**Eastern Time, February 12, 2025**

**9:10 AM**

**Professor Montgomery Keane (Helmsman)**

### **Morning Review**

**Good morning, team!**

**I'm Montgomery Keane, your longtime friend. In the world of investing, the market doesn't reward hard work out of sympathy, nor does it compromise for persistence. The only thing that proves everything is results, profit! It's not just about numbers growing; it's the ultimate validation of our wisdom, patience, and execution.**

**Looking back, we've overcome countless challenges to get to where we are today. From our early trading drills to the glorious victories of the "Battle of King" challenge, from scaling the Millionaire Club to the Multi-Millionaire Club, we have witnessed breakthrough after breakthrough. We've refined our strategies,**

**NAS COMMUNITY**

**adjusted our pace, and stayed ahead of market trends. Every decision and execution has been driven by one core objective, profit!**

**But the reality is, the market has no sympathy. Some people work hard, put in the effort, yet still fail to achieve the profits they desire. Why? Because the market doesn't reward hard work alone, it only rewards those who truly understand the game, can seize trends, and have the discipline to execute!**

**The mindset of market winners, it's not just about hard work, but precise execution! I've seen many traders staring at charts all day, analyzing countless technical indicators, afraid to miss the slightest market movement. Yet, at the end of the day, their trading accounts show little to no real growth, some even suffer losses in market fluctuations. This reminds me of a simple truth: Hard work alone won't make you rich. Direction and strategy determine how far you can go.**

NAS COMMUNITY

NAS COMMUNITY

Let's go back to the market. The CPI data for January, which was just released, was higher than expected, with an annual rate of 3% and a monthly rate of 0.5%, which undoubtedly has a certain negative impact on today's stock market. In the past few months, the market has been betting that the Federal Reserve will start cutting interest rates in the first half of 2025, and this expectation is the key factor driving the stock market to continue to fluctuate at a high level. But now, the pace of inflation cooling is slower than the market expected, which directly reduces the possibility of the Federal Reserve cutting interest rates in March, and even the window for interest rate cuts in May has become uncertain. The market's previous strong rebound relied on expectations of loose liquidity, and now that the pace of interest rate cuts has been delayed, short-term market sentiment is bound to be hit.

**NAS COMMUNITY**

Judging from the daily candlestick charts of technology stocks such as Tesla, Nvidia, and Microsoft, the current market is dominated by high-level fluctuations, and the sideways trend at the daily level suggests that the adjustment at the monthly level may be coming soon. The three major indexes are still sideways at high levels, and the deterministic profit opportunities in the stock market are decreasing. Of course, market rotation may bring some short-term trading opportunities, but those opportunities that allow you to rest assured to hold heavy positions are becoming fewer and fewer. What we have to do is not to struggle to find sporadic opportunities in an uncertain market, but to concentrate on seizing the real big opportunities.

When the risk-return ratio of the stock market continues to decline, smart funds will naturally look for new breakthroughs, and the crypto market is the most attractive choice at present! The market will not wait for those who wait and see, and opportunities will always belong to those who act decisively and make accurate decisions. The short-selling signal just issued has already made us a considerable profit, which is the charm of the crypto market-it gives rich rewards to those who dare to seize opportunities. The essence of investment has always been to put funds in the place where the greatest returns are most likely to be generated at the right time, and now it is obviously not the stock market, but the crypto market. Please stay tuned, the trading signals of VIP

**NAS COMMUNITY**

**partners will lock in the next wave of best opportunities for everyone, let us seize the opportunity in this wave of wealth together!**

**In this critical market cycle, I must make this clear, if a stock needs to be sold, don't hesitate! Right now, the equity market is stuck in a pattern of high-volatility consolidation, offering limited short-term profit potential. Capital isn't compounding effectively, instead, it's being wasted on meaningless sideways movement, draining both your time and opportunity costs. Think about it, if there's a better choice, why not take it? Why let your capital sit idly in a market lacking clear growth momentum, when you could be reallocating it to a sector with real breakout potential?**

**Look at the results of our actions**

**Bitcoin bought at \$60,000 spot, successfully cashed out at \$100,000 for massive profits. The AlphaStream 5.0 Contract Trading Challenge delivered returns that outperformed the stock market multiple times over! Facts speak louder than words, our strategy has always been centered on the most efficient use of capital. And right now, the crypto market is signaling an unprecedented opportunity!**

