally, let us redefine our goals!

Imagine what heights this week's total asset return rate will reach once the weekend profit plan is included. This is the "challenge" we pursue, not just a simple numbers game, but a demonstration of courage and determination in the face of opportunity! Friends, the future is in our hands, and the key to success lies in the combination of action and wisdom.

Please note, I have been monitoring the data and will be sharing the trading signal on Telegram shortly.

NAS COMMUNITY

Important Reminder:

Friends, please note that I have just shared the eighth trading signal of this profit plan in the Telegram trading signal group. Please check and follow it strictly.

To all the brave participants who have joined hands to write this profit legend, my sincerest congratulations! Together, we have reached an astonishing new height of a 99% return rate! This is the perfect combination of wisdom and action, and an extraordinary achievement born of our collective efforts.

Now, I need you to take action. Please contact me or my assistant immediately to ensure that your profits are properly allocated and invested. Let's move forward together and embrace even greater success!

Today's Results Evaluation

Think deeply: If the crypto market truly is your opportunity to achieve financial freedom, how would you respond? Have you already made a plan and prepared to ride the waves in this bull market?

NAS COMMUNITY

Send me your answer via private message so I can understand your thoughts, plans, and the support you need. Together, we'll create the best strategy to ensure you achieve maximum profits in this bull market! (Worth 80 points)

Dear friends, today we delved into the golden opportunities in the current crypto bull market, uncovering an exceptional path to wealth growth. I firmly believe that earning a million dollars, or even achieving financial freedom, is entirely attainable for many. The 200% profit opportunity offered this weekend is a crucial step toward success.

The market changes rapidly, and opportunities are fleeting. Being prepared in advance is the cornerstone of success. Don't wait until the opportunity arises to act hastily, start planning and positioning now. This time, we recommend using only 10% of your investment position to pursue high returns while maximizing capital protection. Allocating funds based on individual profit targets will be the best way to ensure the achievement of your goals.

Now is the time to take action!

NAS COMMUNITY

Seize this rare opportunity and take a crucial step toward achieving financial freedom.

Believe in yourself, believe in this market, and let's use our wisdom and courage to create our own brilliance!

Tomorrow morning, don't miss it!

Daniel Robert will continue leading everyone in contract trading in the group. His α & β strategy is an outstanding improvement on my original quantitative trading methods, which has helped him achieve financial freedom. This will be a rare opportunity for learning and practice, friends, don't miss it.

Wishing everyone a pleasant day, see you tomorrow!
