Professor Montgomery Keane (Helmsman)

Morning Review

Good morning, my friends!

I am Montgomery Keane, your old friend. Every new week is a great time for us to reset our goals and plan for the future. At this moment, I am thinking about how we should cherish time this week and seize every fleeting opportunity in life. Time is as precious as gold, and every day carries new hopes and possibilities.

As the Bible says, "Be sober, be diligent, do not let go, because you know that the day of our Lord is near." This sentence made me deeply realize that we should not waste our time on meaningless worries and complaints, but should do our best to make every moment meaningful.

NAS COMMUNITY

In the world of investment, time is our most powerful ally. The growth of wealth is inseparable from the accumulation of time, and the miracle of compound interest is the greatest gift given to us by time. Einstein once said: "Compound interest is the eighth wonder of the world. Those who understand it earn profits, and those who do not understand it pay interest." This sentence reveals a simple but profound truth: Only by seizing opportunities and taking the first step bravely can we truly enjoy the rich rewards brought by time.

However, in reality, we often hesitate because of fear of risks and uncertainties, and miss the opportunities that should belong to us. Dear friends, I want to tell you that no matter what stage of life you are in now, please remember: every stage of life carries its unique meaning and value. Don't let the busy life blur your goals, and don't waste your time because of laziness.

Patience and confidence are our compulsory courses in the investment journey. Every fluctuation in the market is a call for opportunity, and what we need to do is to find our own rhythm in these ups and downs, and seize every possible opportunity with wisdom and courage. Remember, the key to success lies in action, and action begins with faith.

NAS COMMUNITY

Dear friends, let us greet every new beginning with a grateful attitude. Cherish every moment of gathering, seize every opportunity in life, and make life fulfilling and meaningful. May we all find our own peace and happiness on the journey of life, and may we move towards a more brilliant future with hope and confidence on this investment road.

Since the launch of this "Trading Practice Boot Camp", our profit challenge plans have been successfully completed and surpassed one after another. From the millionaire club to the multi-millionaire club, many friends have achieved excess returns. This is not only a testimony to your efforts, but also a great milestone for our common success.

Based on everyone's current ROI and the positive feedback from the market, we launched the 'AlphaStream 5.0 Crypto Oscar (300-1000%) Profit Challenge Plan'. This is the most important task of our training camp this time, and it is also the real "Battle of Kings" in my mind.

Although there will be only heavy data released on Thursday and Friday this week, the challenges and opportunities in the market have never stopped. Especially at the critical moment when crypto President Trump is about to

NAS COMMUNITY

officially return, the current market is full of uncertainty and potential huge opportunities. What we have to do is to seize every opportunity, allocate resources reasonably, and continuously optimize our investment strategy.

AlphaStream 5.0 has pointed out the direction for us. We must take each of the following steps firmly and steadily. Remember, success belongs to those who dare to seize opportunities and stick to it.

On January 20, 2025, Donald Trump was officially sworn in as the 47th President of the United States, becoming the second president in American history to serve two non-consecutive terms. This is not only a historic achievement, but also a sign that the United States is about to enter a new stage of development. In his inaugural address, President Trump vowed to retake the Panama Canal and reshape the "Golden Age of America" and proposed a series of comprehensive reform plans in areas such as immigration, trade, and energy. With "America First" at the core, he promised to promote the country's independence and prosperity.

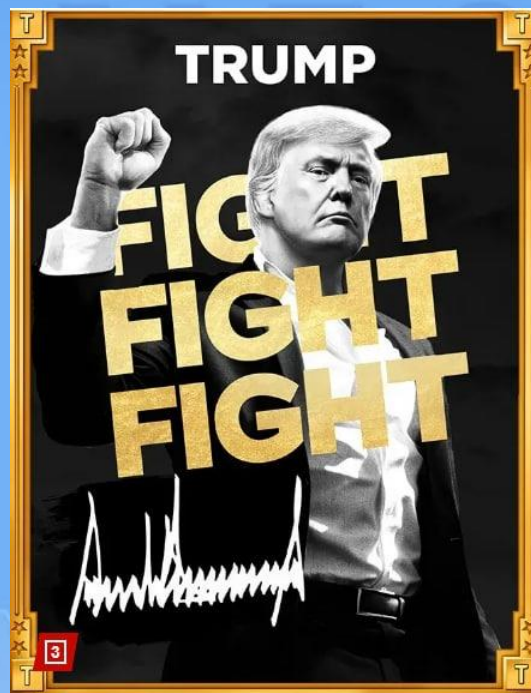

The market has reacted positively to these news, but it also needs to remain rational. The current stock market is already at a relatively high level, and