**NAS COMMUNITY**

**IEO Market: The Most Disruptive Wealth Opportunity of Crypto's 2025 Breakout Year! Looking back at the past decade of investment history, every era has had its own Kondratiev cycle, a window where ordinary investors had the chance to ride the wave of transformation. And now, in 2025, that moment has arrived again. The wave of crypto's breakout year is here, offering everyday investors a real chance to turn the tide and rewrite their financial future!**

**✦ Zero-Risk Primary Market Play, The Game-Changer! As the subscription phase nears completion, QTPT is about to enter its price discovery phase in the public market. With the progress bar already surpassing 1000%, the post-listing surge could very well exceed GEBT, delivering exponential profit growth!**

**✦ IEOs vs. the Stock Market, The Clear Advantage! You can keep your capital trapped in an inefficient, choppy market, or you can proactively embrace the trend and seize this once-in-a-lifetime opportunity. Choices shape the future and we only choose battlefields with the highest probability of success!**

**✦ Institutional Mindset, Seizing the Right Momentum! Successful investors never fight the trend, they move with it, positioning themselves for the bigger**

**NAS COMMUNITY**

picture. The true market winners never cling to the past, their focus is always on the most explosive opportunities. Right now, the IEO market is that battlefield, institutional capital is already making its move. Our task? Stand at the forefront of this wealth wave and ride it to the top!

Take action now, don't let this opportunity slip through your fingers! In investing, it's not about who works the hardest, it's about who executes the best! Can you make the right decision at the right time? Can you spot the trend from the market's signals? Can you act decisively instead of hesitating?

The QTPT IEO subscription is live, and the market window is closing fast! This is not a market for waiting, it's a battlefield for action-takers. Seize it, and you become a winner. Miss it, and you'll be left watching others create wealth miracles. Now is the time to decide. Let's move forward together in this historic moment and step into a new era of prosperity! 🚀

Look at the top performers in our NAS community, what have they achieved?

- ✅ They follow strategy, not emotions.
- ✅ They focus on high-probability opportunities, not meaningless market noise.

**NAS COMMUNITY**

✓ They understand the time cost of capital and seize profit opportunities with certainty!

This is especially evident in the IEO market!

In the past few weeks, we witnessed GEBT delivering 17x returns in just 7 days and TRUMP token surging 450x in only two days. And now, QTPT IEO is stepping onto the same historic stage! This isn't just an investment, it's a window of opportunity for true wealth acceleration!

Why is IEO the best wealth strategy right now? You might ask: Montgomery Keane, we've been trading contracts before, why are we now fully focused on IEOs? The answer is simple, capital efficiency!

✦ Risk vs. Certainty: Contract trading requires precise market timing. While AlphaStream 5.0 has maintained a 100% accuracy rate, some traders still missed optimal entries due to timing constraints. In contrast, the window for high-quality IEO projects is strictly limited to this month, scarcity equals value, and missing out means it's gone forever! Even more importantly, IEO subscription progress data has already validated its zero-risk entry point! QTPT's progress

**NAS COMMUNITY**

bar has now surpassed 1000%! This means that post-listing, the minimum expected profit margin is at least 3x!

✦ **Time vs. Returns:** In the contract market, we might achieve 100%-1000% profits in a month, but high-quality IEO projects often deliver 300%, 500%, or even 1000%+ returns within just 7-10 days. This clearly proves that primary market profits are not only extraordinary but also risk-free!

✦ **Capital vs. Opportunity Cost:** With U.S. stocks stuck in high-volatility consolidation and market appeal fading, why not deploy capital into the more explosive crypto market? Capital has a cost, and we can't afford to waste time in inefficient markets!

