**9:30 AM**

**Professor Montgomery Keane (Helmsman)**

**Morning Review**

**Good morning, team! I'm Montgomery Keane, your old friend. Today, I want to share with you a simple yet profoundly important principle: If you help enough people achieve their dreams, you'll get everything you want in life. This isn't just a belief I've lived by, it's been the key to my wealth and success.**

**True success isn't just about the numbers in your bank account. It's about how many lives you've changed and how many people you've helped improve their quality of life. That sense of fulfillment is far more valuable than any material wealth. Now, think about this, there are countless opportunities in the world, but why do only a few people truly seize them? The answer is simple: Most people find reasons to quit before they even start. But successful people? Their first instinct is always: "How can I make this happen?"**

**NAS COMMUNITY**

**If you truly want to do something, you'll find a way. If you don't, you'll find an excuse. This simple truth has awakened countless people. Every moment of hesitation and procrastination is just another step away from success. The people who reach the top aren't necessarily smarter, they simply have an unmatched willingness to find solutions instead of getting stuck in excuses.**

**Steve Jobs once said: "Everything around you was created by people who were no smarter than you. You can change it, you can influence it..." These words reinforced my belief that the true essence of investing isn't about waiting for opportunities, it's about creating them! Will you be a spectator, watching others build wealth? Or will you be the one taking control, shaping the game, and rewriting the rules?**

**Investing isn't just about money, it's a path to self-fulfillment, a tool to create impact, and a way to help others succeed. The Bible says: "Whatever your hand finds to do, do it with all your might." This isn't just a lesson in faith, it's a golden rule for success. Every investment, every trade is a test, a test of whether you're truly willing to give it your all and bold enough to change your own future.**

**NAS COMMUNITY**

**Life is short, and opportunities disappear in an instant. Don't wait until it's too late to regret not taking that step! Folks, the time to act is now! Stay committed, seize the opportunity, and let's step into our moment of greatness together!**

**Value creation is the only path to returns. Whether it's entrepreneurship, investing, or personal growth, true rewards only come when you create real value. This is not just a fundamental rule of society, it's the inevitable path to success.**

**In this session of the "Trading Bootcamp," we used the AlphaStream 5.0 system for the first time to help participants enhance their real-world trading skills. As of now, some have already achieved their initial targets, reaching million-dollar profits, while others are still pushing forward, striving for even greater success. This reaffirms my belief that we're doing something truly meaningful, not just achieving investment success, but cultivating a new generation of investors with long-term competitive strength!**

**But more importantly, our mission goes beyond wealth growth, we are here to give back with love! Our community isn't just a platform for investment and learning, it's a place where we spread love and hope. I hope every one of you**

**NAS COMMUNITY**

remembers our core belief, through our charity fund, we extend kindness and generosity to those who truly need it. As the Bible says: “It is more blessed to give than to receive.” Helping others doesn’t just change their lives, it gives us an immeasurable sense of fulfillment and purpose. That is the deepest meaning of true success!

Additionally, I have great news for everyone, our AlphaStream 5.0 system is about to officially launch! Many have already pre-ordered in advance, which is not only a recognition of the technology but also a validation of the hard work our entire team has put in. Your support is the driving force behind our progress! Whether it’s market expansion or technical optimization, every breakthrough is the result of our collective efforts, and every bit of support is the greatest encouragement to our team!

Dear friends, We are living in an era full of unprecedented opportunities, the key is whether you have the courage to seize them. Let’s move forward with wisdom and determination to create our own extraordinary future! Remember, success isn’t just about accumulating wealth, it’s about intellectual growth, expanding influence, and maximizing life’s true value. Now is the best time to take action!

**NAS COMMUNITY**

**Let's stand side by side, honor every bit of trust placed in us, seize every opportunity, and step boldly into our golden era together!**

**Yesterday's discussion was filled with insights and opportunities together, we explored the depths of investment wisdom, uncovered market potential, and analyzed the key elements of strategic positioning. Let me take you through a quick recap of the most critical takeaways, and more importantly, let's consider how to turn this knowledge into actionable steps.**

### **1. The GEBT Token IEO Journey: Unlocking Future Growth Potential**

**The GEBT project has not only showcased the rise of an emerging asset but, more importantly, provided us with a valuable learning opportunity. How do you evaluate a token's IEO? How do you assess its long-term value? The answers to these questions will directly determine whether you can secure an early advantage in the market.**

### **2. COINFEEAI Trading Center's Innovative Deposit Reward Program: A Strategic Move**

**NAS COMMUNITY**

In the crypto market, smart money always moves first. The new deposit reward program launched by COINFEEAI trading center is not just an innovative market initiative, but also a valuable opportunity window worth analyzing. Understanding its operating mechanism and evaluating its potential impact in relation to market sentiment will help us make more precise investment decisions.

### **3. This Week's Key Economic Data: Identifying +900% Contract Trading Opportunities**

Market volatility is often driven by the release of critical economic data. Right now, we are positioned at a high-potential inflection point. While I remain cautious about this week's stock index performance, this does not prevent us from capitalizing on high-return opportunities through precise strategies. So, what key factors should we focus on in our profit strategy?

