Daniel Robert

Non-Farm Payroll Data 600% Profit Challenge Countdown: 8 Days Remaining

Morning Review (α & β Strategy)

Good morning, members of community,

I'm Daniel Robert, and today marks the first trading day of 2025. The first rays of sunshine in a new year always fill us with anticipation. Reflecting on the year that has just passed, I feel immense gratitude and respect. For me, 2024 was nothing short of extraordinary, a year that transformed my destiny.

In 2024, I achieved a breakthrough, growing my capital from millions to tens of millions of dollars. This wasn't merely about numbers; it was a comprehensive test of my investment philosophy, execution, and teamwork. I know these

NAS COMMUNITY

achievements were made possible by two crucial factors: the remarkable cycles gifted by this era and Helmsman's precise guidance.

Over the past year, we danced with the market through its highs and lows. From the surging stock market to the explosive growth of the crypto market, each opportunity brought both challenges and rewards. At the start of the year, we went nearly all-in with leverage, capturing the stock market rally with precision and achieving remarkable returns. Now, Helmsman has once again demonstrated his unparalleled foresight and insight, leading us to shift focus to the hottest crypto market.

The crypto market boom is an unparalleled wave of wealth, and AlphaStream 5.0 has undeniably equipped us with wings to ride this tide. This system not only provides stable and precise trading signals but also helps us find clarity in a complex market environment. It enables us to identify definitive opportunities amid volatility and uncover simple yet reliable paths to profit in a world of intricate trends.

NAS COMMUNITY

This success, however, isn't just about technology or strategy. It's about the spirit of sharing that Helmsman embodies. With years of accumulated experience and wisdom, he shares selflessly, allowing every participant to benefit. This spirit inspires admiration and strengthens my belief that our achievements result not only from luck or skill but from teamwork and collective effort.

This community has brought me not only financial growth but also an elevation in mindset and a renewal of faith. I've witnessed many friends transform, from confusion to confidence, from hesitation to all-out commitment, writing their own success stories through action. In 2024, we witnessed it all through our hard work and intelligence. This was a year filled with warmth and strength. We weren't just pursuing profits but also the power of wisdom, faith, and persistence. This is an era brimming with opportunities, and the Helmsman is the beacon guiding us through the fog. I am deeply grateful to journey alongside such a team and look forward to an even brighter future.

Now, 2025 has begun, and I'm filled with boundless anticipation for the year ahead. Personally, my ultimate goal for 2025 is to join the Billionaire's Club and

NAS COMMUNITY

achieve my dream of early retirement. I am well aware that this goal won't come easily, but the challenge itself fuels my drive.

Guys, we are living in a remarkable era for investment. Every cycle presents boundless opportunities, and every action is a chance to change our destiny. Let my story be a testament: as long as you hold firm to your beliefs and give your all, success will undoubtedly be yours.

At this new beginning, I hope every member of NAS community seizes every opportunity in 2025, meeting each challenge with intelligence and execution. Trust the Helmsman, trust our hopeful community, and most importantly, trust yourself! Together, let's write a new legendary chapter in 2025!

The newly released initial jobless claims for the week ending December 28 came in at 221,000, below the previous reading and forecasts, once again highlighting the resilience of the U.S. labor market. This data sends a clear signal: the labor market remains robust, which could further reinforce the market's expectation that the Federal Reserve may maintain a wait-and-see approach regarding future policy adjustments.

NAS COMMUNITY

For the stock market, this data might heighten investor concerns about the Fed's "higher-for-longer" interest rate stance, potentially dampening risk appetite in the short term. This is especially relevant for the tech and growth stock sectors, which may come under pressure as expectations of prolonged high rates strengthen. At the same time, with high-level pullback signals gradually emerging, investors may lean towards adopting defensive strategies, waiting for further guidance from the next critical data release.

For the crypto market, however, this jobs data presents new opportunities. As a hedge against traditional asset volatility, crypto assets often exhibit unique appeal during periods of tightening macroeconomic conditions. Particularly when sentiment in traditional assets is suppressed, crypto like Bitcoin may continue to attract capital inflows and maintain strong performance. Combined with market expectations of crypto-friendly policies in 2025, Bitcoin's recent strong support above \$90,000 could further build momentum for upcoming market moves.