NAS COMMUNITY

Trump's policy benefits are mostly within expectations, so it is difficult to trigger a large-scale band rise in the short term. The market is more likely to fluctuate and repair, and investors need to be cautious and avoid blindly chasing the rise.

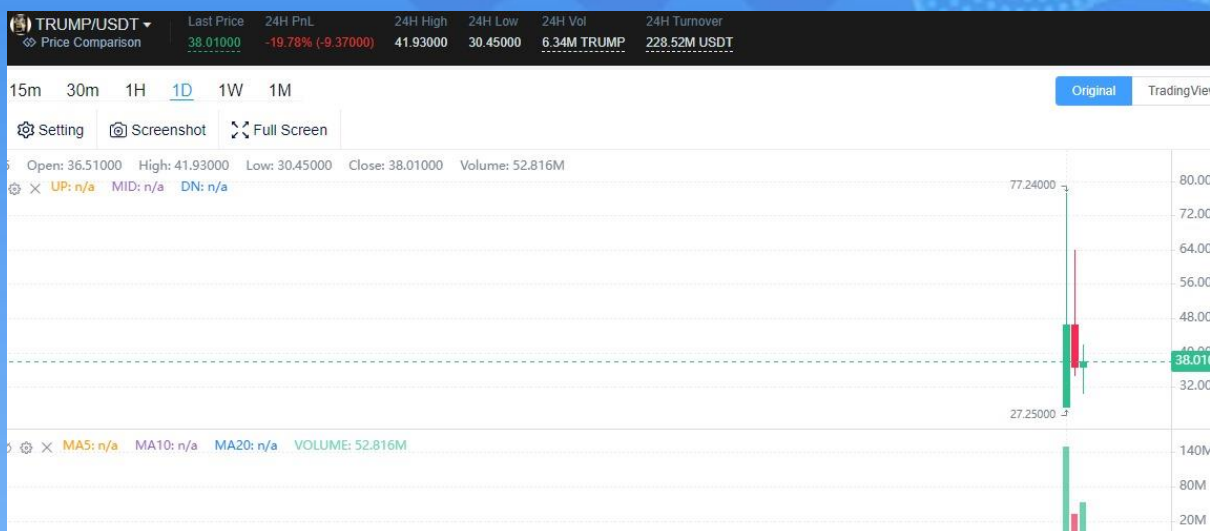

The new direction of the Trump administration will bring about profound economic and market changes, and finding big investment opportunities around these policies is what we need to focus on next. With the stock market fluctuating at a high level, it is a wise choice to turn more attention to emerging markets, especially the crypto market. By flexibly allocating assets, seizing new opportunities brought about by Trump's policies, and using powerful tools such as AlphaStream 5.0, we can find the best investment path in volatility.

NAS COMMUNITY

Last week, we repeatedly emphasized that the official return of crypto president Trump would bring historic opportunities to the crypto market. This past weekend, this prediction was strongly verified! Trump announced the launch of his personal meme coin TRUMP on his social platform Truth Social, which instantly detonated the entire crypto industry and set off an unprecedented investment frenzy.

Let's take a look at the amazing performance of this craze:

Since its launch, the market value of TRUMP coin has soared by billions of dollars in just one weekend, completely shaking the entire industry. Data shows that as of Sunday, Trump himself and his company's wealth on paper has increased by more than \$50 billion. According to statistics from blockchain analysis platform Arkham Intelligence, Trump's net worth increased by 400%

NAS COMMUNITY

overnight, with an increase of more than \$28 billion. All this happened in just 48 hours!