### **4. COINFEEAI Trading Center's Latest Announcement: A Hidden Goldmine of Opportunities**

The market always rewards those who are prepared. The latest announcement from COINFEEAI Trading Center holds immense trading opportunities, but the real question is, are you ready to seize them?

**NAS COMMUNITY**

**The key takeaway here is:**

**Information is power, but execution is wealth. Staying informed about market developments is important, but without timely action, every opportunity will slip right through your fingers.**

**What's the Next Move?**

**Today's discussion will center around these key questions. I urge you, dear friends, to fully immerse yourselves in this knowledge-driven journey, think deeply and act decisively. This information isn't just numbers on a page, it's the key to our collective climb to the top. The doors to wealth are wide open, the only question is, are you ready to take that step forward?**

**NAS COMMUNITY**

Recently, the three major indices have been caught in a high-level tug-of-war, but the S&P 500's monthly chart is sending a clear warning signal, Stagnant price action + lack of response to positive news = the prelude to a correction! Institutional investors' behavior tells us everything we need to know, don't listen to what they say, watch what they do:

Goldman Sachs' Prime Brokerage data shows that hedge funds have been selling U.S. equities for five consecutive weeks!

They're not only reducing long positions in macro trading products but also significantly increasing short positions in individual stocks to hedge against systemic risk.

Nvidia's early pullback is fueling concerns about the future growth of AI giants!

At the same time, Trump has announced steep tariff hikes on Mexico, Canada, and China, a move that could not only further disrupt global supply chains but also significantly impact corporate profitability. Investors are shifting toward U.S. Treasuries and the dollar as a safe-haven play, but this doesn't mean the

**NAS COMMUNITY**

**market is out of opportunities, smart money is already searching for new profit hotspots!**

**Smart money never sleeps, it simply flows toward the most high-certainty markets. This is exactly what we anticipated and executed with precision, as profit potential in the stock market shrinks, we swiftly reallocated positions, keeping 10% in equities while shifting 90% into the crypto market, ensuring our capital remains in continuous growth momentum!**

**Have you noticed that all the recent market hotspots revolve around the crypto sector? The flow of capital has already given us the answer, smart money is pulling out of traditional markets and moving into higher-certainty opportunities!**

- **Innovation in the crypto market is accelerating, with COINFEEAI trading center's new strategic moves and the GEBT token IEO creating fresh profit opportunities!**
- **Market sentiment is heating up, and institutional capital is quietly positioning itself, following the trend is the only way to stay at the forefront of profitability!**

**NAS COMMUNITY**

**What is the most important action right now?**

**Investing isn't a game of emotions, it's a game of capital flow! Following the money is the key to maximizing certainty. At this moment, smart investors should be asking themselves:**

- Hold on to shaky, high-risk stocks and wait for a correction?**
- Or reallocate decisively, shifting toward the crypto market, where sentiment and capital flow are the strongest?**

**My answer is crystal clear, embrace high-certainty opportunities to unlock real profit growth! Friends, now is the perfect time to act decisively. Let's follow the market trend and seize the wealth code of this new era together!**

NAS COMMUNITY

## GEBT/USDT - 30-Minute Candlestick Chart

Opportunities always favor those who are prepared, and we are at the forefront of this wealth wave! With zero-risk IEO conditions, we have precisely captured this massive opportunity, GEBT's issuance price was just 3 USDT, it made a stunning debut at 15.05 USDT yesterday, and today it has soared to \$30! In just one day, the price has doubled, exceeding all expectations and demonstrating unparalleled strength! For those who entered at the IEO stage, returns have already reached 9x!

**NAS COMMUNITY**

**This isn't just a victory for a high-quality IEO, it's a perfect validation of market trends! In just one week, we've witnessed the incredible profit potential of a top-tier IEO firsthand! But the key takeaway is, this rally is only just beginning!**

#### **Key Signals Revealed by the 30-Minute Trend Chart:**

 **Strong Bullish Buying:** After a brief pullback yesterday, GEBT quickly surged, proving that once weak-handed investors exited, major market players took control. After breaking through key resistance levels, the price immediately entered an explosive rally.

 **Technical Indicators Support Further Upside:** The BBands midline is trending upward, while the upper and lower bands are gradually tightening, a signal that the market is gearing up for the next wave of upward momentum! When combined with daily candlestick patterns and volume distribution analysis, GEBT still has significant room for further gains!

 **Post-Shakeout Institutional Opportunity:** The first trading day saw aggressive institutional shakeouts, but instead of weakening the market, this process transferred a large number of tokens into the hands of strong holders.

