**Professor Montgomery Keane (Helmsman)**

### **Morning Review**

**Good morning, team!**

**I'm Montgomery Keane, your old friend. Yesterday's discussion was truly inspiring. We delved into the five key investment principles of IEOs, medium- and short-term strategies, QTPT's profit outlook, and why high-quality IEO consistently outperform traditional IPO. Seeing everyone grow and achieve tangible progress in IEO investments fills me with immense satisfaction. This is not just a golden path to generating substantial returns in a short period but also a lifelong avenue to building lasting wealth.**

**Given today's complex market environment, why do we believe high-quality IEOs are the best investment opportunity right now? It's because the stock market remains in a high-level sideways consolidation, trapping capital with**

**NAS COMMUNITY**

limited growth potential. Through our strategy of keeping 10% in the stock market while allocating 90% to crypto, we are avoiding the stagnation of traditional equities while capitalizing on explosive profits in the crypto space. Capital market isn't just a test of patience, it's a test of intelligence, and we are already on the right path.

#### **“Battle of Kings”: Our Journey to the Millionaire Club**

This is not just a trading plan, it is a critical journey toward financial freedom. To provide a clearer roadmap, I've outlined four decisive stages, each with unique strategies and targets. Which stage are you in right now? Which key milestone are you about to reach? This is exactly what I want to discuss with you next!

Every step we take in this journey shapes our future, and every correct decision can lead to exponential growth. True winners are those who recognize opportunities and take bold action! Let's move forward together, seizing every key moment. Let the glory of the future no longer be just a dream, but a reality!

**NAS COMMUNITY**

Stay tuned for our upcoming discussions. Our goal is not just success, but to create a legacy! 🚀

**NAS COMMUNITY**

The direction of the market determines how we should move forward. By analyzing the daily candlestick charts of NASDAQ and Bitcoin, we can clearly see that the three major U.S. stock indices remain in high-level consolidation, the rally of the Magnificent Seven is showing signs of fatigue, and there is a lack of sectors with sustainable upside potential. Meanwhile, the presence of institutional support prevents a sharp decline in the market. This "time for space" sideways pattern means that most individual stocks are moving in tandem with the indices, leading to a diminished profit effect in the market. Instead of wasting time in such conditions and facing potential adjustments at any moment, it is far more strategic to allocate capital toward the high-certainty opportunities in the crypto market, this aligns with the fundamental nature of capital seeking maximum returns.

Have you ever considered why capital flows are more predictive of market trends than sentiment? Because capital has a cost. Holding positions in a market with weak profit potential for too long will only lead to underperformance against the time cost. Meanwhile, in the crypto market, Bitcoin's volatility is generating even greater profit opportunities. Looking back at our Bitcoin long strategy from \$60K to \$100K, and even re-entering after stabilization at \$90K, every move has delivered profits perfectly. AlphaStream 5.0 has guided us

**NAS COMMUNITY**

**through repeated profit challenges in the crypto market, and this is something everyone has witnessed firsthand.**

**Looking ahead to 2025 crypto market. The first trillion-dollar ICO year! TRUMP Coin skyrocketed 450x in just 2 days, igniting a global investor frenzy, while GEBT's IEO provided undeniable proof: a \$3 subscription price surging to \$53 within 7 days, an 18x increase. This is no longer mere speculation but real, tangible market returns, even surpassing the cumulative profits of several weeks of contract trading. More importantly, IEOs are primary market opportunities, offering risk-free profits, rather than the risk-heavy speculation of the secondary market!**

**So, what does QTPT's IEO mean for us? It is not just an investment, it is a strategically significant market opportunity. If you missed the best timing for contract trading, or could not follow strategies due to time constraints, this IEO is one you absolutely cannot afford to miss. A historic opportunity is right before us, and my responsibility is to ensure that every member of our community seizes it!**

**NAS COMMUNITY**

**What is true institutional thinking? It is following the trend and fully committing to seizing the opportunities of the era. We must learn to position ourselves like institutions, not observe like retail traders. Many people spend their whole lives working hard, yet one well-timed move could surpass a lifetime of effort. IEO is the best chance for normal investors to change their financial future. If you miss this, you may never get another opportunity. As a member of this community, I refuse to let you miss the best financial windfall of our time.**

