Professor Montgomery Keane (Helmsman)

Weekly Review: U.S. Stocks Consolidate at High Levels, Crypto Market's Quality ICOs Ignite Trillion-Dollar Investment Opportunities

Good afternoon, my friends!

I'm Montgomery Keane, your old friend. On this peaceful weekend, the sunlight is streaming through the window, filling the room with a warm atmosphere. Sitting at my desk, reflecting on the little moments of the week, my thoughts become especially clear.

This week, we've experienced the ups and downs of the market together and achieved some rewarding results. In this moment of peace, I'm not only reflecting on the market trends but also feeling the warmth and strength of family. Every time I gather with my family, that happiness and tranquility remind me more clearly that investing is not just about accumulating wealth, but about creating a beautiful life that we can share with those we love. Family

NAS COMMUNITY

is the harbor for the soul, the place where we find balance amidst the market's fluctuations. And this sense of balance gives me clearer goals to lead the COINFEEAI community and help each friend achieve their dreams.

Our shared NAS community is not just a platform to help everyone grow their wealth, but a home where we find inner peace and fulfillment. The growth and success of each member fill me with immense pride. Behind all of this, I deeply realize that the true meaning of wealth is not just the accumulation of numbers, but a responsibility, a power that can change destinies.

Looking back on my investment career, I've faced countless ups and downs, and each success has made me more certain of the true meaning of wealth. Wealth is not just a tool for achieving personal freedom, but also an opportunity to give back to society and help others. Through charity, we can take real action to improve the world and assist those in need.

NAS COMMUNITY

Dear friends, charity is not just about giving money, it's a way of life, a spiritual elevation. Every act of kindness can ignite a spark of hope in someone else's life. As the Bible says, "Do unto others as you would have them do unto you." This verse has always stayed with me. Through the efforts of the NAS community, our 'Practical Trading Bootcamp' has not only helped everyone improve their trading skills and practical abilities, but also aims to cultivate the spirit of charity in all of you.

For every friend who succeeds here, I hope you can understand the meaning behind that success. As we continue to accumulate wealth in the market, we also have a responsibility to ensure that this wealth creates greater social value. Just think, your small act of kindness could change someone else's fate and give them a glimpse of hope for life.

I also understand that some of you may be facing difficulties. It could be due to market fluctuations or personal setbacks, but no matter the reason, I hope that through our efforts and support, we can help you overcome these challenges and achieve your dreams. The mission of the NAS community is not only to help everyone gain returns from investing but also to provide peace and strength to your soul.

NAS COMMUNITY

Friends, charity is a warm path that makes our lives more fulfilling. By helping others, we can also find inner satisfaction and peace. No matter how much you have right now, as long as you are willing to lend a hand, you can change someone's fate. Let's use the power of wealth to help more people in need and make the world a better place through our efforts.

I want to thank every friend in the NAS community. It is your trust and support that have brought us together to this point. This weekend, I hope you can spend quality time with your family, and also take the time to reflect on the meaning of life in peace, gathering strength for next week's investment journey. Let's take action, using our wealth and kindness to make the world warmer and more hopeful. May each of you find true happiness and fulfillment on this path of charity.

Over the past week, the three major U.S. stock indices may appear to be holding steady at high levels, but in reality, hidden risks are quietly accumulating. The upward momentum of many individual stocks has clearly weakened, and the profit effects are gradually fading. Particularly in the tech sector, some companies that have been running at high levels are already showing signs of fatigue. The current stock market is more like a "silent

NAS COMMUNITY

game", while it seems calm on the surface, there are undercurrents stirring, and the pressure for a correction is gradually increasing.

As I've repeatedly emphasized, risks are built up during the rise, while opportunities arise during the decline. Many retail investors, lulled by the apparent stability, are easily losing their sense of risk, which is undoubtedly a dangerous signal. In the stock market, continuous profitability is not complicated: buy quality companies at reasonable prices, be a friend of time, and trust in the power of time. However, now many quality companies' stock prices have already deviated from value, and with the three major indices at absolute highs, the bullish momentum in the market is weakening. I believe your account's profit and loss records are quietly revealing the true state of the market.

In this market environment, I want to remind everyone once again that this is the key moment to reassess your investment strategy. When the stock market is consolidating at high levels, profit potential is limited while risks are gradually increasing. For this reason, I have consistently advised everyone to keep 10% of their funds in the stock market and move 90% into the crypto market. Based on the current results, this strategy has proven to be incredibly

NAS COMMUNITY

correct! It not only helped us avoid the low returns and potential downside risks from the stock market's sideways movement, but also allowed us to seize the rare and significant opportunities in the crypto market.