**NAS COMMUNITY**

**As a result, the market structure is now healthier and more stable than before, laying the foundation for the next leg up!**

**Considering all available data and market sentiment, I remain highly confident in GEBT's future outlook, bullish with conviction! Friends, we are witnessing the true power of a high-quality IEO, and this is only the beginning! The market always rewards those who position themselves early and have the conviction to hold. Let's continue holding this valuable token that has already delivered substantial profits and witness even greater heights together!**

**Now, you finally understand why high-quality IEOs are considered the ultimate zero-risk investment treasure! This isn't just another hot topic in the crypto market, it's the centerpiece of every bull cycle, the prime target of capital inflows. If you're still unsure about the true potential of IEOs, feel free to DM me anytime, we can dive deep into the details, helping you quickly master this high-certainty, low-risk, high-return investment opportunity.**

**The appeal of high-quality IEOs lies in their scarcity and massive return potential. More importantly, top-tier exchanges conduct rigorous reviews before listing these projects, making IEOs significantly safer and more rewarding than**

**NAS COMMUNITY**

traditional ICOs. Looking back at history, many IEO projects have delivered staggering gains, for example, ETH has surged over 10,000x since its launch! This is why seasoned crypto investors remain highly attentive and always on alert for these exceptional opportunities.

When a high-potential IEO project opens for subscription, it often sees its progress bar quickly surpass 100% and this is a clear, high-confidence signal. The opening price will not drop below the issuance price. Just like stock market IPOs, early institutional subscriptions flood in during the initial phase, which not only strengthens market confidence but also enhances project stability. Top-tier IEO projects are often rapidly snapped up by institutions in their early stages. While buying at the 100% subscription mark may still involve some volatility, it typically signals greater profit potential. For regular investors, the safest and most reliable zero-risk entry point is after the subscription progress reaches 100%! This is a true risk-free golden opportunity, ensuring the highest level of stable profitability.

For investors who don't have time to monitor the market and trade contracts, IEOs are currently the best investment choice. They don't require constant market tracking, you simply need to time your subscription entry correctly to

**NAS COMMUNITY**

lock in steady returns with ease. This week, during the online subscription phase for the new IEO project, QTPT, I'll be sharing key insights and critical strategies to ensure you can maximize this rare opportunity. The market never waits for those who hesitate. The real winners are always those who position themselves early and seize the trend!

Dear Investors,

We are thrilled to announce that the QuantumPore Protocol (QTPT) token subscription will officially launch on February 6, 2025, at 00:00:00 EST!

This is a once-in-a-lifetime opportunity to be part of the world's first blockchain platform integrated with quantum computing, leading the revolution in Web3 security, efficiency, and scalability! 📈

🌟 Why Choose QuantumPore?

QuantumPore is not just another blockchain project. It is the next-generation decentralized financial infrastructure, solving the core limitations of existing public chains:

✅ Quantum-Level Security

Now, let's turn our focus to the upcoming high-quality IEO project, QTPT. If you haven't yet recognized the potential of quantum technology, it's time to seriously reconsider. This isn't just another emerging concept, it is widely

**NAS COMMUNITY**

regarded as one of the core technologies set to drive the Fourth Industrial Revolution. And QTPT stands at the forefront of this revolutionary transformation!

QTPT is the world's first innovative platform integrating quantum computing with blockchain technology, set to revolutionize Web3 security, efficiency, and scalability. This isn't just a standard tech upgrade, it's a groundbreaking transformation that will reshape the decentralized economy. Quantum technology is pushing the boundaries of information processing, communication, and data security. Its commercial applications are paving the way for industrial upgrades and a leap in productivity. Quantum technology was once just a theory, but now, it is becoming reality. And QTPT is your chance to secure an early position in this game-changing revolution!

QTPT's core technology delivers unprecedented security in data transmission while significantly enhancing transaction efficiency. It utilizes post-quantum encryption (Lattice-based cryptography), creating a security barrier that even quantum computing cannot breach, ensuring that blockchain achieves "next-generation" protection. At the same time, Quantum Key Distribution (QKD) technology makes data transmission completely immune to eavesdropping,

**NAS COMMUNITY**

offering a 1,000x security improvement over traditional blockchain systems! This means that even in a future where quantum computing capabilities grow exponentially, QTPT will still provide absolute security.

At the same time, QTPT introduces the Quantum Entanglement Consensus Mechanism, completely breaking the performance limitations of traditional TPS (transactions per second). Real-world testing shows that QTPT's transaction speed is 3x faster than the Visa network, while its Gas fees are only 30% of Ethereum's. In other words, QTPT not only offers high-speed scalability but also solves the high transaction cost problem that plagues current blockchain networks.

As QTPT's real-world applications continue to expand, the quantum technology revolution will permeate various industries, driving innovation and growth across the entire crypto market. QTPT is not just a high-quality investment opportunity, it is the catalyst for the industrialization of quantum technology!