**Friends, now is not the time for hesitation instead it is the time for action. QTPT's IEO is launching now, and history won't wait. Wealth always belongs to those who act decisively! 🚀**

**In this era of unparalleled opportunities, we stand on a golden path to financial freedom, and QTPT's IEO subscription data is the ultimate proof. QTPT's progress bar has surged past 750%, with only a few days left before subscription ends. The listing price is highly likely to exceed \$21! This means that if we lock in more than 10% of the allocation ratio during the IEO subscription phase, and the price triples after listing, this investment can at least bring us more than twice the net profit! Are you ready to go all out for such an opportunity?**

**NAS COMMUNITY**

**In today's complex market environment, with stocks consolidating at high levels, we maintain a clear strategic allocation: Only 10% of funds remain in the stock market, 90% are allocated to high-certainty opportunities in the crypto market. This strategy not only shields us from traditional market volatility but also precisely captures the extraordinary returns of the crypto market. Facts have proved that the 1000% profit challenge in the "Battle of Kings" was not luck, it was the ultimate validation of a well-executed investment strategy.**

**But this is just one part of our journey. True wealth transformation happens in four key stages. Which stage are you in right now?**

### **Stage 1: Laying the Foundation. Building Your Wealth Base**

**Our journey begins here. The early-stage tests and initial profit strategies have proven the powerful execution of AlphaStream 5.0 in real market conditions. 38 trading signals with all wins. This is not just data, it is solid proof from real trading! Those who joined early have already built a strong profit foundation, setting the stage for their next phase of wealth acceleration. Have you secured your position? Are you ready to take on even greater challenges?**

**NAS COMMUNITY**

### **Stage 2: Advancing Steadily. Accelerating Profit Growth**

**As we enter Week 5 of the "Battle of Kings" Profit Challenge, we are witnessing a new wave of explosive wealth creation. TRUMP Coin's legendary 450x surge in just two days has reignited global interest in ICO, while GEBT's IEO has sparked a modern gold rush! Many members secured over 20% allocation in GEBT and later sold at \$45+, turning a \$3 investment into a 1400% return. Such incredible returns have proven the true value of IEO.**

**It took VIP3 partners five weeks to achieve this remarkable growth, while VIP1 and VIP2 partners have yet to reach this milestone. Now, QTPT is presenting us with a perfect opportunity to make up for it! This is not just a stepping stone, it's a powerful catalyst to propel us toward +300%, +600%, and even +1000% profit targets!**

### **Stage 3: Approaching or Reaching the Goal. The Ultimate Breakthrough**

**Each person's journey to wealth is unique, just like a mountaineer climbing towards the summit. Some stride forward with unwavering confidence, while others adjust their pace along the way. QTPT's IEO is the climbing staff in our hands, guiding us over obstacles and leading us to the final peak.**

**NAS COMMUNITY**

**When QTPT's progress bar surpasses 800%, 1000%, or even higher, we can already foresee its phenomenal performance upon listing! If you missed GEBT, don't hesitate this time! The future you will thank the version of you today who took bold action.**

#### **Stage 4: Strengthening and Reinforcing. Building Your Life of Freedom**

**Imagine this, your wealth goals have been achieved. What does your life look like? Do you see yourself welcoming the first light of dawn on a private beach? Or cruising along a coastal highway in your dream supercar, feeling the rush of absolute freedom? These are no longer distant fantasies. With the right investment decisions, they are well within your grasp!**

**At this stage, we are not just solidifying past successes but laying the foundation for a future lifestyle. True wealth is not just numbers in an account, it's about how much control you have over your time and your life! QTPT's IEO is a critical piece of our wealth matrix, missing this opportunity means there may never be another one with this level of certainty!**

**NAS COMMUNITY**

**Dear friends, the world of investment does not reward spectators, only those who take action will seize greatness. Right now, QTPT's IEO is at its most crucial stage, and we are standing on the verge of a financial breakthrough. Opportunity is here, your actions will define your future. Let's move forward together and reach the peak! 🚀**