Although the three major U.S. stock indices saw a slight rebound this week, they remain in a high-level consolidation phase, and the actual profit feedback from the market is not optimistic. The current environment demands a high level of skill for short-term trading, but frequent short-term trades are not the best way to achieve significant gains in the stock market. Even for institutional quantitative trading, while the success rate is high, the limitations imposed by trade sizes make it difficult to significantly increase returns. What truly leads to substantial capital growth is seizing a major market swing opportunity and steadily increasing the return rate, this is especially true for large capital operations.

In the face of the stock market's consolidation, rebounds, and downward corrections, we have adopted a more reasonable capital allocation strategy, helping the community's friends avoid potential risks. Meanwhile, our "Battle of Kings" 300%-900% profit plan is steadily progressing, continuously setting

NAS COMMUNITY

new profit records. As Daniel Robert said, smart investors know how to make every.

investment steadily bring in returns. And this is precisely the original intent behind building the wealth matrix: through scientific strategies and precise capital allocation, to achieve steady and lasting returns for every participant.

Whether it's the funds invested in the profit plan or the capital allocated to the 30-day financial products, these allocations are helping us build an unshakable wealth system. When the accumulated funds in the financial products exceed our initial principal, it not only proves the wisdom of our choices but also highlights the extraordinary power of compound growth.

By adhering to the belief in stable profits and compound growth, you will witness your capital grow at an exponential rate. Achieving total asset returns of +300%, +600%, or even +900% is not an unattainable dream, but a natural result of scientific capital management and sound strategies. This is not a fantasy, but a clear and achievable reality.

Currently, the total asset return rates for VIP1, VIP2, and VIP3 partners have reached +135.55%, +307.38%, and +729.45%, respectively. From these figures, it's clear that the return differences between different levels of VIP partners are significant, and this is a direct result of the differences in investment capital. The more capital invested, the greater the ability to withstand market fluctuations and enjoy higher returns, ultimately leading to rapid wealth growth.

NAS COMMUNITY

In the world of investing, the size of your principal determines your potential return. A larger capital investment not only amplifies the effects of compound growth but also allows you to seize more profit opportunities amid market fluctuations. This is why we encourage everyone to join higher-level VIP partnerships. Only by standing on a higher platform can you truly unlock your investment potential and achieve greater return goals.

The profit model of traditional stock markets primarily relies on going long, especially during significant upward swings, to significantly boost returns. This means that opportunities in the stock market are often limited and cyclical. The crypto market, on the other hand, is completely different. Its two-way trading mechanism allows us to find profit opportunities in both rising and falling markets. The 24/7 trading hours provide great flexibility and potential for short-term trading.

For this reason, short-term trading has become the core profit point in the crypto market. Here, AlphaStream 5.0's powerful trading signals provide us with precise decision-making support, making each trade more efficient and reliable. With this intelligent trading assistance, our profit goals have become much more attainable.

NAS COMMUNITY

Although our Battle of Kings profits are steadily increasing and getting closer to the set goals, I've noticed that some friends haven't been able to keep up with the trading strategy for various reasons. The solution to this issue is actually quite simple. All you need to do is wait until AlphaStream 5.0 is officially launched, purchase it, and then install it on your computer or phone. With its super signals and copy trading mode, you can achieve fully automated trade copying.

For contract trading, which requires "surfing" the market, it indeed demands that investors have a certain amount of time and energy to monitor market fluctuations and execute trades quickly. If you can't dedicate enough time, the wisest choice is to patiently wait for the launch of AlphaStream 5.0. Once you have this powerful tool, it will replace the cumbersome manual operations, helping you accurately capture market signals and easily execute intelligent trading operations.

NAS COMMUNITY

Compared to the stock market's high-level consolidation and sluggish returns, the performance of the crypto market is undoubtedly "stunning." Mainstream crypto assets, led by Bitcoin, remain firmly in a strong range, while another focal point of the crypto market, the ICO (Initial Coin Offering), has sparked a historic investment frenzy. Against the backdrop of Crypto President Trump's return, market enthusiasm has been completely ignited. High-quality ICO projects are being launched one after another, not only becoming hotspots for capital but also attracting the attention of both institutional and individual investors.

Let's take a look at some encouraging numbers: Last year's IEO project "DeFi Warriors" had an issue price of just \$0.05, and on its first day of trading, it surged to \$0.20, achieving a 300% return. Such a return is nearly unimaginable in traditional stock markets. And this year, TRUMP Coin, with a subscription price of \$0.18, skyrocketed by 450 times in just two days, shocking the entire crypto market and the global investor community. Such returns are not just a number; they represent a complete rewriting of wealth and destiny!