This is the trend. This is the future. This isn't just a technological revolution, it's a wealth transformation. The real question is, are you ready to be a participant in this revolution, or will you remain a spectator and watch it pass you by? The

**NAS COMMUNITY**

**window of opportunity for QTPT won't stay open forever. True investors are always ahead of the wave. Friends, the time to act is NOW!**

**In the global crypto trading market, time waits for no one, and now, the QTPT IEO subscription is about to open, presenting a brand-new wealth opportunity right in front of us! Let's dive into the key data behind this investment opportunity, ensuring you secure an early position and capitalize on this unmissable chance.**

**The subscription window will officially open on February 6, 2025, at 12:00 AM Eastern Time and will remain open until February 15, 12:00 AM, giving us a full 10 days to lock in this exciting investment opportunity. But if you understand the market, you'll know that the subscription window for high-quality IEOs is often much shorter than expected. The real opportunities always belong to those who act the fastest.**

**The issuance price is set at 2.8 USDT, similar to GEBT's starting point and we all witnessed GEBT's incredible surge. QTPT not only boasts a stronger technological foundation and broader application prospects, but more**

**NAS COMMUNITY**

**importantly, market anticipation has already reached its peak! This isn't just another new project, it's a rising star destined to shine in the market.**

**The entry threshold is just 1,120 USDT ( $400 * 2.8 = 1,120$  USDT), making it accessible to a wider range of investors. Compared to other high-quality IEOs, this is practically a no-brainer opportunity. Market anticipation for QTPT has reached a boiling point, and a surge in demand is inevitable! Capital always flows to the highest-certainty opportunities, and right now, QTPT stands as the most high-confidence, highly anticipated, and most likely candidate to replicate GEBT's success in the crypto market!**

**Friends, this is a globally watched wealth game, are you ready to be one of its winners?**

**Only those who position themselves early and take bold action will truly reap the massive rewards of this IEO opportunity. The subscription window is about to open, and the race has already begun. Now is the moment to decide, are you ready?**

In just one week, GEBT skyrocketed nearly 900% from subscription to listing, delivering exponential gains for investors. Now, imagine, if QTPT surpasses GEBT's success, what kind of historic moment will we be witnessing?

Currently, our VIP partners have already achieved returns of +297.66%, +558.91%, and +1222.48%, an undeniably exciting accomplishment. However, the real opportunity is just beginning. The decision to participate in QTPT

**NAS COMMUNITY**

**could easily double these numbers or push them even higher. +300%, +600%, +1000% returns are no longer just a dream, they are a tangible reality within reach!**

**Dear NAS family members now is the time for us to stand together and embrace a new era of wealth creation. Behind every successful investment lies precise market judgment and decisive execution. I don't want to see anyone miss out on this opportunity to elevate both your investment acumen and your wealth to new heights. This is not just another investment, it's a once-in-a-lifetime chance to reshape your financial future. The market has opened its doors for us, the only question is, do you have the courage to step through?**

**I will continue to provide in-depth analysis and strategic insights on IEO investments, ensuring that every one of you can pinpoint the best market entry points with precision. During this high-frequency IEO issuance cycle at COINFEEAI trading center, countless investors are stepping into the most lucrative investment phase of their lives. Are you ready to seize this once-in-a-lifetime wealth window? Let me emphasize once again, investing in high-quality IDO/IEO projects will be the cornerstone of our wealth strategy, and QTPT is the most crucial step in this game-changing battle!**

**NAS COMMUNITY**

**Please stay tuned for Daniel's afternoon session, where he will provide in-depth market insights and strategies. If you have any questions, feel free to DM me anytime or join the discussion in the group with experienced investors. This is our moment to move forward together, and I don't want to see anyone left behind because we are about to sail toward a gold-filled treasure trove of wealth! Remember, opportunities always belong to those who are prepared. Now is the time to take action, join the QTPT movement and turn your determination and wisdom into real wealth!**

**Let's move forward together and create our own wealth miracle in this investment cycle filled with limitless opportunities! 🚀**

**Eastern Time, February 4, 2025**

**3:30 PM**

**Daniel Robert**

**Closing Commentary ( $\alpha$  &  $\beta$  Strategy)**

**Good afternoon, community members!**

**I'm Daniel Robert, and this morning, Helmsman led us in reviewing GEBT IEO's outstanding post-listing performance, reinforcing that high-quality IEO investments are not just a safe haven, but a zero-risk springboard to wealth. From the 450x surge of TRUMP token in just two days to the premium IEO projects and reward-based deposit plans on the COINFEEAI trading platform, the entire crypto market is entering a new wave of investment momentum, injecting unparalleled energy into our Battle of Kings Profit Plan!**

**Folks, we are witnessing the golden era of the crypto market!**

**NAS COMMUNITY**

Today, I'm not only going to guide you deeper into the secrets of IEO investing, but also shift our perspective to re-evaluate QuantumPore (QTPT), a high-potential project powered by quantum security technology.

Imagine stepping onto an island filled with gold, where every step could lead to a new treasure, this is the true appeal of high-quality IEO/IDO investments. It's not just a short-term arbitrage opportunity, it's a strategic blueprint for long-term wealth growth. What we seek in the market isn't just a single successful trade, but the ability to build a continuously expanding wealth matrix, allowing our assets to multiply with every market cycle.

Why is IEO investing the most high-certainty wealth opportunity right now?

- ✔ **Zero Risk:** Only participate after the progress bar exceeds 100%, ensuring that securing an allocation equals guaranteed profit.
- ✔ **Short Cycle:** Only 5-10 days to see returns that far exceed traditional markets.
- ✔ **Ultra-High Returns:** GEBT started at \$3 and peaked at \$43 post-listing, delivering over 1,000% gains and QTPT is projected to achieve even greater growth!