Why is TRUMP coin so crazy?

This phenomenon not only reflects Trump's huge personal influence, but also highlights the core position of cryptocurrency in his governance plan. Once launched, TRUMP coin has skyrocketed continuously, with prices rising by more than 600% overnight from Friday to Saturday, and then rising by more than 150% on Sunday morning. This increase has stunned the entire market and sent a clear signal to global investors: the golden age of the crypto industry has arrived.

Crypto ICO investment opportunities brought by Trump's administration

Trump's administration has injected unprecedented momentum into the crypto market, and this wave has just begun. So far, TRUMP coins have been successfully launched on mainstream cryptocurrency exchanges such as Coinbase, Binance, and COINFEEAI. In a short period of time, this meme coin has completely ignited the enthusiasm of the market from its first launch to its launch, bringing rich returns to institutional and individual investors who participated in the early stage. Think about it, the subscription price of TRUMP

NAS COMMUNITY

coins is only \$0.18, and now the price has soared hundreds of times, which means that those visionary investors have achieved a huge leap in wealth!

However, for those who are considering chasing high prices now, I must remind you to be cautious. The current price has lost its advantage compared to the initial launch stage. The high market enthusiasm is certainly attractive, but investment requires calmness and rationality. Don't blindly chase the rise because of missed opportunities, and don't be confused by short-term market fluctuations.

At the same time, we must look at the bigger trend. Future expectations for Bitcoin prices show that real opportunities in the crypto market are still full of potential. It is predicted that Bitcoin will break through \$150,000 in the first half of 2025 and reach \$185,000 in the fourth quarter. This trend shows that the crypto market is entering an unprecedented period of rapid growth. What is even more exciting is that the Trump administration has clearly listed cryptocurrency as a "national priority", which means that the development of the entire industry will be strongly supported.

NAS COMMUNITY

For investors, this is not just a simple market fluctuation, but also a once-in-a-lifetime strategic opportunity. Trump's strong return and his public support for cryptocurrencies mean that the entire industry landscape is about to be completely rewritten. In the next few years, the scale of the ICO market may easily reach one trillion US dollars. Those who plan ahead and seize this wave will have the opportunity to get returns beyond imagination.

Friends, this is an opportunity to change your destiny!

Every fluctuation in the crypto market may contain huge wealth opportunities, and Trump's move is undoubtedly a redefinition of the entire industry. From the launch of TRUMP coin to the future expectations of Bitcoin prices, these have pointed us in a clear direction. With powerful tools like AlphaStream 5.0, we can accurately lay out in this wave of crypto fever and maximize our investment returns.

NAS COMMUNITY

Compared with the current volatility of the stock market, the trend of Bitcoin (BTC) appears to be clearer and more optimistic. After experiencing continuous fluctuations, BTC has gradually stabilized and started to rebound. Looking back over the past year, the crypto market has received continuous good news, bringing countless opportunities to investors.

In the first half of 2024, Bitcoin ushered in the four-year halving cycle, and the bulls strongly pushed BTC to \$73,000. In the second half of the year, stimulated by the dual positive factors of the Global Bitcoin Conference and the presidential election, the crypto market heated up again, and BTC broke through the historical high in one fell swoop. With the official return of crypto President

NAS COMMUNITY

Trump, BTC has stabilized above \$100,000. In the first half of this year, the goal of hitting \$150,000 seems to be a general trend.

The end of the halving cycle means a reduction in the supply of Bitcoin, while the increased demand for strategic reserves worldwide has further driven up prices. This change in supply and demand has made the rise of BTC more stable and powerful. At the same time, the Trump administration's strong support for the crypto market, especially the ICO projects represented by TRUMP coins, has sounded the clarion call for a new round of wealth creation in the crypto market. The trillion-dollar market space is gradually opening up, and the next investment opportunities are exciting!