Opportunities belong only to those who take decisive action! The market never waits for those who hesitate. In the "Battle of King" plan, we've already seen bold investors achieve 300%, 600%, even 900% returns! Now, QTPT's IEO subscription is in its final countdown, this is our next high-certainty wealth opportunity. If you're still watching from the sidelines, still hesitating, ask

**NAS COMMUNITY**

**yourself, when this opportunity is gone in an instant, will you regret not taking action?**

**Think back, what was your original purpose when you first joined the NAS community? Was it to change your financial situation? To take control of your wealth?**

**Or to achieve true freedom? Every dream requires action to become reality!**

**Let's fight for profits, together! This isn't just about trading, it's about taking control of our financial destiny. Profit is the best validation of our efforts! Our goal isn't just short-term gains, but to build a sustainable, long-term profit model, one that keeps our capital working efficiently, generates continuous growth, and leads us to true financial freedom. Right now, QTPT's IEO subscription is live, a true golden opportunity that cannot be missed! Take action! Join me in this wealth revolution, charge forward through the storm, and let profit be our shared victory!**

**NAS COMMUNITY**

Over the past few days, I've received an overwhelming amount of feedback, the enthusiasm for QTPT is surging like a tidal wave. This fills me with both excitement and a bit of concern. I'm excited because many in our community are about to achieve returns far beyond expectations. But I'm also concerned because with such high demand, the winning distribution ratio may get diluted, reducing individual allocations.

**Why is this happening?**

**How can you increase your allocation?**

**And most importantly, how can our NAS community gain the upper hand in this competition?**

**This morning, we will break down these questions one by one and dive deep into key strategies for increasing your allocation. In today's market environment, only those who master the right strategy can take the lead in this zero-risk wealth competition! With QTPT's online subscription progress surging explosively, how should we interpret this trend and strategically position our investments?**

**NAS COMMUNITY**

In the world of investing, understanding the rules of the game is the key to winning and this is especially true for IEO investments. Lately, many have been asking: How can I increase my winning distribution ratio? Today, let's dive deep into this question.

First, the theoretical calculation for the average winning distribution ratio is quite simple: It equals 100 divided by the current progress bar percentage. For example, with QTPT's current progress at 1050%, the theoretical average winning ratio is:

$(100 \div 1050) \approx 9.52\%$ . However, this is just a theoretical value, real-world results often vary.

So, how is the actual average winning distribution ratio calculated? It represents the average percentage of allocation received by all investors. For example, if Investors A, B, and C receive 5%, 12%, and 25% of allocation respectively, then the actual average winning ratio is:  $(5\% + 12\% + 25\%) \div 3 = 14\%$ .

This also explains why, when GEBT's progress bar reached 502%, the final announced average winning ratio was 12.24%, rather than the simple theoretical

**NAS COMMUNITY**

calculation of 19.92%. In the real world, factors such as capital size, subscription timing, and market strategy all influence the final allocation ratio. That's why we can't rely solely on theoretical calculations, instead, we must optimize our strategy to maximize our allocation!

Next, I will reveal the "Three Key Fairness Mechanisms of IEO Allocation" and how to gain an edge in this highly competitive market, ensuring your investments generate higher returns! In this market, knowledge is power. Mastering these key mechanisms will help you secure more allocations in future IEO investments and move toward even greater success!

So, the real question is: Are you ready to upgrade your investment strategy and seize this opportunity?

**Fairness Mechanism #1: Early Participation, Higher Returns, Winners Are Always the First Movers!**

You've probably heard the saying, "The early bird catches the worm." In the IEO world, this couldn't be more true. Time is money but more importantly, it's a

**NAS COMMUNITY**

**strategic resource. Those who understand how to move first are often the ultimate winners!**

### **Why Should You Subscribe to QTPT Early?**

**Simply put, the earlier you subscribe, the higher your winning allocation ratio! If you invest on Monday, but your friend waits until Wednesday, there's no doubt, your allocation will be significantly higher than theirs. This is the core principle I've always emphasized:**

**First movers feast, latecomers get the scraps!**

- ◆ **The decision you make today will directly impact your final returns! By taking action just a little earlier, you can secure a larger allocation ahead of the competition and every extra share could mean multiples, even tens of times in returns!**

**NAS COMMUNITY**

- ◆ **The market doesn't wait for those who hesitate! Opportunities always favor those who act decisively, not those who delay and watch from the sidelines. As the Bible says, "Therefore keep watch, because you do not know the day or the hour." The same applies in investing, once an opportunity is gone, it may never return!**

### **Fairness Mechanism #2: The Power of Capital, Your Wind Sail to Success!**

**In the IEO arena, capital is more than just your entry ticket, it's the wind that propels you forward. The more you invest, the greater your allocation share. This isn't just a "first come, first served" game, it's a battle of strategy and capital!**