**NAS COMMUNITY**

**Folks, this isn't just an investment, it's a wealth expedition! Every high-quality IEO opportunity is a springboard to a higher level of financial success. Helmsman, with his vision and wisdom, has already positioned us ahead of the curve, now, it's up to you to seize this opportunity and go all in.**

**Today, we are not just investors, we are pioneers of the crypto market. Our goal isn't just to capture short-term profits, but to build a long-term wealth accumulation system, leveraging market fluctuations to establish our strategic advantage. The future of crypto is filled with limitless potential, and we are standing at the very forefront, ready to claim our moment of glory!**

**So, folks, are you ready? The opportunity is right in front of us, let's ride the wave and set sail toward new horizons! Stay tuned, as we will continue to uncover and share more top-tier investment opportunities and strategies on this journey, ensuring that you and I both emerge victorious in this crypto market wealth surge!**

NAS COMMUNITY

There are no major economic data releases today, so market movements are primarily driven by technical fluctuations. The three major indices continue to oscillate at high levels, and as Helmsman pointed out, this reflects a decline in market risk appetite. Investor confidence remains weak, indicating that U.S. equities are at an absolute high, with buying power clearly insufficient. Meanwhile, Nvidia (NVDA), the king of AI tech stocks, is in a correction phase, with bearish momentum dominating. This is placing significant pressure on both market sentiment and the indices.

**NAS COMMUNITY**

At the same time, the market is closely watching President Trump's tariff negotiations, as any new developments could trigger significant volatility. Currently, the market appears to be "underestimating" the uncertainty surrounding tariffs, displaying an overly optimistic bias, assuming these tariffs will ultimately serve as a bargaining tool in trade negotiations rather than being fully enforced. However, last Friday, when the market realized Trump might impose a 25% tariff on Canada and Mexico, stocks dropped immediately. Then, on Monday, when the tariff risk temporarily eased, the market staged a sharp rebound.

A similar scenario is unfolding with China.

On Tuesday, Beijing swiftly imposed tariffs on U.S. energy imports in response to Washington's latest round of tariffs. However, Wall Street analysts view China's reaction as relatively restrained, and as a result, market sell-off pressures have not intensified. Stock futures volatility remains contained within a manageable range. This indicates that the market is still weighing the potential inflation risks posed by escalating tariffs and their broader impact on economic growth. More widespread tariff measures could effectively "shut the door" on Fed rate cuts, and with policy uncertainty and corporate earnings under pressure, this could directly impact S&P 500 earnings growth in 2025.

**NAS COMMUNITY**

**In this market environment, the Helmsman advised this morning to continue adjusting capital allocation, shifting excess funds from the stock market into crypto. I believe this is an extremely rational and necessary strategy. This approach not only mitigates the risk of a potential high-level correction in equities but also maximizes capital efficiency. After all, in investing, time cost is the biggest cost. With profit margins tightening in U.S. stocks, reallocating funds to the currently outperforming crypto market is undoubtedly the higher-certainty choice.**

**Of course, the crypto market is far more volatile than traditional markets, but its potential returns are equally remarkable. When market confidence is low and risk appetite declines, the real opportunities are often hidden within the uncertainty. The key is how we adjust our investment mindset to ensure that our capital allocation enables steady growth, even in a volatile market. Helmsman's strategy isn't just about risk mitigation, it's about precisely capturing market trends. By strategically reallocating funds, we can not only protect our capital but also uncover new profit opportunities in high-volatility markets.**

**NAS COMMUNITY**

**After all, every market correction is a new opportunity to reposition. True investment winners are not those who blindly follow market sentiment, but those who execute with precision and position decisively within market cycles. And right now, we are standing at a historic turning point. Are you ready?**

**The strength of an investment market isn't determined by theory, but by the actual profitability it delivers. I remember someone once asked me: "You talk so much about Bitcoin, why not just trade Bitcoin directly?"**

**The answer is simple, the market doesn't care about what you want to trade, it's about where the easiest money is to be made.**

**Yesterday, Bitcoin presented a mid-term long opportunity around \$91,000, and AlphaStream 5.0 had already signaled the entry near \$90,000. Helmsman**

**NAS COMMUNITY**

repeatedly emphasized this key level. Bitcoin is definitely suited for mid-term trading, offering strong profit potential, but its short-term volatility is extremely fast-paced, with whales dominating the market. Hesitation in short-term trades can easily cause missed opportunities or losses. From a market rhythm perspective, Bitcoin serves as the benchmark for the entire crypto market. However, the assets that AlphaStream 5.0 strategically selects, exchange tokens and crypto indices are far better suited for quantitative trading. They provide greater stability and more reliable profit opportunities.

And what's the reality? Our profit plan, guided by AlphaStream 5.0, has been flawlessly executed time and time again! This is the true essence of steady investing. If you understand Helmsman's investment logic and bought Bitcoin spot or opened long positions around \$90,000, your profits are already substantial. Of course, mid-term trading requires larger capital, and VIP3 and above partners have already received clear long-trade instructions. However, in my opinion, short-term contract trading is the best way to amplify profit potential and unleash the true power of compounding!