**As time goes on, those dreams that once seemed unreachable are now becoming reality. This is not just about financial growth, it is about writing an extraordinary chapter of our lives. At this moment, we are not just winners in the market, we are winners in life. We have true freedom to live on our own terms, without being bound by financial constraints. This is the ultimate purpose of investing: not just growing numbers, but transforming lifestyles.**

**"Battle of Kings" is our call to action at this stage. It has not only helped us achieve our profit goals but has also equipped us with an institutional-level investment mindset. On this road to an even greater future, those of you who stand out will not only have the opportunity to become a member of NAS Community Charity Fund, but possibly a managing partner of the fund, working with me to shape this grand vision.**

**NAS COMMUNITY**

**As AlphaStream 5.0 prepares for its global launch, I will personally invite all those who have bravely joined “Battle of Kings” to witness this historic moment! We will gather to celebrate the global debut of AlphaStream 5.0 and witness the official establishment of the NAS Community Charity Fund. This is more than a symbol of financial freedom, it is our responsibility and commitment to society.**

**Stay tuned for today’s Daniel in-depth discussion. If you have any questions or wish to explore market strategies and investment opportunities further, feel free to reach out to us or seek advice from seasoned members of the community. Opportunities only belong to those who are prepared. Let’s move forward with unwavering belief and determination, and open the doors to a new era of prosperity together! 🚀**

**3:30 PM**

**Daniel Robert**

**Closing Commentary ( $\alpha$  &  $\beta$  Strategy)**

**Good afternoon, community members!**

**I'm Daniel Robert, just coming from Helmsman's morning session. I trust that your investment compass is now precisely calibrated, right? This week is pivotal, as the market braces for a series of critical economic data releases. On Wednesday, we have the January CPI report; on Thursday, the initial jobless claims and on Friday, the January retail sales data, each of these has the potential to trigger significant market volatility. Should any of these reports deliver unexpected results, we cannot rule out the possibility of a major move in the contract trading market. Our task? Position ourselves in advance and ensure we're riding the wave in the right direction!**

**NAS COMMUNITY**

**This week, we have two major events that require our full commitment:**

- 1. QTPT IEO subscription is in its final sprint, only 4 days left until the Saturday deadline! Opportunities like this don't last long. The market progress bar has already surpassed 900%, if you miss out, you might regret it for a long time!**
- 2. Stay closely tuned to the VIP Partner Group. The release of CPI data and retail sales figures could trigger significant volatility in the crypto market, don't miss any opportunity for asset growth!**

**This morning, Helmsman provided a precise analysis of February's investment rhythm, and without a doubt, high-quality IEO projects are the core pillar of our Battle of King profit plan. He meticulously broke down the plan into four key phases and called on us to go all in, seizing this once-in-a-lifetime opportunity to reshape our wealth trajectory. At this point, the question isn't "Should we take action?" but rather "Are we moving fast enough?"**

**So, folks, our strategy is crystal clear: In the contract market, we only take the most certain trades, precisely capturing explosive price movements. In the IEO market, we secure the highest-quality projects, locking in maximum returns with minimal risk. This is the Golden Investment Rule set by Helmsman and it's the best path to financial freedom!**

NAS COMMUNITY

The market always rewards those who are prepared, and wealth favors those who take action! Are you ready? Let's take on the week together, execute with precision, and create our own legendary success! 🚀 🔥

**NAS COMMUNITY**

By comparing the daily candlestick charts of the S&P 500 and the VIX Fear Index, it becomes clear, the market is on the verge of a critical breakout! The triangle consolidation range for both is narrowing, signaling that a sharp market move could happen at any moment. If the VIX suddenly surges, a downward correction in the S&P 500 and the broader indices will be inevitable. In the current market cycle, the likelihood of a major rally in equities remains low, while the VIX has been building strong upside momentum, a signal that demands our full attention!

**This isn't about "whether to sell", it's about "are you selling fast enough?"**

Continue reducing positions on strength and locking in profits, rather than waiting for a market collapse and being forced to cut losses. This is the iron rule of professional investors, adjust before the market does, rather than being adjusted by the market!