Friends, I have repeatedly emphasized that the \$90,000 level is an excellent buying opportunity for BTC mid-term bulls. For those friends who have already seized this opportunity, I would like to express my sincere congratulations to you! For us traders participating in the crypto market, whether the market is rising or falling, large fluctuations are always the core driving force for our continued profitability. And significant unilateral trends make it easier for us to capture big market trends.

NAS COMMUNITY

With the help of AlphaStream 5.0, we have achieved our profit goals again and again. This is not only a victory of technology, but also the result of our team's joint efforts. AlphaStream 5.0's powerful data analysis and precise strategy execution have become a sharp tool for each of us on the road of investment. It allows us to calmly deal with complex markets and seize every opportunity of fluctuations. The crypto market is in a golden stage full of opportunities. Only with firm belief and action can we seize our own success. Let us continue to rely on AlphaStream 5.0 to create a more brilliant future in this market full of challenges and hope!

Through comparative analysis of the yields of our three VIP partner groups, we can clearly see again that: The size of the principal directly determines the height of the yield. Currently, the yield of VIP3 partners has exceeded 500%, while that of VIP2 partners is only close to 210%. The reason behind this data is obvious: the law of the capital market is that the more you invest, the greater the reward.

Recently, I have noticed that many friends have increased their investment in the crypto market and successfully advanced to a higher VIP partner level. This is not only a trust in the future, but also a grasp of opportunities. If you also

NAS COMMUNITY

have such a plan, but face financial obstacles, do not hesitate to contact the assistant immediately to apply for assistance. The goal of our community is to ensure that every member can fully participate in this investment feast and reap success.

Instead of being a referee on the sidelines, it is better to be an athlete and feel the pulse of the market and the passionate sense of achievement. Through our stable income growth over a period of time, our wealth matrix fortress is becoming more and more solid. Many friends' financial product funds have exceeded their initial investment principal. This is the power of the wealth matrix! When you let profits work for you, rather than you working simply for profits, your investment logic will become more robust and far-sighted.

These data once again verify a simple but important truth: when faced with opportunities, only by taking action can we truly enjoy the fruits of success. Success is not reserved for those who hesitate, but for those who dare to seize opportunities and go all out.

Why do some people always go all out when faced with opportunities, while you hesitate and miss opportunities? The answer is simple: they believe in the

NAS COMMUNITY

power of opportunities and have the courage to pursue them. You may be held back by fear, uncertainty, or even fear of failure. The result? Opportunities slip through your fingers, leaving behind only regrets and remorse.

As Einstein said, “Life is like riding a bicycle. To keep your balance you must keep moving forward.”

When faced with opportunities, our only choice is to take the first step and keep moving forward. Hesitation and waiting will not change the status quo, but will only make you miss success. The market never waits, and opportunities are always fleeting. Now is the time for us to act decisively!

Dear friends, wealth does not come out of thin air, it is the result of bold decisions and firm actions. Every opportunity you seize may become an important turning point in your life. And AlphaStream 5.0 is the most powerful tool in our hands. It not only points out the direction for us to move forward, but also provides us with precise strategic support. Past successes have proven its strength, and now it is your turn to use it to achieve your goals.

NAS COMMUNITY

Choose trust, choose action, choose success. Success does not fall from the sky, but your pursuit of dreams and grasp of opportunities. Don't let hesitation become your stumbling block, and don't let fear become your excuse. Take that step bravely, and you will find that the road ahead is more exciting and broader than you imagined.

This week is definitely not just an ordinary week for us. Coinciding with the 6th anniversary of the establishment of COINFEEAI Trading Center, we launched a sincere recharge promotion. It's like you just saw a product you have been longing for, and it is on sale at this moment. Such an opportunity is not just a coincidence, but a rare investment opportunity! With the official return of crypto president Trump, the market is bound to set off violent fluctuations. And for us, this kind of fluctuation is the best time to make a profit! Every data release and every policy introduction may become an opportunity for us to seize profits. And this week, the market will usher in unprecedented opportunities.