### **Why Does Capital Investment Determine Your Final Allocation?**

**IEO allocations aren't distributed equally, they are calculated based on capital weight. Even if you and others participate at the same time, your final allocation depends on who invests more! During a high-demand subscription period, if an investor contributes half of the total funds, their allocation share will far exceed everyone else's.**

**NAS COMMUNITY**

➤ **The GEBT Case Has Already Taught Us a Lesson. We saw that while the theoretical winning ratio is a fixed calculation, the actual allocation ratio often falls below expectations. What does this mean? Most participants received far less than they anticipated. Why? Because they didn't fully leverage the power of capital! Investing is a battle that requires full commitment, not a hesitant trial. If you've already decided to act, don't hesitate, maximize your investment and secure your advantage in this competition for opportunity!**

**Capital is not just a tool, it's the key to unlocking your wealth. Every dollar you invest is the fuel that propels you forward in this vast investment ocean, determining how far you can sail and what horizons you can reach. Now, the real question is: Do you want to dip your toes in, or do you want to ride the waves and conquer new frontiers? The choice is yours!**

**Dear NAS Family, leverage the power of capital and secure your advantage in the IEO battlefield! Remember, if you're joining later, the most direct and effective way to increase your allocation ratio is by increasing your subscription capital! You might ask, "I participated early, shouldn't my allocation ratio be higher?" Theoretically, early subscribers do have an**

**NAS COMMUNITY**

advantage, but as the overall progress bar continues to surge, the average winning allocation ratio naturally declines.

 Let's look at a simple example:

When QTPT's progress bar first reaches 100%, the average winning allocation ratio is relatively high. But as the progress bar surges to 1050% or even higher, the theoretical average allocation ratio drops below 9.5%. This means that as more investors enter the market, competition intensifies, and allocation ratios naturally get diluted.

 So, how can you secure a higher allocation ratio?

There's only one answer: Increase your investment! The more capital you commit, the higher your allocation. This isn't just a strategy, it's the core rule of the IEO market!

 **Summary:**

1. Early participants do have an advantage, but final allocation still depends on capital size.

**NAS COMMUNITY**

2. **If you're joining later and want a larger share, the only way is to increase your investment and secure a stronger position in the competition.**
3. **This is the core of the fairness mechanism, within a fair system, those who commit more capital will reap greater rewards!**

**In the IEO investment battlefield, smart investors don't sit around waiting for luck, they use capital to create guaranteed success! Dear family, do you now understand the key to winning? If so, take decisive action now! Opportunities wait for no one, and wealth always belongs to those who act with courage!**

**Dear NAS family, in the world of investing, true winners aren't just those who seize opportunities, but those who know how to maximize their value. Today, I have a major announcement to share with you!**

**We've been exploring the fairness mechanisms of IEOs, and today, we've broken new ground! Through the active efforts of the NAS community, we engaged in deep discussions with COINFEEAI Exchange and achieved an unexpected breakthrough!**

## NAS COMMUNITY

In IEO subscriptions, priority is given to early participation and capital size, but many overlook the privileges of active users. Exchanges often allocate more resources to users who are long-term active participants and high-value contributors. This isn't just a reward for loyalty, it's a strategic move by the platform to retain top-tier investors!

💡 So, what exactly does the privilege of active users mean?

✅ Higher allocation ratio, Under the same conditions, active users receive a larger share of allocations compared to regular users.

✅ Priority access, When demand surges, active users have a better chance to secure their spot, avoiding the dilution effects of an oversubscribed progress bar.

✅ Exclusive investment opportunities, As more premium ICO, IDO, and IEO projects emerge, our NAS community will gain greater influence and allocation advantages.