**🔥 Now, let's look at Powell's testimony today:**

He made it clear, the labor market remains strong, inflation hasn't yet reached the target, and there's no urgency to adjust monetary policy. In other words, the Federal Reserve won't ease policy lightly, and the 2% inflation target remains non-negotiable. If the market was expecting a rate cut soon, this testimony just

**NAS COMMUNITY**

**poured cold water on that idea. In the short term, any further rally in U.S. equities driven by rate cut expectations seems unlikely.**

**Although the indices saw a brief rebound following Powell's remarks, they remain trapped within a high-volatility consolidation range, with market sentiment still fragile. This is a classic signal of a "false rebound"! At this stage, the biggest market risk is a sudden surge in risk-off sentiment, any minor disturbance could trigger a sharp rise in the VIX, leading to a deep correction in equities.**

**🚩 What's the smartest strategy right now?**

- 1. Sell remaining stock positions on strength to reduce risk exposure!**
- 2. Maintain ample cash flow and go all-in on the QTPT subscription!**
- 3. Shift funds into higher-certainty markets, such as the booming IEO sector in crypto!**

**Remember, smart money is never dictated by the market, it positions ahead of time and moves with the trend! Are you ready to adjust course and seize the opportunity? 🚀 🔥**

**NAS COMMUNITY**

**Buckle up, folks! We're not just navigating through the storm of traditional markets with the QTPT IEO wave, we're riding the momentum, seizing rare opportunities that can redefine our financial destiny, and carving out an entirely new path to wealth growth!**

**Attention! The QTPT subscription progress bar has surpassed 820%, which means the opening price is now projected to soar above \$23. This directly signals that your initial allocation could yield at least 7x pure profit! But here's the real question, how much allocation can you secure?**

**💡 This is the real key! If you don't play your cards right, your final allocation ratio could end up far lower than expected! The rapid surge in the progress bar proves that demand is far exceeding supply, with investors rushing in. If you're calculating based on average distribution, some participants may see their allocation drop to 12.2%, 8%, or even below 5%. And for those who fail to execute Helmsman's strategy with precision, allocation could fall as low as 3%, meaning your profits might be just a fraction of what others are making!**

**NAS COMMUNITY**

📊 **The subscription progress bar is still surging at an explosive pace, waiting any longer will only shrink your allocation! Now is the time to act! The moment the progress bar crossed 100%, it wasn't just signaling a zero-risk investment opportunity, it was announcing a wealth feast! Will you sit back and watch others walk away with massive gains while you settle for leftovers? Of course not!**

🔑 **How do you ensure you're not the one who "missed the opportunity"? The answer is simple, increase your subscription capital and go all in! History has shown that in every IPO, IDO, IEO, and ICO opportunity, those who enter early and invest heavily always secure larger allocations and generate far greater returns than others. Unlike IPOs, where you might walk away with nothing, IEOs are a guaranteed-win game. You will receive an allocation, the only question is how much, and that depends entirely on your subscription strategy and capital commitment.**

**Remember GEBT? Back then, many approached it with caution, testing the waters with small positions, only to regret it deeply when the price soared 15x post-listing. Meanwhile, those who went all in have already made a fortune. If**

**NAS COMMUNITY**

you had the chance to do it all over again, would you hesitate to increase your investment? Right now, QTPT is giving you that very opportunity, to rewrite history and create your own legend!

🔥 When faced with a zero-risk, high-reward golden opportunity like this, there's only one move, go all in! Invest as much as you can! This way, you won't look back one day filled with regret, wondering what could have been. The time to act is NOW! QTPT is your wealth goldmine, join in, subscribe at full force, and let's charge toward a new financial peak!

Folks, close your eyes and picture this, you're standing at the edge of a historic wealth opportunity, one that's within reach but, if missed, could be a lifetime regret! That's exactly where we are right now in the high-quality IEO market! 🌟💰

**The Three Key Elements of Success, You Must Master Them!**

✅ **First:** When you see the subscription progress bar surpass 100%, it's not just an opportunity, it's a signal. A zero-risk, guaranteed-profit signal! Oversubscription indicates overwhelming market demand, which means the

**NAS COMMUNITY**

opening price will far exceed the subscription price. Imagine walking into a casino where every dollar you bet is guaranteed to double, or even 10x, that's the game we're playing!