No amount of words can compare to the truth revealed by the market itself. Have you made money? If your answer is "Yes," that means your strategy is working.

**NAS COMMUNITY**

**If your answer is “Not yet,” then ask yourself: Are you still waiting? Are you hesitating? Did you miss the signals from AlphaStream 5.0?**

**The market won't wait for you, and the window of opportunity won't stay open forever. As Helmsman says: "Believe what you see, not what you imagine." The profit potential in the crypto market is undeniable, and global investors are rushing in. All we need to do is position ourselves at the right place and ride the wave. 2025 is the year of crypto. The question is, are you ready to seize this historic opportunity and create your own investment legacy?**

**Folks, do you remember the last Non-Farm Payroll (NFP) day frenzy? On that thrilling day, we raked in 600% profits, proving the unmatched precision of AlphaStream 5.0 and Helmsman's investment brilliance. And now, an even bigger opportunity is approaching! This Friday's NFP day, our target is 900%!**

**Yes, you heard that right, a 900% profit challenge, an unprecedented explosion of returns, and a true wealth storm is about to hit!**

**NAS COMMUNITY**

Imagine this, with just one trade, you could achieve a 9x return, accelerating your wealth growth by years in an instant. Would you let this opportunity slip away? What are you still hesitating for? The VIP partners around you are already increasing their capital, gearing up for this once-in-a-lifetime opportunity. And you, are you ready to ride this wealth storm?

NFP day volatility is a goldmine! Every time Non-Farm Payroll data is released, the market experiences massive waves and we are the kings who ride them! Helmsman has already pinpointed the breakout moment, and 900% profits are waiting for those who are ready to act! This time, we're not just here to win, we're here to leave our mark on the market! Every profit earned is the ultimate reward for your vision and decisive action!

**NAS COMMUNITY**

**Folks, while the prospect of a 900% single-trade profit on NFP day is electrifying, the real game-changer is the astounding success of GEBT IEO! Imagine this, you subscribed to GEBT at \$3, and today, it hit a high of \$43, an explosive 1,400% gain! What does this mean? It means that if you sold at the peak, your returns would be 14x! This not only surpasses the majority of contract trading profits but also marks the beginning of the trillion-dollar ICO market in 2025, the true "Crypto Boom Year!"**

**Yes, TRUMP token's 450x gain was legendary, but GEBT's meteoric rise has proven that legends can be replicated! The insanity of the crypto market is only just beginning! This isn't just another IEO, it's a historic event that has shattered market expectations and made global investors realize that IEOs are becoming the new battleground for crypto wealth!**

**Just as GEBT ignited the market, COINFEEAI trading center swiftly moved to launch a series of high-quality IEOs! Do you think this is just a coincidence? No, this is a masterclass in market strategy! They fully understand that now is the prime moment to attract both institutional and retail capital. This isn't just a marketing move, it's a calculated play to leverage market momentum, maximize profits, and create a win-win scenario for both the platform and investors!**

**NAS COMMUNITY**

**This is just like launching IPOs during a stock market bull run with ample liquidity and soaring investor sentiment, stock prices naturally surge. COINFEEAI trading center is strategically capitalizing on this IEO boom, positioning itself as the premier global platform for IEO issuance. More importantly, this move is also laying the groundwork for their future Nasdaq listing! Their ambition goes far beyond being just a crypto exchange, they aim to become the "Wall Street of Crypto IPOs!"**

**If you're still unfamiliar with IEO, ICO, or IDO, today is the perfect time to learn! Because the sooner you understand these concepts, the better your position will be in the coming IEO frenzy. This isn't just a new era for the crypto market, it's a golden opportunity for your financial breakthrough! Now, do you want to be a spectator, or will you seize the gift of this era?**

**Folks, market opportunities only belong to those who are prepared, don't miss out again!**

**We often hear the term "ICO," and many people use it as a catch-all for new token issuances. But if you truly want to make serious money in the crypto market, you must understand the key differences. Top-tier projects like GEBT**

**NAS COMMUNITY**

and QTPT are not traditional ICOs, they fall under IEO (Initial Exchange Offering). Understanding this distinction directly impacts your investment decisions and could determine whether you unlock the wealth code of the 2025 crypto market!

### 🔥 ICO vs. IDO vs. IEO: What's the Difference?

- ◆ **ICO (Initial Coin Offering)** – This is when you buy tokens directly from the project team, similar to a crowdfunding model. Sounds like total freedom? It is but that comes with huge risks. No one filters these projects, so whether you make money is pure luck. Many projects promise the moon but end up vanishing, leaving investors with nothing. It's like entering an unregulated wild frontier, high potential, but extreme risk.

- ◆ **IDO (Initial DEX Offering)** - A new currency issued by a decentralized exchange (DEX), with more open transactions and stronger liquidity. But the problem is that the project owner can still set rules at will, and security depends on the spontaneous regulation of the market, and it is not uncommon to encounter the situation of cutting leeks.