NAS COMMUNITY

For the stock market, timing cycles is crucial. Looking at the S&P 500 weekly candlestick chart above, the index is currently at a relatively high position. The 5-week moving average is on the verge of crossing below the MA20, potentially triggering a weekly-level α & β bearish strategy. Additionally, the MACD is forming a death cross at high levels, a typical bearish signal. During the week of December 16, trading volume peaked, a key reference point often indicating a potential correction.

Fundamentally, the market awaits upcoming critical data to provide direction. Before Trump officially returns to the White House, the market is likely to maintain a high-level consolidation. The true guidance will come from the

NAS COMMUNITY

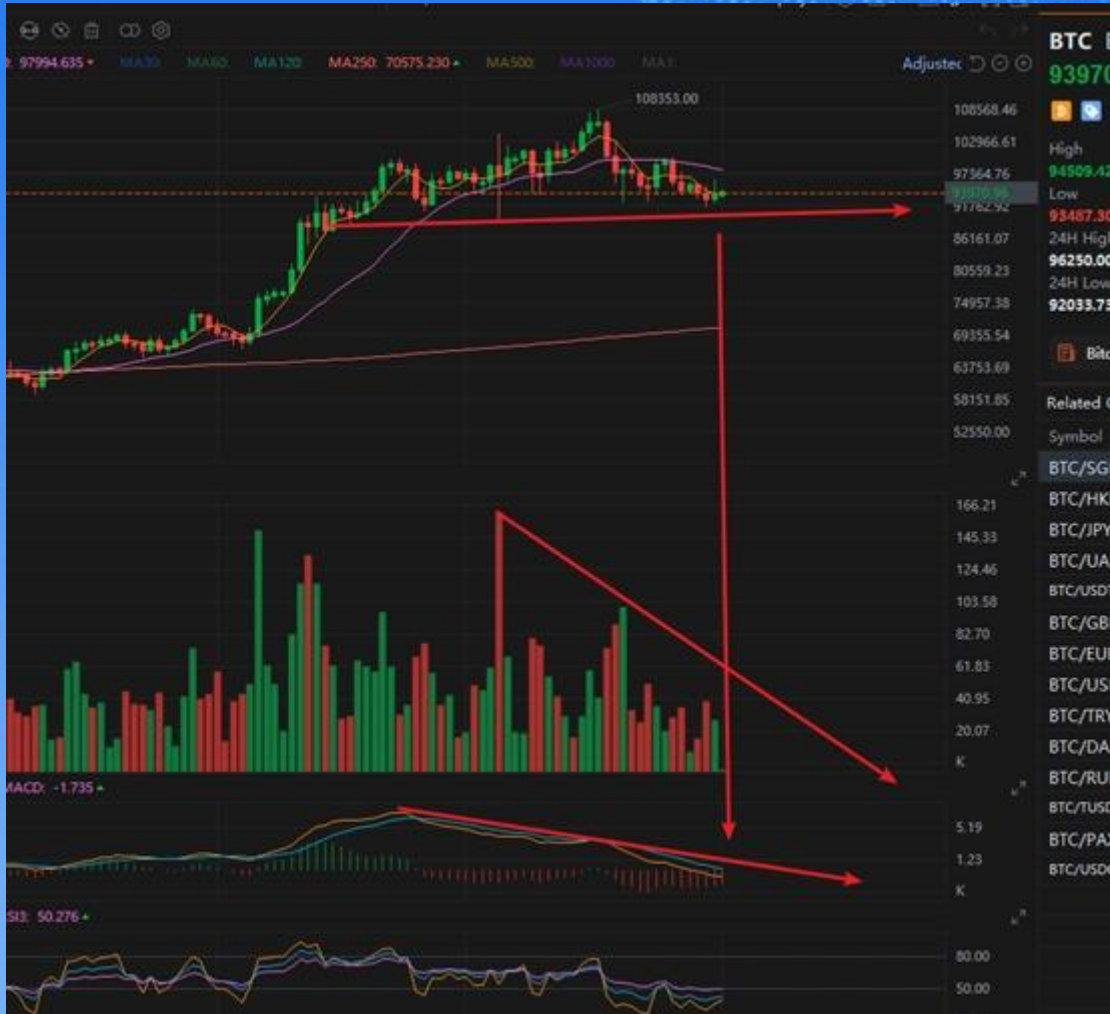

upcoming fourth-quarter earnings reports, whether they deliver surprises or not. Currently, the market remains highly sensitive, with most individual stocks having elevated P/E ratios and valuations appearing expensive. This lack of cost-effectiveness is the fundamental reason why further market gains are challenging.

