Professor Montgomery Keane (Helmsman)

Weekly Review: The Battle of King Continues Its Glory, Trump's Return Marks a Historic Opportunity

Good afternoon, my friends!

I'm Montgomery Keane, your old friend. Today is Martin Luther King Jr. Day, a profound reminder of the importance of dreams, courage, and action. Dr. Martin Luther King Jr., with his unwavering faith and relentless efforts, transformed countless lives. His words "I have a dream" continue to inspire people around the world to strive for a better future.

Dr. Martin Luther King Jr.'s dream was for everyone to pursue happiness equally. Our dream is to find the path to financial freedom amidst the ups and downs of the market. Investing itself is a reflection of dreams, as every trade and every decision carries our desire for a better life.

NAS COMMUNITY

But having a dream isn't enough. As Dr. King taught us, action is the key to realizing dreams. The investment market is never a place to wait for miracles, it requires us to seize every opportunity with wisdom and decisiveness, and to face every challenge with the right strategies and unwavering conviction.

My friends, on our journey as investors, the challenges we face may not be as dramatic as those Dr. King encountered, but they still demand our courage. Market fluctuations might make us uneasy, but it is within this uncertainty that opportunities to change our destiny are born.

Today, I want to ask you: What is your dream? How much action have you taken to achieve it?

On this day, let us reflect on Dr. King's spirit and integrate his teachings into our investment journey. Success isn't achieved overnight but is the result of consistent effort and relentless pursuit. Each of us has the power to change our own destiny, and the market is the stage where we can write our own legendary story.

NAS COMMUNITY

Today is a day to reflect on our dreams, review our actions, and embark on a fresh start. In the current market environment, whether it's the stock market's high-level fluctuations and adjustments or the historic opportunities in the crypto market, every movement offers us a chance to invest and grow. What we need is not fear of market volatility but the courage of Martin Luther King Jr. to embrace challenges and the determination to achieve our goals through action.

Finally, I want to tell everyone:

"Dreams only become reality when you take action." Whether your dream is small and heartfelt or grand and magnificent, start taking action for it today. Let us take inspiration from Dr. King, stay steadfast in our beliefs, embrace opportunities, and use wisdom and action to create our own miracles in the investment market.

NAS COMMUNITY

Dreams combined with action are the foundation of success. In our community, I've seen far too many people miss out on doubling their opportunities because they couldn't bring themselves to believe, and others remain stagnant because they resisted change. While these experiences are regrettable, they've only strengthened our conviction: our purpose is to help every investor achieve their dreams.

The road to success is never smooth. It requires the courage to face the unknown and the willingness to embrace new challenges. Doubt and resistance will only hold us back, while trust and action are the keys to unlocking the door to success.

Today, on this leisurely holiday, is a perfect opportunity to relax and reflect. I hope you can take a moment to pause and think deeply:

- **What has been holding you back from moving forward?**
- **And what can help you overcome fear and take brave steps ahead?**

NAS COMMUNITY

The success stories of the NAS community have never been solely about investment strategies. Every friend who has achieved their dreams here did so because they chose to believe, in the team, in themselves and took action. Their trust and courage allowed them to break through their limitations, and their determination turned their dreams into reality, step by step.

Success is not about the accumulation of wealth but the peace and fulfillment within you, knowing that you have done your best and given it your all. This feeling is far more valuable than any number. Opportunities will always belong to those who dare to believe and give their utmost effort. Let us continue moving forward together, building an even brighter future through our trust and actions. Believe in yourself, believe in the team, and in this opportunity-rich market, we will keep pushing boundaries and achieving greater success!

NAS COMMUNITY

Last week, the three major indices saw a modest recovery bounce following their oversold conditions. The Dow and S&P 500 successfully filled the upward gap from November 6, while the Nasdaq has yet to do so. This divergence in performance seems to suggest that the market's choppy adjustments are far from over.

NAS COMMUNITY

Slowing inflation data and strong earnings from financial companies have undoubtedly been the main drivers of the short-term rallies in both the bond and stock markets. Additionally, oversold conditions and weak market sentiment provided support for the rebound in the major indices. But how long can this rebound last? The prevailing cautious sentiment in the market doesn't seem to support excessive optimism.