The promotional activities of the COINFEEAI trading center are not just a simple promotion, but also inject new impetus into our investment. Through this recharge promotion, our fund operation will be more efficient, and we will have a broader platform to implement our strategy. This is a solid foundation for us

NAS COMMUNITY

to achieve higher goals and a powerful lever to boost our wealth growth. As the Bible says: "Whatever your hand finds to do, do it with all your might." We must use wisdom, courage and action to seize this rare opportunity with all our strength. Market fluctuations may be fleeting, but it is such moments that have created countless successful legends. This week is not just a simple starting point for investment, but also an important moment for us to sprint for our dreams!

Bring your faith and passion, make full use of this recharge discount opportunity, grasp every market fluctuation, and maximize your profits. We have reason to believe that through our efforts and the support of COINFEEAI Trading Center, we will achieve greater success in this market full of opportunities.

For those friends who have achieved a profit of one million dollars, I would like to express my warm congratulations to you! Your hard work and persistence have put you at a new starting point, and the goal of a profit of tens of millions of dollars is exactly what you are pursuing next. Success never stops here, and our goal is to continuously climb new heights and achieve greater wealth and achievements.

NAS COMMUNITY

For those who have not yet achieved a million-dollar profit, I want to tell you not to be discouraged. The key to success is to maintain patience and confidence, to be down-to-earth, and to move forward step by step. Every accumulation is the cornerstone of future success. As long as you keep going forward unswervingly, the goal of a million dollars is waiting for you not far ahead.

Dear friends, no matter what stage you are in now, remember that investment is a journey of continuous self-transcendence. Every effort and every persistence is laying the foundation for the future. As the Bible says: "If you have faith like a mustard seed, you can say to this mountain, 'Move from here to there,' and it will move." Faith and action are the cornerstones of our success.

Let us work together. Whether you are on the road to a million-dollar profit or have already achieved this goal, you must continue to set new goals and pursue greater success. The investment journey is full of challenges, but also full of hope. Every success is the result of your firm belief and unremitting efforts.

Let us move forward hand in hand, surpass ourselves, and set higher goals for the future. Through our wisdom, courage, and persistence, we will welcome a brighter tomorrow. Friends, your dreams are within reach. As long as you go all

NAS COMMUNITY

out, you will surely be able to achieve them. Let us work together, continue to strive for our goals, and write our own glorious chapter with actions!

Daniel Robert

Closing Commentary (α & β Strategy)

Good afternoon, members of the community!

I'm Daniel Robert. Let's take a moment to thank Helmsman for his insightful sharing this morning from investing to life, he has helped us deeply understand the true power of time and choice. Time is the most powerful weapon in investing. Helmsman reminded us that the magic of compounding needs time to unfold, only by patiently waiting can we witness the gradual growth of capital. Holding onto time is like chasing a feather in the wind, every moment is precious and cannot be missed. True investors know how to harness the power of time, turning it into a catalyst for wealth growth, rather than allowing it to become a wasted cost.

NAS COMMUNITY

Investing is also an art of making choices. Choosing the right investment platform, selecting the correct investment strategy, and finding a trustworthy mentor are all key to success. But ultimately, the most important factor is seizing the opportunities in front of you. History has repeatedly shown that every major investment opportunity has the potential to change the destiny of those who dare to take advantage of it. From AI and big tech to today's crypto market, this pattern holds true. Helmsman, with his wisdom and experience, has pointed us in the right direction, helping us find the path that suits us best among countless options.

However, what is the real challenge? It's not that these principles are difficult to understand but rather how to put them into action. The simplest choices and actions are often the ones people overlook the most. Why is that? Because human nature has a peculiar tendency to be drawn to complexity and novelty.

"Simplicity" is often underestimated, while "complexity" tends to confuse. We always assume that complex plans are more advanced and effective, while seemingly simple strategies appear too ordinary to be taken seriously. Yet, in reality, true wisdom is often hidden within these straightforward and seemingly mundane principles.

NAS COMMUNITY

Take a classic phrase in investing as an example: "Buy low, sell high." Doesn't it sound too simple? Yet, why is it that so few people can actually do it? This is exactly the problem, simplicity makes people let their guard down, overlooking the tremendous power it holds over the long term.