In the stock market, true buying opportunities often arise from declines. Only when prices adjust to more reasonable levels, increasing cost-effectiveness, will it be time for heavy buying. So, team, do you believe the current prices of your preferred stocks justify a decisive, heavy investment? If not, it indicates the current market environment isn't suitable for blind entry. Understanding this will help you appreciate the importance of technical analysis and avoid wasted effort due to poor choices.

"Opportunities arise from declines, true turning points require patience." The logic of the market is simple yet profound. The key is whether we can wait patiently and wisely for our moment. In such a sensitive and complex market, sticking to rational judgment and capturing certainties is the real key to success. Guys, be patient, opportunities will come, and our task is to pave the way for success with the right choices!

NAS COMMUNITY

If stock trading emphasizes buying low and selling high for profits (as shorting isn't suitable for most investors), the rules of crypto trading provide a fairer competitive environment for institutions and retail investors alike. While large whales can cause significant short-term fluctuations, but they struggle to fundamentally alter established trends. This characteristic makes opportunities in the crypto market more transparent and appealing.

NAS COMMUNITY

From the daily candlestick chart of Bitcoin, it can be revealed that although the MA5 is crossing below the MA20, forming a bearish adjustment, the downside remains limited. As Helmsman pointed out, the \$90,000 support level demonstrates incredible resilience, consistently attracting strong buying interest whenever approached.

From a technical perspective, Bitcoin is currently exhibiting a classic bullish divergence, technical indicators continue to hit new lows, but the price steadfastly holds support without breaking further down. This pattern often signals a robust rebound is imminent. Once the MACD forms an upward golden cross in the near future, we could witness a significant rally.

One must emphasize that in a market where both long and short trades are viable and operations run 24/7, technical patterns often accurately reflect the underlying logic of fundamentals. This coherence provides highly valuable references for investment decisions. AlphaStream 5.0's ability to deliver such precise trading signals stems from its integration of big data analysis and comprehensive modeling, extracting the most critical market logic and trends.

NAS COMMUNITY

Recently, the heightened correlation between crypto and stock markets has garnered attention, something Helmsman has frequently highlighted. When will the current sideways trend break? The key lies in upcoming data. Tomorrow, we'll see the December ISM Manufacturing PMI, but the real game-changer will be the January 10 release of non-farm payroll data. Historically, this data drives about an 8% fluctuation in Bitcoin prices, and this time, we might witness profit potentials reaching 600%! The countdown to non-farm payroll data starts today, are you ready for this investment feast?

Folks, always remember this: stay tuned to the messages in the VIP partner group! Every trading signal is a rare opportunity and a direct test of your ability to take action. If time allows, never miss a single trade. These signals aren't generated randomly, they are the result of Helmsman and the AlphaStream 5.0 team's wisdom and experience. Seize them, and you'll be one step closer to success. Your ability to act determines your profits, so don't let hesitation become the barrier between you and your earnings!

NAS COMMUNITY

Such opportunities only come once a month. I've increased my investment by \$20 million for this chance, ready to go all in. If this time yields a 600% return, my profits will reach a new peak. While I'm still one step away from the Billionaire's Club, isn't that how dreams are realized step by step? Guys, when faced with such a clear opportunity, ask yourself: have you ever given your all for your dreams? If not, now is the perfect time to change that!

Recently, I've spoken with some friends about their investment results. While some achieved impressive returns, but smaller principal amounts limited their overall profits. However, guys, if you've done your best to participate, that's the best outcome you could achieve, there's nothing to regret. Every effort is a crucial step toward success.