- ◆ **IEO (Initial Exchange Offering)** – This is the true “elite tier” of crypto fundraising! Only projects that pass rigorous exchange screening can launch through an IEO. Think of it as the IPO of the crypto world, every project must

**NAS COMMUNITY**

undergo in-depth due diligence, including, market potential, profitability model and team background, etc. This ensures investors don't blindly jump into uncertain projects. Both GEBT and QTPT were launched through IEO, and what does that mean?

👉 **Transparency!** Projects must disclose their financials, technical capabilities, and development roadmap to investors.

👉 **Security!** Exchanges rigorously vet projects, filtering out most scam tokens and worthless coins.

👉 **Instant Liquidity!** Tokens begin trading immediately upon listing, no waiting, and no worries about finding buyers.

**Why is IEO the best choice for investors?**

Imagine you are a knight, preparing to participate in a tournament. ICO lets you go shirtless, IDO may give you a broken sword, but what about IEO? You are equipped with a complete set of armor + weapons to ensure that you not only have fighting power but also protection in the market battle! This is the choice of truly smart investors.

**NAS COMMUNITY**

**You can directly see the market heat through the IEO subscription data and see how big funds are deployed, just like standing in the VIP audience and clearly observing the pulse of the crypto market. This transparency is not a "numbers game", it is a living ecosystem, a live broadcast of investor sentiment, market trends and strategy adjustments.**

**So folks, facing IEO opportunities like GEBT and QTPT, think about your options? Do you want to try your luck in the wilderness, or join this financial battle with armor? The opportunity is here, it depends on whether you can seize it!**

**Imagine folks, IEO subscription is like a countdown to rocket launch, and the progress bar is the thermometer of fuel. If the progress bar fails to climb to 100%, it is like a rocket with insufficient fuel, which means that market interest is low and the project may fall below the issue price after listing, or even become a catastrophic fall. In this case, it is the wisest choice to stay away from it!**

**But if the progress bar soars like wildfire, breaking through 100%, 200%, or even 300% in an instant, that is a signal that market funds are pouring in, telling you that this project is not just an opportunity, but a wealth engine that is starting! This means that investors' FOMO emotions have been ignited, and buying is**

**NAS COMMUNITY**

**surging. After the listing of this IEO project, it is very likely that it will soar far beyond expectations and break through the sky! Folks, at this time, do you want to stand aside and watch others take off, or go directly on board and dance with the profits? You know the answer.**

**Guys, if you have ever fallen in the ICO field, don't lose heart! Not all treasures are buried equally deep, the key is whether you can find the real gold mine. IEO projects like GEBT and QTPT are the real beacons of wealth, not only with high profit potential, but also with transparent and fair market support!**

**Let's take a look at the miracle of GEBT - it is not just a token issuance, but also a perfect demonstration of identifying diamond-level projects. The issue price was only \$3, and it has soared to \$43 today, and it is even expected to break through \$50 soon! This means that investors who participated in the early stage have realized an amazing profit of more than 10 times!**

**This success is not accidental, but the charm of IEO - when the subscription progress bar breaks through 100%, 200%, or even 500%, this is the real FOMO signal of the market, telling you that this project is destined to take off! This is**

**NAS COMMUNITY**

**the zero-risk subscription opportunity of IEO - subscribing after the progress bar reaches 100% means guaranteed profit!**

**Folks, the decisive moment has arrived! Whether you upgrade to a higher-level VIP partner to participate in the non-agricultural battle, or subscribe to QTPT tokens, now depositing money can unlock exclusive VIP-level rewards. The final sprint stage has officially begun!**

**💎 Up to 40% GEBT gift bonus - this is not only an extra reward for deposits, but also a springboard for you to explode your wealth! The price of GEBT is soaring, and the gift tokens in your hands are appreciating synchronously, creating higher potential returns every second! This is not an ordinary reward, this is a ticket to board the wealth rocket directly!**

**🔥 Are you willing to watch others earn 10x or 20x the profit while you miss out on the wealth storm of 2025, the first year of cryptocurrencies? Or are you willing to take action now to grab a seat and lock in your profit space? Opportunities are only for those who act decisively. If you miss it, you can only sigh in despair!**

**NAS COMMUNITY**

**⚡ Don't hesitate, top up now, get GEBT free, and grab a seat for QTPT subscription! The door to wealth has been opened, whether you can cross it depends on your decision! If you want to know more details, contact the official customer service immediately, the opportunity is fleeting!**

**Folks, QTPT's IEO has officially kicked off, and we are standing at a crossroads to wealth! Can it surpass the glory of GEBT? Will it become the next IEO legend? The helmsman has opened a door of insight for us this morning from the innovative concept, ultra-low entry threshold and strong market attention. And now, I will take you through this door and see the real potential behind QTPT. This is not just a token issuance, but an unprecedented market storm!**

**QTPT's IEO is not just another investment opportunity, it is a precisely planned market layout that is paving the way for the upcoming wealth frenzy. What makes it all the more exciting is the 5 million GEBT tokens given away by the exchange! But guys, this is not just a generous benefit - this is a stroke of genius in market operation. It is not a simple gift, but the detonator that ignites the entire market craze!**

**Let's break down the subtleties of this operation:**

**NAS COMMUNITY**

Imagine what would happen if the exchange chose to dump these 5 million GEBT directly into the market? The price would collapse directly, right? But they didn't do that. Instead, they precisely allocated these tokens to new investors, making the chips more concentrated, avoiding market selling pressure, creating scarcity, and stimulating buying sentiment. This is not random generosity, but a precise manipulation of market sentiment.