NAS COMMUNITY

Dear friends, did you know? The returns from a high-quality ICO project can be unimaginable. Just imagine, if you participated in the TRUMP Coin subscription, even investing \$100,000, the results just two days later could be enough to achieve financial freedom. This is not a coincidence, but a true reflection of the current crypto market. Now, high-quality ICO projects are emerging all over the world like mushrooms after rain, and the opportunities they hold are enough to excite every investor.

If you have \$5 million but don't have enough time to engage in contract trading, then a high-quality IEO is definitely an investment opportunity you shouldn't miss. Just like subscribing to new stocks in the stock market, an ICO is your chance to subscribe to high-quality projects in the crypto market. These subscriptions often yield several times, tens of times, or even hundreds of times in returns. However, such opportunities are rare and may only come around a few times a year.

This year, with the return of Crypto President Trump, the total investment in the ICO market is expected to surpass the trillion-dollar mark. This is not just a wave of wealth, but a historic opportunity. In this wave, we are facing not only digital growth, but a chance to change our destinies.

NAS COMMUNITY

Friends, opportunities are always for those who dare to take action and know how to seize them. If you're still waiting, think carefully: such opportunities may not come again. Whether it's a high-quality ICO or quantitative trading in the crypto market, seizing just one is enough to make a significant mark in your investment journey. And this trillion-dollar ICO wave is undoubtedly the next big opportunity that belongs to us.

Why are IEO projects so attractive? Because they bring unprecedented investment opportunities and open a whole new wealth window in the crypto market. Here are the unique charms of IEO projects:

1. Early Entry Opportunity

By participating in IEO subscriptions, investors can buy tokens at very low prices in the early stages of a project. When the project successfully launches and gains market recognition, token prices usually rise rapidly, providing investors with substantial returns. The TRUMP Coin case, which went from \$0.18 to a 450x increase in just two days, is a prime example of the historic returns that come from early entry.

NAS COMMUNITY

2. High Liquidity

Many IEO projects are immediately traded on major exchanges once launched, offering high liquidity to investors. You can cash out at any time, allowing for flexible operations without the need to wait for long-term lock-ups. This is particularly appealing to investors looking to realize quick profits.

3. Strong Market Demand

As blockchain technology continues to advance, more and more innovative projects are addressing real-world issues, such as decentralized finance (DeFi), NFTs, and smart contracts. These technologies not only drive the rise in token prices but also increase market demand for quality projects.

4. Backing from Technology and Partnerships

Many IEO projects are supported by top-tier technology teams and have deep collaborations with well-known blockchain platforms. This not only boosts the credibility of the project but significantly increases its chances of success. For example, "DeFi Warriors" surged from an initial price of \$0.05 to \$0.20 within a day, achieving a 300% return. This success stems not only from market enthusiasm but also from strong technological support.

NAS COMMUNITY

The Historic Opportunity of IEOs: Why You Must Seize It

The crypto market is currently in the midst of a historic opportunity. The return of Crypto President Trump has not only ignited market enthusiasm but also brought in massive capital inflows and supportive policies. The TRUMP Coin, with a subscription price of \$0.18, achieved a 450x return in just two days, setting a new record for global investment returns. This phenomenon is the core appeal of IEO projects, the ability to generate extraordinary returns for investors in a short period.

But as I've always emphasized, in the face of such tempting opportunities, we must maintain a clear mind. Before participating in any IEO project, we must conduct a thorough evaluation, including assessing the project's risk level, the reasonableness of its valuation, and the overall market outlook. This is the foundation for ensuring our investment success.

NAS COMMUNITY

The upcoming new IEO project from the COINFEEAI Trading Center has clearly caught the attention of countless investors. Based on my experience, this could very well be a highly promising investment opportunity, but we must approach it rationally and not blindly follow the hype out of excitement. I will be conducting in-depth research on this project in the coming days and will

bring you the latest updates and analysis to help each friend seize this potentially life-changing opportunity.

Dear friends, in the waves of the market, we need not only firm conviction but also precise judgment. The historic opportunity of IEOs has arrived, and this is an era-defining moment you cannot afford to miss. Whether it's through short-term contract trading to quickly increase returns or by subscribing to high-quality IEO projects for wealth acceleration, the future of the crypto market is full of limitless possibilities.

Let us use belief as our foundation and action as our sword, seizing every historic opportunity as we move together toward a brilliant tomorrow!