If you feel you need more support right now, don't hesitate, contact the assistant immediately for assistance. Believe me, in the face of clear opportunities, don't shy away from asking for help. As Helmsman says, NAS community never gives up on any partner who chooses to support us. This is a family where we move forward together to ensure everyone finds their brilliance in the market.

NAS COMMUNITY

This morning, our VIP partner groups achieved solid returns, but compared to the anticipated 600% profit from the non-farm payroll data, this was just a warm-up. This week is the prelude to the non-farm payroll data rally. The opportunities ahead are unmissable!

Folks, we look forward to Helmsman's excellent guidance this afternoon. Let's go, seize the opportunity, and see you all tomorrow!

Professor Montgomery Keane (Helmsman)

Closing Commentary

Good afternoon, my friends!

I'm Montgomery Keane, your old friend. A new year has begun—are you ready to embrace new challenges and reach new heights? A big thank you to Daniel Robert for his inspiring sharing this morning. He demonstrated decisiveness and determination in the face of opportunity, always going all-in when the moment was right. That kind of boldness earns my deep admiration. Friends, no success happens by chance. The countdown to the January 10 Non-Farm Payroll Battle and the 600% Profit Plan is now down to 8 days. Are you ready?

Daniel Robert's decisiveness is truly inspiring. In the face of opportunity, he seized every fluctuation with lightning speed, earning himself impressive results. And you, my friend? Opportunities never wait for those who hesitate—

NAS COMMUNITY

don't wait until it's too late to regret. Now is the time to give it your all and grasp this clear opportunity. January 10 will be the pivotal moment in your battle to change your destiny in 2025!

Life is an extraordinary journey, filled with uncertainties and challenges, but ultimately, we will all depart from this market. Investing is not merely an experience; it is a battle—a battle we must win! Striving for a better life for yourself and your family, leaving your mark on the world—doesn't that make life all the more meaningful?

In the name of the New Year, break free from limitations and embrace a new era of thinking.

Dear friends, as the New Year begins, this is the perfect moment to redefine ourselves and reimagine our futures. As investors, each of us is fighting for our dreams. The arrival of 2025 is not just about turning the page on the calendar; it's an opportunity to face challenges and embrace transformation. Let's step forward with a renewed attitude and welcome the gifts this era has to offer.

NAS COMMUNITY

Looking back, have you ever missed significant market opportunities due to fixed ways of thinking? Have you hesitated out of fear of the market or suffered unnecessary losses from emotional trading? These old habits are like invisible chains, holding back our potential. As Einstein once said, "Insanity is doing the same thing over and over and expecting different results." Friends, 2025 is the time to break free from these shackles, let go of outdated ideas, and embrace new possibilities with fresh thinking.

The opportunities in the crypto market are right before us. With Crypto President Trump's imminent return, the market is infused with unprecedented vitality. Bitcoin surpassing \$100,000 is just the beginning, as more countries globally are incorporating crypto assets into their strategic reserves. The market now stands at the cusp of a historic turning point. In the face of such opportunities, traditional investment logic may no longer yield sufficient returns. To stand out in this fiercely competitive market, we must embrace market changes with an open mind, base our decisions on precise data analysis, and let rationality and discipline guide us. Only then can we seize every opportunity that market fluctuations bring.

NAS COMMUNITY

Perhaps in the past, you lost direction by blindly following trends or lost confidence after a failure. But the New Year is a chance for each of us to reshape ourselves and start anew. As the Bible says, "If anyone is in Christ, he is a new creation; the old has passed away; behold, the new has come." Friends, now is the time for us to become "new creations." Let go of the bias that the crypto market is "too volatile" or that it's "too late to enter." It is precisely this volatility that gives us the potential for extraordinary returns. It is the youth of the crypto market that provides the brave with unimaginable opportunities for wealth growth.

The gifts of this era are calling to us. Global acceptance of crypto assets and the regulatory environment are rapidly improving. Have you envisioned the moment when Bitcoin rises from \$100,000 to \$180,000? At that time, will you be standing on the sidelines regretting the missed opportunity, or will you be in the market, savoring the joy of your gains? Opportunities are fleeting, and only those who take action can seize them. The powerful capabilities of AlphaStream 5.0 have already revealed the market's full picture to us. It's not just a piece of technology—it's the tangible embodiment of a new way of thinking. Through it, we can gain clearer insights into the market and capture profit opportunities with greater precision.