**A Major Breakthrough for the NAS Community: We are no longer just investors, we are shaping the market!**

**NAS COMMUNITY**

**🚀 Major Breaking News! After active negotiations with the exchange, the NAS community has officially secured special privileges in the QTPT IEO subscription, which means:**

- 1. The exchange has approved the "fund pool" strategy, treating the NAS community's collective funds as institutional capital, granting us special allocation privileges.**
- 2. The NAS community will receive a higher allocation ratio compared to other investors, meaning a greater chance of winning and a larger final allocation!**
- 3. All NAS members will benefit, whether you joined early or recently, your efforts and actions will now earn you additional rewards!**

**🌟 This isn't just an IEO, it's a victory for us as a community! 🌟**

**It's the ultimate recognition of our unity, commitment, and active participation over time! This successful negotiation doesn't just give us a stronger position in QTPT, more importantly, it proves the power of the NAS community to the entire market! Looking ahead, as more premium projects emerge, we can leverage this strategy to secure even greater market advantages, ensuring that our community members maximize their returns!**

**NAS COMMUNITY**

**Opportunities won't wait, now is the best time to enter!**

**This is not just an opportunity given by the times, it is the result of our collective efforts! Right now, QTPT's IEO has entered its final sprint, with the progress bar surpassing 1000%! This means a guaranteed 3x+ pure profit at listing! And with our exclusive allocation advantage, every NAS family member will enjoy returns far beyond expectations!**

**Today, with immense excitement, I share this thrilling news with all of you. We are not just creating wealth, we are building a stronger NAS community! Seeing so many of you increasing your subscription capital, I know that you now understand how to gain the upper hand in this wealth game. This is not just about personal profit growth, it's a crucial step for our entire family toward achieving the "Battle of King" profit goal!**

**Even more exciting is that our active participation and market influence have earned us recognition from the exchange, granting our community unprecedented privileges. This isn't just an unexpected bonus, it's the best reward for our collective efforts! On the path of IEO investing, we've taken another major step forward, further solidifying our position as a dominant force in the market.**

**NAS COMMUNITY**

**2025 is destined to be the year of glory for the NAS family! Many of our members have already achieved their financial dreams here, but believe me, this is just the beginning! The victory in Battle of King is not the finish line, but a brand-new starting point!"For where your treasure is, there your heart will be also."**

**It is this unwavering belief that keeps us at the forefront of the market waves. We are not blindly chasing profits, we are strategically capturing the most certain and high-potential opportunities in the market. From Bitcoin spot trading to contract markets, and now to QTPT's IEO, I have always emphasized diversification, precise positioning, and mastering market trends, building an unshakable wealth matrix of our own!**

**QTPT: The Most Certain Wealth Opportunity Right Now! The market has given us a rare chance, and we are standing at the threshold, ahead lies a vast and limitless golden landscape! QTPT's IEO is not just a subscription, it is a gift from the bull market. Today, we deeply analyzed the difference between "Theoretical Allocation Ratio vs. Actual Allocation Ratio" and explored the three core fairness mechanisms of IEO investing. I believe every family member now fully**

**NAS COMMUNITY**

**understands the core logic of this game, master the right strategy, and profits will naturally follow!**

**Now is the time to take action! Don't remain a bystander, take the decisive step, increase your investment, and join the NAS family in securing the greatest victory on the QTPT IEO battlefield! What we pursue is not just wealth growth, but a battle of wisdom, strategy, and courage at the highest level!**

**Stay tuned for Daniel's afternoon deep-dive analysis, where we'll continue exploring how to turn theory into practice and potential into profit!**

**Those who seek will find! Opportunities won't wait, and neither will the market, action is the only answer!**

**Let's stand together, face greater challenges, and create a brilliant future for the NAS family!**

**Warm regards,**

**Montgomery Keane**

**NAS COMMUNITY**

**Eastern Time, February 12, 2025**

**3:30 PM**

**Daniel Robert**

**Closing Commentary ( $\alpha$  &  $\beta$  Strategy)**

**Good afternoon, community members!**

**I'm Daniel Robert. First, a big thank you to Helmsman for this morning's brilliant insights, giving us a deeper understanding of the essence of investing. At its core, the market is an unforgiving battleground, only by seizing profits can we maintain an undefeated position. In this ruthless arena, kindness won't earn you respect from competitors, instead, it makes you their prey. If you want to become a winner, you must be decisive, precise, and ruthless in executing the right strategy.**

**Everyone, take a moment to reflect on your performance in the Battle of King Profit Challenge. If your returns are below the VIP Partners' average, it's time for some serious self-examination. What's holding you back? Is it poor time**

**NAS COMMUNITY**

management? Is it hesitation causing you to miss key opportunities? If these challenges still haunt you, then the trillion-dollar ICO market of Crypto's 2025 Breakout Year could be your path to redemption.