Why does this work? Because it triggers the “herd effect” in the market, when everyone gets a piece of the pie for free, curiosity and speculation in the market are ignited! “It’s free, it’s hot, and it’s soaring, why shouldn’t I buy more?” This is the mentality we are exploiting, and an unstoppable buying frenzy is brewing, sending the GEBT price soaring.

The ultimate goal of all this is to build momentum for QTPT's IEO. The success of GEBT has made everyone realize that the profit effect of high-quality IEO surpasses everything! That's why the market expectations for QTPT have even exceeded GEBT! Investors have deeply realized that those who missed GEBT must not miss QTPT this time!

**NAS COMMUNITY**

Of course, due to the high entry threshold of GEBT, the final holders are mainly institutions and large-capital individual investors, which makes the chips highly concentrated and the market more stable. For ordinary investors, the best strategy is to decisively lock in profits after listing to ensure maximum returns!

Folks, the market is on fire, now is the time to make a decision! QTPT's IEO is not only the next investment storm, but also your wealth carnival! Are you still hesitating? Or are you ready to ride the wind and waves and become the winner in this crypto market craze? The opportunity is fleeting, act now and grab your seat!

Subscription		Allocation							
Upcoming		Offering		Pending		Winnings			
	QTPT	Offering Price	2.8 USDT	Issue Quantity	8000000	Starting Time	02/06/2025 12:00:00 AM ET	Closing Time	02/15/2025 12:00:00 AM ET

**NAS COMMUNITY**

**Folks, this is just an appetizer, the real feast is still to come!**

**The success of GEBT is just the beginning, the real protagonist, QTPT, is about to take over the stage and set off a more frenetic investment storm! This time it is not just a surge in market attention, but the focus of the entire investment circle! Whether it is experienced veterans or eager novices, they have locked on QTPT and are ready to push it to a new peak beyond GEBT!**

**Why QTPT will be the next IEO legend?**

**✓ The progress bar has a chance to surpass GEBT in a flash and ignite the market frenzy! The higher the market enthusiasm, the more amazing the increase! When you see the subscription progress bar jumping wildly, it is not a number, but a signal that market funds are pouring in, this means that profits will explode directly!**

**✓ Lower entry threshold, higher growth space! QTPT is not just an IEO, but your wealth booster. You can enter the market earlier and more easily than GEBT and enjoy greater gains!**

**✓ The institutional FOMO effect has started! Institutional funds have begun to move like crazy. Smart funds will never miss the next big market trend. Now is the golden window for layout!**

**NAS COMMUNITY**

**This is the real moment of the market frenzy. Would you rather stand on the top of the wave or regret it after the storm? Guys, the opportunity is in front of you. The question is: will you seize it or let others have the last laugh? QTPT is not just an IEO project, it is your ticket to wealth in 2025, the first year of crypto! Don't wait for the market to tell you that it has succeeded. By then, the most profitable position has been taken by others! Act now, lock in your QTPT subscription seat on February 6, and become the next winner!**

**Folks, I have just been watching for an opportunity, and a VIP partner has issued a trading signal, this is a short-term chart trade, don't let the opportunity slip away.**

**This trade is as smooth as fine silk, folks, and perfectly illustrates the pure elegance of trend trading! We use a robust strategy of large accounts + small positions to turn trading into an easy walk in the park. This is not gambling, but the art of precise execution and stable compounding! You will witness the snowball effect happen - your account will not just grow, but expand exponentially!**

**NAS COMMUNITY**

**Now, let's invest 50% of the profit from this transaction into a 30-day financial product to strengthen our WEALTH MATRIX! You will see that your assets will not only double, but will far exceed your initial capital. This is not just a transaction, this is building an indestructible fortress of wealth, and every brick is paving the way for your financial freedom!**

**But this is just the beginning - there are bigger opportunities ahead! Double opportunities are coming, are you ready?**

**🎯 QTPT IEO: A high-quality IEO that will surpass GEBT, the perfect entry window has opened! Think about GEBT's 14 times return, QTPT is destined not to let you down! The progress bar will have a chance to break through 200% on Friday afternoon, then subscription = zero risk!**

**🎯 Friday's Non-Agricultural 900% Profit Challenge: A revolutionary contract trading opportunity! Remember the feat of 600% profit in the last Non-Agricultural? This time, our goal is to multiply the single profit by 9 times! If you are still hesitating, wait and see others make huge profits and regret it!**

**💡 Strategic layout: two-pronged approach to lock in the future!**

**NAS COMMUNITY**

- ✔ **Top up now and grab the GEBT gift benefits! This is a chance to give away money directly. The gifted tokens alone can make you a lot of money!**