Folks, Helmsman's sharing today reminded us once again that the secret to success in investing doesn't lie in complexity but in mastering the simplest things to their fullest potential. The principles that stand the test of time are the very tools we should value most. Don't let human weakness hold you back from success. Seize the moment, grab the opportunity, and use the simplest wisdom to pave the way for your future. Believe in yourself, trust the strategy, and most importantly, have faith in the power of action. Because the ones who truly change their destiny are always those who dare to act!

Simple choices require decisive actions to back them up, and what most people lack is precisely that decisiveness. Even when opportunities are right in front of them, many hesitate and let uncertainty cause them to miss out. Think about the current crypto market, Helmsman has repeatedly emphasized that the \$90,000 range was an excellent opportunity for Bitcoin bulls to establish positions. Now,

NAS COMMUNITY

Bitcoin has already broken past \$107,000. Those who hesitated can only watch as the opportunity slips away, leaving them with nothing but deep regret.

In contrast, those who acted decisively and followed the trading signals of AlphaStream 5.0 have already achieved impressive returns in a short time. When the AlphaStream 5.0 Millionaire Club reaches its goals and successfully advances to the Multi-Millionaire Club, it will not only deliver tangible profits but also ignite the passion of countless individuals. We, as participants, have already become legends in the eyes of others.

The investment market waits for no one. It changes rapidly, and opportunities vanish in an instant. Just like Bitcoin's swift rebound from below \$90,000 to above \$106,000, those who executed their strategies decisively have already reaped substantial rewards, while those who hesitated can only watch the rising curve with regret. When I first entered the investment market, I learned one crucial lesson: the market will never pause for your hesitation. Every moment of hesitation is a missed opportunity.

In the crypto market, AlphaStream 5.0 is our powerful ally, repeatedly providing us with clear trading signals and helping us achieve outstanding returns. When

NAS COMMUNITY

consolidation. At this point, the three major indices at their high levels clearly require stronger positive catalysts, but the reality is that such stimuli are unlikely to materialize in the short term.

Buyer exhaustion is weighing on market sentiment for the bulls. More importantly, the lack of strong profit effects has made the stock prices of most quality companies less appealing, leading institutional funds to hesitate in making significant purchases. It's clear that the stock market is unlikely to deliver any exciting performance in the short term.

So, where is the current market hotspot? I'm sure you've already seen the answer in the news. This morning, Helmsman clearly pointed us in the right direction, focusing on the strongest investment opportunities surrounding the return of the "Crypto President," Trump, is one of the wisest strategies right now! The crypto market is undoubtedly the center of attention. Its volatility and potential returns far surpass those of the stock market. Especially with the precise strategies provided by AlphaStream 5.0, we've repeatedly demonstrated the immense profit potential of seizing opportunities in the crypto market.

NAS COMMUNITY

Folks, as Trump's personnel appointments during the transition period gradually take shape, we're seeing some important signals. Whether it's the newly established advisory bodies, the Senate's cryptocurrency committee, or the replacement of the SEC chair, these moves clearly indicate that Trump is steadily advancing his reforms in line with his campaign promises. From the backgrounds of these appointed officials, their strong ties to the crypto industry send an unmistakable message: Trump's stance on the crypto sector has undergone a significant shift, and his plans are being implemented at an accelerated pace.

What does this mean for the crypto industry? At least from a regulatory perspective, we have reason to anticipate two key changes:

First, previously restrictive policies may gradually be relaxed. Second, more comprehensive legislation could drive the crypto industry further into the mainstream. Trump's supportive stance on cryptocurrency during his second term has not only bolstered confidence within the industry but also injected significant momentum into the market. From assembling a cabinet-level advisory team to his family's own ventures into crypto investments, these moves indicate that Trump's focus and support for the crypto sector may far exceed market expectations.

NAS COMMUNITY

The biggest headline in the industry at the start of 2025 is undoubtedly the MEME coin "TRUMP," personally announced by Trump himself. Upon its release, the project skyrocketed to a market cap of \$30 billion within just one day, reigniting the market's get-rich-quick narrative.