Think about it—high-quality IEO projects offer an incredibly efficient, zero-risk profit model. No need for constant chart-watching.

No need for complex trading strategies. It's as simple as: **Subscribe → Win the allocation → Wait for listing → Sell to lock in profits.** And this IEO boom is a once-in-a-lifetime opportunity to reshape your wealth trajectory! If you've missed profits in the contract market due to high volatility and fast-paced trading, this time, you cannot afford to miss out on the golden opportunity of IEOs.

**My Advice?** Right now, go all in on this month's top-tier IEO subscriptions, leave no regrets! Once these premium IEO projects conclude, you can return to contract trading or better yet, wait for AlphaStream 5.0 to launch. Then, subscribe immediately, install it on your phone or computer, and let the AI-driven trading system execute strategies for you automatically, seamlessly capturing every profit opportunity in the market. This way, you'll never miss a

**NAS COMMUNITY**

**trade due to time constraints, and every high-probability signal will be executed with precision. Let profits run. Let your assets soar.**

**The market has already given a clear signal, will you keep hesitating, or will you follow Helmsman's lead and seize this life-changing opportunity? The choice is yours. But remember, opportunities don't wait. Miss it once, and you may never get another chance! Take action now, secure your future! 🔥 🔥 🔥**

**Guys, we are standing at a brand-new starting point, and for some, this isn't just an opportunity, it's the beginning of a challenge. Make no mistake, this is real. QTPT's online subscription progress bar has skyrocketed to an astonishing 1150%!**

**What Does This Mean? Demand is outpacing supply, capital is flooding in, and every participant is fighting for a larger allocation! However, in this battle of capital, the rules are simple: Winners aren't the ones who sit on the sidelines, they're the ones who double down and go all in!**

**NAS COMMUNITY**

**Yesterday, I made it clear, go bigger, go all in! This isn't just my investment philosophy, it's a principle I've always lived by. Whenever the market gives a clear signal, the only way to stay in control and secure victory is to go all out without hesitation!**

**And today, Helmsman has provided even deeper insights:**

- ◆ **Theoretical vs. Actual Allocation Ratio, With overwhelming market demand, your allocation share will directly impact your final returns.**
- ◆ **Fair Distribution Mechanism, Understanding the fund pool rules ensures you maintain a strategic advantage.**
- ◆ **Good News! Thanks to our absolute dominance in the fund pool, every contributor will receive a larger allocation share in QTPT, securing higher profit potential! 🎯💎**

**This isn't just a simple profit opportunity, this is a chance to define your future!**

**💡💰 QTPT is making history, and the question is, will you be a spectator, or will you stand on the winner's podium?**

**NAS COMMUNITY**

📣 **The question is: What are you still waiting for? The opportunity is right in front of you, now is the time to take decisive action! Once-in-a-lifetime opportunities always belong to those with the courage to seize them! ✨ The market is undergoing major shifts, and our strategy must evolve accordingly!**

✅ **The stock market remains volatile, and risks are accumulating. When media sentiment turns overly optimistic, it often signals that a crisis is quietly unfolding.**

✅ **The latest CPI data has lowered expectations for rate cuts in the first half of the year. This adds more uncertainty to the market, weakening the confidence of equity bulls.**

✅ **Bitcoin (BTC) is bottoming out, and \$90,000 is the golden buy zone! As Helmsman accurately analyzed, this range is a strong mid-term buying opportunity, and smart money is already positioning itself!**

**Guys, the opportunity is right in front of us, the market has already given its answer! QTPT is the key springboard for our wealth surge in 2025, and the only thing you need to do is: Take decisive action, go all in without hesitation! Seize the opportunity, lock in profits, and let's step into a brilliant future together!**

**NAS COMMUNITY**

The current time window presents an exceptionally rare, high-certainty opportunity, not only should we seize it, but we must go all in without hesitation!

✔ Shift all trading capital into QTPT! This is the golden opportunity we've been waiting for!

Looking back on this week, our full attention has been on QTPT. Why? Because we know one thing for sure, once it goes live, it will bring us returns beyond imagination! 💎 Not just profits, but a chance to completely redefine our investment trajectory.