✔ **Second: Pay close attention to the length of the progress bar, it's not just a number. It's a barometer of market demand and a predictor of your future profits! When the subscription progress bar surges past 500%, 800%, or even 1000%, what does it mean? It means the post-listing price will multiply accordingly! In other words, it determines how many times your profit will grow! This is the purest reflection of market sentiment and the prelude to an explosive wealth surge!**

✔ **Third: Keep increasing your stake to ensure you're at the front of the most profitable group! Continuously adding to your subscription capital not only expands your allocation but also positions you at the forefront of the profit surge! This isn't just about participation, it's about securing a top spot and maximizing your returns!**

🔥 **Now, let's turn our focus to QTPT!**

**NAS COMMUNITY**

➔ **Why is QTPT destined to be a star?**

**This isn't just optimism, it's a market-driven inevitability based on fundamental principles: Scarcity = High Value**

**Market Demand = High Returns**

**1. Exclusive Issuance Advantage**

**High-quality IDO/IEO/ICO projects aren't found just anywhere, they undergo rigorous selection and are only granted to top-tier exchanges. This scarcity factor means that QTPT's listing value isn't just driven by technology and market trends, it's governed by the golden law of supply and demand: The rarer it is, the higher it surges!**

**2. Explosive Potential Driven by Uniqueness**

**Think about NBA stars' exclusive endorsements or limited-edition collectibles, it's scarcity and exclusivity that drive their value sky-high. Similarly, QTPT will only be listed on select exchanges during its contract period, drawing in massive investor demand. Once the contract period ends, it will expand to more platforms, further amplifying its market influence and value! This is the top-tier**

**NAS COMMUNITY**

game of market dynamics, and our goal is clear, secure a prime position before the explosion happens!

### **3. Listing at Peak, Profits Multiplying Exponentially!**

Remember ETH, BNB, IOTA, and NEO, the former crypto stars? Their post-listing surges have far outperformed traditional IPOs, skyrocketing hundreds or even thousands of times! QTPT possesses all the key traits of these phenomenal projects, it has the potential to become the next breakout asset. Everything we're doing right now is about locking in the rewards of this success before the rest of the world catches on!

🚀 Simply put, the QTPT subscription is a rocket launchpad! You either board the rocket and take off, or stay on the ground watching others soar into space, the choice is yours!

Folks, seize this opportunity and go all in! The subscription window is closing, the progress bar is skyrocketing, and this is the critical moment to make your move! Act now! This isn't just an investment, it's the key leap toward your path to financial freedom! 🚀🔥

**NAS COMMUNITY**

**In this market, large institutions seize the advantage, while small investors are often pushed to the sidelines, left to pick up scraps in the secondary market. But QTPT is different, this is a true wealth opportunity for all investors!**

- 🚀 The progress bar is about to explode past 1000%! What does this mean?**
- ✅ Subscription demand far exceeds supply, guaranteeing that the opening price will be significantly higher than the subscription price!**
- ✅ Institutions have already secured their initial allocations, now it's time for all investors to reap the rewards!**
- ✅ Your allocation directly determines your final profit, the more you invest, the more you earn!**

**Remember GEBT? Its subscription progress bar skyrocketed just like this, and those who went all in early ended up securing 16x profits! If you had been part of it back then, would you hesitate on QTPT today? This isn't just another market opportunity, this is an unprecedented wealth surge in the crypto market! And you have the chance to position yourself at the forefront and ride this unstoppable wave of financial success!**

**NAS COMMUNITY**

✦ **Still debating how much to invest? Wrong question. The real question is, how can you invest more?**

✓ **You don't need hesitation, you need full commitment!**

✓ **You don't need to wait, you need to take action now!**

✓ **You don't need to miss out, you need to seize this moment and become part of this wealth revolution!**

**That's it for today's insights, but our journey to wealth is just beginning! Now is the time to step into this zero-risk wealth arena, take control of your future, and turn your investment story into a legend! The doors to QTPT are open, join now, and let your future self thank you for the decisive action you take today!**

**Take action, witness history, and become a legend!**