Historically, the stock market tends to perform well in the months following a presidential inauguration. Trump's return to the White House could indeed bring some positive effects to the market. His protectionist agenda and tax cut proposals have the potential to boost market sentiment. However, this time might be different, after all, the three major indices are already at high levels, with risks far outweighing potential returns.

More importantly, there's no significant sign of large-scale buying from major institutions, indicating that the market remains in a wait-and-see mode. The future of the market may hinge on the performance of upcoming corporate earnings reports. If earnings fail to meet expectations, the market could face renewed downward pressure.

NAS COMMUNITY

Given the current complexity of the market and the risks associated with the stock market's high levels, I strongly recommend adopting a more prudent strategy: allocate only 10% of your funds to the stock market and shift 90% to the crypto market. Why take this approach? The answer is simple, crypto's high volatility and flexible trading mechanisms offer far more profit opportunities, making it significantly more attractive than the current stock market.

The crypto market's high certainty, combined with the powerful support of AlphaStream 5.0, has already opened the door to higher profits for us.

I've always emphasized: let go of small opportunities and focus on the big ones. Take last week's stock market rebound as an example, it gave the market some breathing room, but from a long-term perspective, it was merely a technical correction, providing no real growth momentum. In contrast, the crypto market's returns last week far outpaced those of the stock market, showcasing the significant difference that big opportunities can bring.

NAS COMMUNITY

Friends, on our investment journey, we must learn to make choices and focus on what truly matters. Missing out on small fluctuations or minor rebounds won't leave you with much regret. But hesitating and missing a major opportunity like the one in the crypto market, that would be the real loss.

Remember, true winners aren't those who chase every fluctuation but those who seize the most valuable opportunities. The next wave of opportunities in the crypto market is already calling to us, and with AlphaStream 5.0, we can more accurately capture every profit within market movements.

NAS COMMUNITY

In sharp contrast to the uncertainty of the stock market, Bitcoin is currently in a clear and strong upward trend. From a technical analysis perspective, the daily chart has successfully formed a bottom, and I've repeatedly emphasized that the \$90,000 level is an excellent opportunity to establish mid-term long positions. Now, with a golden cross appearing at the MACD bottom and the price stabilizing above the BBands middle line, the bullish upward trend has become even more pronounced.

Exciting news! The all-time high of \$108,000 has been successfully broken in the Asian session, and the crypto market has ushered in a remarkable volatility this week. With the return of the crypto president, this is undoubtedly a rare opportunity, and this week has become the best time for our "Battle of Kings" profit plan to work.

Every fluctuation in the market contains unlimited opportunities, and AlphaStream 5.0 is the most powerful tool in our hands. It can help us find the best entry point in every fluctuation of the market through precise analysis and intelligent strategies. Whether it is a big trend or a short-term fluctuation, we can firmly control it and maximize our profits.

NAS COMMUNITY

When I named the AlphaStream 5.0 Crypto Oscar (300-1000%) Profit Challenge "Battle of King," I wanted to convey not just the immense potential of the market but also my unwavering confidence in victory. This battle represents the most critical phase of the 'Millionaire Bootcamp' and is a rare opportunity that may never come again.

Friends, are you ready?

For profit targets of 300%, 600%, or even 1000%, I've always believed these are just the starting points, not the final destination. The true destination is when our investments not only deliver sustained wealth growth but also fill us with confidence and pride in every decision we make.

AI 5.0

NAS COMMUNITY

How can we ensure that every partner achieves their goals?

This is precisely the purpose of the Wealth Matrix.

We divide our funds into three parts:

- 1. 10% allocated to stock market positions: Preserving the potential of traditional markets.**
- 2. Funds dedicated to the Battle of King: Fully capturing the high-volatility opportunities in the crypto market.**

Through scientific fund management and strong execution, we can steadily achieve total asset returns of +300%, +600%, or even +1000%. Do not doubt, this is not only possible, it is destined to happen. By giving our all in this Battle of King, we will not only achieve our goals but also turn our beliefs into reality.

Some of you may not yet fully grasp the immense power of steady compounding. Let me illustrate with real data since the launch of this profit plan: currently, the total asset return rates for VIP1, VIP2, and VIP3 partners have reached +70.37%, +194.58%, and +441.94%, respectively. These figures, even as conservative estimates, have already far outpaced stock market returns. More importantly, these profits were not achieved by luck but through stable strategies and precise execution.