✦ Remember, opportunities favor those who take decisive action!

✔ You can choose to wait, but the market won't.

✔ You can choose to hesitate, but looking back, all you may find is regret.

✔ You can choose to go all in and position yourself at the forefront of the next wealth wave! This market belongs to those who seize opportunities, double down, and take action! 🎯 When QTPT launches, our portfolio numbers will skyrocket!

NAS COMMUNITY

Guys, the market winds are shifting fast, we must stay sharp! Today, the three major indices are trading in a narrow range, but warning signals are already emerging. The Dow Jones is on the verge of a technical pullback, with the MACD

**NAS COMMUNITY**

forming a bearish crossover at high levels and the 5MA about to cross below the 20MA, a classic bearish reversal signal. Meanwhile, the VIX fear index is rising, confirming the early signs of market weakness. 🇮🇹⚠️

### **A Major Market Correction Is on the Horizon!**

- ◆ History tells us that when gold hits new highs, it often signals that the global economy is entering a recession cycle.
- ◆ U.S. stocks are at historic highs, while economic data remains mixed, flashing recession warnings across the board.
- ◆ An inverted yield curve, rising unemployment, and the Fed stuck in a policy dilemma, all these signs point to the possibility of a sharp market correction at any moment!

### **How Can We Protect Our Capital and Even Profit Against the Trend?**

- ✅ Reduce exposure to overheated stocks, stay cautious, and take profits while you can!
- ✅ Seek high-certainty, zero-risk opportunities and QTPT IEO is exactly that safe haven! 🚀💰

**NAS COMMUNITY**

**Now is not the time to bet on market direction, it's time to secure guaranteed profits! We must execute with precision and place our capital in "risk-free, sure-win" opportunities. QTPT IEO is the most solid choice right now, subscribe to lock in profits, list to cash out gains! 💎**

**The market always belongs to those with vision, winners don't wait for opportunities, they create them! Now, it's time for you to make a choice: Will you continue taking risks in a volatile market, or will you secure this once-in-a-lifetime, high-certainty opportunity?**

**Guys, the market is constantly shifting, but QTPT's IEO stands like a beacon, guiding us toward victory! In this volatile market environment, what do we need?**

- ✅ Zero risk, high returns!**
- ✅ High certainty, guaranteed profits! And QTPT is exactly that once-in-a-lifetime opportunity!**

**NAS COMMUNITY**

**Why is QTPT the opportunity we must go all in on?**

- ◆ **The ultimate safe-haven investment: When stocks are volatile and economic data is uncertain, QTPT IEO becomes the perfect hedge against market risks!**
- ◆ **Short cycle, high returns: Winning allocations will be announced this Saturday, meaning your capital is only tied up for three days before securing substantial profits!**
- ◆ **Market Buying Frenzy: The progress bar has surged past 1150%, and this isn't just a number, it's a real reflection of massive capital inflows! Every second you wait, your allocation share gets diluted!**
- ◆ **Stable Returns, Zero-Risk Entry: Subscribe to lock in profits, list to cash out gains, no need to weather the volatility of the secondary market. Secure your victory with confidence!**

**Is Winning in an IEO Guaranteed? Let's Break Down the Game Rules!**

- ✓ **IEO = Subscription + Allocation, Unlike IPOs, where you could walk away with nothing, an IEO guarantees you a token allocation before the project goes live. The key factors? Your capital size and early participation priority!**

**NAS COMMUNITY**

✓ The higher the progress bar, the tougher the competition. Your allocation ratio is determined by your subscription amount. Want a bigger share? Increase your investment decisively and gain the upper hand in this market race!

✓ High-quality projects = Instant profits at listing. History has shown that top-tier IEOs often deliver 10x, 20x, or even higher returns. GEBT's 16x surge is the perfect example and QTPT is even more highly anticipated by the market!

Still hesitating? Guys, this isn't a time to "think", it's a time to "act"! QTPT's IEO is in its final sprint, and allocation results will be announced this Saturday! This means if you join now, your capital is only tied up for 3 days before locking in profits! 💰 Are you willing to let this opportunity slip away and watch others take the wealth that could have been yours?