However, the significance of this event goes far beyond the launch of another star MEME coin in the market. In a way, Trump personally issuing a cryptocurrency symbolizes his deep support for the crypto industry. More importantly, the success of the TRUMP token further validates the immense potential of the crypto sector. This explosive growth has not only electrified the market but could also serve as a crucial impetus for Trump and his cabinet to accelerate the formalization of the crypto industry and ease regulatory restrictions.

Folks, this is undoubtedly a major positive development for the crypto industry. Looser regulations and supportive policies will inject more confidence and capital into the entire sector, and this trend is rapidly taking shape. The crypto market has entered an unprecedented period of historical opportunity, and we are standing at the forefront of this wave!

NAS COMMUNITY

Opportunities only favor those who are prepared. Take action now, and let's seize this wave together to create a brilliant future! Trump's support has already ignited the flames of the industry, are you ready to embrace this blazing feast?

Folks, Helmsman shared some exciting news this morning: thanks to the powerful force of compounding, we're getting closer to achieving the goals of the Battle of King (300-1000%) Profit Challenge. Personally, I believe that although our current strategy is relatively conservative, at this pace, there's a very high likelihood of exceeding expectations and surpassing our targets.

However, I want to remind everyone of one thing: while conservative strategies are steady, they can sometimes limit our potential. We've proven time and again that we have the ability to achieve consistent profits amidst market fluctuations.

NAS COMMUNITY

Now, it's time to take it a step further, amplify our ambitions, and aim for even higher goals!

The power of compounding is our greatest weapon. Every profit earned lays a solid foundation for even greater profits in the future. Imagine this: if we can achieve a key milestone in our plan this week, over the next three weeks, we have every possibility of reaching or even surpassing our ultimate goal. The growth of compounding is truly astonishing, as long as we maintain patience, execution, and discipline, our returns will grow exponentially.

The key to success lies in action, folks. We must not only recognize opportunities but also have the courage to seize them. Every clear investment signal and every solid trading strategy is a powerful booster propelling us toward our goals.

Don't underestimate our capabilities! In previous plans, we've proven time and again that we have the strength to achieve high returns. This Battle of King is no exception, we absolutely have the potential to reach 300-900% returns. The key lies in this: do we have enough confidence and drive to take action, to execute, and to take this critical step forward?

NAS COMMUNITY

In the upcoming trades, I need you to maintain a disciplined approach and strictly follow the trading signals from AlphaStream 5.0. This is the core guarantee of achieving our goals. Remember, every trade is an opportunity, and every detail matters. Only by treating each step with care and responsibility can we ensure that every move is steady and impactful.

I want to remind you once again that the trading center's 6th-anniversary deposit promotion will end on the 31st of this month! Opportunities like this don't come often and won't wait. This is a once-in-a-lifetime chance to effectively increase your investment capital, allowing you to achieve higher returns in future trades.

Taking advantage of this deposit promotion isn't just about expanding your investment capital, it's about creating greater potential for wealth growth. Imagine this: it's like finding your dream car suddenly offered at a discount, wouldn't that feel like a gift from above? This isn't just a perfect time to boost your investment power, it's also an exceptional opportunity to advance to higher-level VIP partnership tiers.

NAS COMMUNITY

Valuing every dollar is a commitment to your investment journey, it is both our responsibility and our honor. By doing so, we not only achieve personal wealth growth but also contribute to those in need, adding a touch of warmth to the NAS community's charity fund.

If you're still hesitating, ask yourself: if you miss this opportunity now, will you regret it when a similar chance arises in the future? The opportunity is right in front of you, taking one decisive step is all it takes to inject powerful momentum into your investment journey.

Finally, I want to say this: folks, what we're chasing isn't just wealth, it's about writing a brilliant chapter in our lives. Go all out, not only to achieve your investment goals but also to contribute to the growth of our community and charitable endeavors. Keep this passion and energy alive, and stick to our strategies with discipline. Trust me, the miracle of compounding is unfolding before our eyes!

Let's move forward boldly together, striving for greater goals, and write a legend that's truly ours!