NAS COMMUNITY

Dear friends, the New Year is not just a fresh start—it’s a year of breakthroughs and growth. Let’s view the world through a new lens and face every challenge with unwavering determination. As John F. Kennedy once said, “Ask not what your country can do for you, ask what you can do for your country.” Today, I want to tell you this: don’t ask what the market can give you; ask what you can create from the market.

Take action now! Don’t let opportunities slip through your fingers. Arm yourself with fresh thinking and seize the momentum brought by the return of the Crypto President. Together, let’s create a remarkable 2025!

NAS COMMUNITY

Compared to the current high-level consolidation and correction in the stock market, the returns from the crypto market have already become evident to everyone. I've previously advised you to decisively reduce your stock market positions, lock in profits, and allocate more funds to the crypto market. This isn't just a simple move—it's a strategic realignment. We must learn to let go of smaller opportunities to capture the significant profit potential of mainstream markets. Only by doing so can we truly take control of our investments.

A qualified investor must first learn the art of making choices. Devoting more energy and resources to markets with greater certainty is the wisest decision at this moment. Every member of our community should understand that the rise of the crypto market is a gift of destiny from this era. We are standing at this historic turning point, but let's not forget—AlphaStream 5.0 is the key to unlocking this extraordinary opportunity.

NAS COMMUNITY

AlphaStream 5.0 is actively gathering and analyzing cutting-edge market data. The current profit plans and challenges are not indefinite. Once the system's data collection meets the final pre-launch matching requirements or the subscription target is reached, this plan will be terminated at any time. In March 2025, AlphaStream 5.0 will officially launch globally, transitioning to a subscription-based model. This means that every trade and profit plan we have now is a rare opportunity. Everyone must give their all to seize every moment.

Friends, 2025 is a pivotal window of opportunity for ordinary investors in the crypto market. If we miss this wave, as the crypto market matures, the difficulty of making profits will increase significantly—just like today's stock market, where cycles and opportunities are gradually diminishing. We must clearly understand that this is a race against time.

So now, take action! Every decision you make could determine the heights you'll reach in the future. Trust in AlphaStream 5.0, trust in the power of our collective efforts, and seize the golden opportunity of the 2025 crypto market. Let it be the turning point that changes your destiny!

NAS COMMUNITY

Friends, success in life is never achieved overnight but rather through consistent effort, steadily accomplishing each phase's goals. Do you agree? In this journey, every trade and every decision we make is crucial, they collectively form the bridge that leads us to our dreams.

Our profit record undeniably proves this point. Every strategy and every decision has been the result of meticulous planning and precise execution. With the powerful analytical capabilities of AlphaStream 5.0, we have not only captured the best investment opportunities amidst market fluctuations but also achieved an impressive 200%-600% return. This is not just a set of numbers—it is the ultimate affirmation of our perseverance and hard work.

Now, let's take a closer look at some key data points:

- 1. The VIP1 partner group has already achieved a 100% profit, with a total asset return rate reaching 109.73%. This means that if you've consistently followed AlphaStream 5.0's strategies, your initial capital has already doubled. These figures are derived from conservative records and calculations, fully reflecting the power of scientific planning and execution.**

NAS COMMUNITY

- 2. The VIP2 and VIP3 partner groups have performed exceptionally well, both successfully achieving their expected targets and generating significant returns. These results once again validate the importance of strategic investing and fill us with confidence for the future.**
- 3. For those who have already joined the VIP1 partner group, I strongly recommend upgrading to a higher-level VIP partner group as soon as possible to ensure your returns continue to grow and stay aligned with the average performance. If you encounter any difficulties during the upgrade process, please contact an assistant immediately for support. The NAS community is committed to never giving up on anyone pursuing their dreams, and we will do everything we can to support your investment journey.**

Dear friends, now is the perfect time to take action! Opportunity always favors those who dare to take the first step. Don't let hesitation become the stumbling block that holds you back. Upgrade to a higher-level VIP partner group, follow AlphaStream 5.0, and seize every opportunity in the market's fluctuations. Trust me, your dedication and belief will undoubtedly yield substantial rewards. Take action now, and let's work together to create a brilliant future that belongs to us all!