NAS COMMUNITY

Investing is never a gamble; it requires the right persistence and strategic patience. Often, half of confidence comes from patience. When you look back at yourself in the future, you will deeply appreciate the times when you held firm. It is through this patience and confidence that we can move steadily in the market, achieve consistent returns, and ultimately reach our wealth goals.

As Einstein once said:

“Compound interest is the eighth wonder of the world. He who understands it, earns it; he who doesn’t, pays it.”

The power of compounding comes from our respect for time and our ability to seize opportunities. Every small accumulation today will manifest as exponential growth in the future. This is not a get-rich-quick magic trick but a journey that requires our wisdom and persistence to participate in.

At the current growth rate, we are fully confident in achieving our set profit target by the beginning of next month. Even factoring in the portion of profits we’ve allocated to financial products, with just a little extra effort, we can still easily meet our goal. This is the best demonstration of the power of compounding and a testament to our team’s commitment to scientific fund management and prudent investment strategies.

NAS COMMUNITY

Once our foundational goals are achieved, I will officially shift focus to the launch and promotion of AlphaStream 5.0, including preparations for a global release event and the establishment of a community charity fund. These plans represent significant milestones as we move to a higher stage. What excites me even more is the prospect of everyone, after achieving their profit targets, actively participating in the charity fund donation activities and continuing to support our exceptional AlphaStream 5.0 system.

I want to especially remind everyone: some members are still trailing behind the average returns, and a few have yet to join as VIP partners. Ensuring that every member achieves their goals is our most important task today. To those who are behind in returns, let me tell you this: you're lucky!

Right now, you have a once-in-a-lifetime opportunity to catch up, this week, the Crypto President is making his return! This is not just an ordinary market event; it will trigger a brand-new wave of major market volatility, bringing us unprecedented investment opportunities.

NAS COMMUNITY

No matter what your past returns have been, this wave of market activity will be your best chance to break records and achieve breakthroughs. We must seize it with both hands!

With its intelligent analysis and precise strategies, every participant's return rate will see a significant boost. We have proven its power time and time again in previous profit plans, and this time, with the robust support of AlphaStream 5.0, we will once again help every investor achieve substantial returns during this major market movement.

When facing resistance, have the courage to stand by your choices. I understand that many of you have encountered obstacles from traditional financial institutions such as banks and brokers while investing in crypto. These barriers might leave you feeling uncertain, but remember: no one has the right to stop you from investing your own funds in the projects you believe in. The path to success is never smooth, it is always filled with challenges and obstacles. Only those who dare to overcome difficulties can ultimately reach the shores of victory.

NAS COMMUNITY

The skepticism and resistance from banks and traditional financial institutions toward crypto investments highlight the disruptive potential of this market. It is precisely during these moments of resistance that we find opportunities to transform our futures. Stay firm in your beliefs, and don't let others' opinions shake your resolve. The crypto market's potential is limitless, and success always belongs to those who dare to persevere.

As you prepare your funds, an exceptional opportunity has quietly emerged. The trading center's 6th-anniversary deposit promotion is set to be a powerful booster for your investment journey. Opportunities like this are not only rare but are tailored to support every investor striving for excellence. This promotion offers various deposit rewards, enabling you to secure more investment funds at a lower cost, significantly enhancing your investment capacity and providing a solid foundation for success in the highly competitive market.

NAS COMMUNITY

This is not just an ordinary promotion but a critical opportunity to help every participant take a significant step forward on their investment journey. Use this chance to fully prepare your funds, ensuring that you can seize every market opportunity and maximize your profits. The market is ever-changing, but opportunities always belong to those who are prepared. This is the moment we need, opportunities are fleeting, and your actions will determine the level of success you achieve.

I need you to bring courage and wisdom and actively participate in this event. This promotion will provide you with strong support and assurance for your upcoming investment journey. Every decision you make will lay a stronger foundation for your future. In this pivotal moment, stay focused and determined, not just for profits, but for your family's happiness, a higher quality of life, the pursuit of freedom, and the realization of your dreams.

Friends, the future is right in front of us, and the opportunity is here and now. Let's join hands, face this challenge with unwavering determination and action, and step together into an even brighter future! This is your moment, take action now!