NAS COMMUNITY

Dear VIP Partner Group Members,

Your outstanding achievements are a shining beacon within our community! Not only have you met the established foundational targets, but you have also exceeded them. This success not only validates the effectiveness of our strategies but also highlights our unique advantages in capital allocation and risk management. By engaging in trades based on higher timeframe charts and leveraging more frequent and precise trading signals, you have collectively driven cumulative returns and total asset compound growth rates to unprecedented heights.

Reflecting on all of this, I must admit that, in the beginning, I did have some concerns—not about whether we could achieve our ambitious goals, but about whether some members' execution capabilities could withstand the challenges. This concern prompted me to implement more rigorous capital management measures and tailor a personalized strategy for everyone. The results have proven that this decision led to success beyond expectations.

NAS COMMUNITY

Today, I am incredibly proud to see that, through your exceptional efforts and unwavering determination, you have not only proven your capabilities but also demonstrated the immense strength and limitless potential of our team. Each of your successes is a result of our collective hard work, and it fills me with immense pride.

We have every reason to believe that achieving a one-million-dollar return is no longer an unattainable dream for every member of the VIP Partner Group but a goal that is entirely within reach. In fact, some of our members have already successfully achieved this milestone. This is a testament to their strength and a demonstration of decisive action. Therefore, I strongly encourage every friend to join the VIP Partner Group and climb to greater heights alongside like-minded partners, embracing even greater victories!

If you're currently concerned about the scale of your capital, the most direct and effective solution is to increase your funding. This will not only make achieving ambitious goals easier but also pave the way for your success. The size of your capital determines the scale of your returns—an undeniable rule of the capital markets. In the VIP Partner Group, no matter your starting

NAS COMMUNITY

capital, you will gain strategic advantages. Within our capabilities, we will do everything possible to support you in reaching your goals quickly.

Through relentless effort and unwavering determination, many friends have embarked on this remarkable and rewarding journey. They have transformed their initial capital into substantial profits—a transformation that not only testifies to steady returns but also marks a victory worth celebrating! In our latest endeavors, whether in the VIP1, VIP2, or VIP3 partner groups, everyone has advanced step by step toward greater success, leveraging 12, 18, and 20 precise trading signals, respectively.

This challenge has not only ignited our competitive spirit but also guided everyone on a journey toward realizing their dreams. In less than three weeks, including weekends, we achieved this remarkable result! Although I've always leaned toward a steady and cautious style, this success has made me realize that our potential is far from fully unleashed. Such achievements are not only exhilarating but also a sign that we have even greater room for growth ahead.

NAS COMMUNITY

Friends, this victory is just the beginning. In the future, we will create even greater achievements through more action and effort. Now is the best time for you to join us. Let's move forward together with unwavering faith and decisive action to embrace our next moment of glory! What's your take on this?

As we celebrate yet another successful completion of our phase challenge plan, this is also a perfect moment for reflection and future planning. Friends, take a moment to calm down and carefully consider the following key questions. Actively participate in answering them. This is not just a simple questionnaire—it's the strategic foundation for us to move toward an even brighter future together! (Completing the questionnaire will earn you a 30-point reward.)

- 1. Are you satisfied with the profit plan for this phase? Do you currently need any additional support or assistance to improve your results?**
- 2. If you have already achieved the one-million-dollar profit goal, what is your next target? How long do you plan to take to achieve it?**
- 3. AlphaStream 5.0 is set to launch globally this March. Do you plan to support and purchase it? If so, how do you expect it to further empower your investment journey?**

NAS COMMUNITY

Your feedback is crucial to us. It not only helps us understand your actual needs but also provides valuable direction for our upcoming strategic planning. Through sincere communication with one another, we can better collaborate to set even more ambitious goals and achieve higher returns together.

That's all for today's discussion. Thank you all for your participation and support. Let's look forward to an even more dynamic investment journey ahead, continuing to create our own brilliance in the market.

Friends, see you tomorrow!