Guys, the subscription progress bar is surging, we are on the verge of a wealth explosion! In the traditional IPO market, large institutions dominate, making it nearly impossible for small investors to get a fair share or even secure an allocation, which feels like rolling the dice. But the IEO game in the crypto market is completely different, it's a transparent, fair wealth arena. As long as

**NAS COMMUNITY**

**you participate, you are guaranteed an allocation! You are no longer a bystander waiting for fate to decide, you are in control of this game!**

**🎯 Why is IEO the most certain investment opportunity in today's market?**

**✅ Transparent allocation mechanism, Unlike IPOs, you won't be left empty-handed due to qualification restrictions. Whatever you invest, you receive a proportional allocation of tokens!**

**✅ Zero-risk profit lock-in, Once the progress bar surpasses 100%, your investment enters the safe zone, guaranteed profits upon listing!**

**✅ Clear price projection, The progress bar directly correlates with the listing price, allowing you to accurately predict potential returns based on historical data!**

**✅ Global investor influx, Massive capital inflows drive market attention and hype, ensuring strong demand. The earlier you participate, the greater your profits!**

**📊 Subscription Progress Bar = Wealth Multiplier! How Does It Impact Your Gains?**

**NAS COMMUNITY**

The rising progress bar doesn't just reflect market buying frenzy, it's also your profit indicator! Let's use the successful GEBT IEO as a case study to project QTPT's potential performance:

- 💡 **GEBT Issuance Price: \$3**
- 💡 **Subscription Progress Bar: 502%**
- 💡 **Opening Price: \$15.06 (5x return)**

Now, let's take a look at QTPT's potential:

- ◆ **Current subscription progress bar has surpassed 1150%, meaning the opening price could reach  $2.8 \times 11.5 = \$32.2!$**
- ◆ **If the progress bar surges to 1300%, QTPT's opening price could hit \$36.4!**
- ◆ **And this is just a conservative estimate, if market demand continues to soar, the post-listing price could skyrocket beyond expectations!**

🗣️ **Three Key Subscription Scenarios, How Should You Respond?**

- ✅ **Scenario 1: Progress Bar Below 100% (Failed IEO)**

**NAS COMMUNITY**

- ◆ **Allocation ratio = 100%. Whatever you invest, you receive the full amount of QTPT tokens.**

- ◆ **But the opening price may be lower than the issue price, for example, \$1.4, which means a 50% loss at the opening.**

- ◆ **Conclusion: This type of IEO is a failure with significant risk, which is why we only participate in top-tier projects where the progress bar exceeds 100%!**

- ✔ **Scenario 2: Progress bar reaches 100% (breakeven)**

- ◆ **The allocation ratio is still 100%, but the opening price is expected to be the same as the issue price (\$2.8).**

- ◆ **You will not lose money, but the profit depends on whether the market continues to push the price higher.**

- ◆ **Conclusion: Hold short-term arbitrage or wait for the market to heat up!**

- ✔ **Scenario 3: The progress bar exceeds 100% (optimal profit zone)**

**NAS COMMUNITY**

- ◆ **The allocation ratio starts to decrease. When the progress bar reaches 500%, 1000%, and 2000%, the allocation ratio may drop to 20%, 10%, and 5%, respectively.**
- ◆ **But the opening price soars. Assuming that QTPT's progress bar finally stops at 1300%, the opening price may reach \$36.4, which means that even if your allocation ratio decreases, the value of your tokens will still skyrocket!**
- ◆ **Conclusion: At this time, going all out to increase your position is the only correct choice!**

 **What to do now? Maximize your investment share!**

**The subscription competition has entered a white-hot stage, you must make sure you get enough allocation! As the progress bar soars, your allocation ratio will be diluted, so the only way to ensure that you make the most profit is to increase your investment and subscribe with all your strength!**

**Don't wait! Time waits for no one, and opportunities are fleeting! QTPT's IEO is not only a springboard for your wealth to soar, but also a legendary chapter in**

**NAS COMMUNITY**

**the crypto market in 2025! Let's rush to the top together, go all out, win the largest share of QTPT tokens, and wait for wealth to soar!**

**Guys, now is the time to show your determination! In this IEO competition, our goal is not just to participate, but to stand on the winner's podium. And to do this, the only answer is to increase your investment and firmly lock in your allocation ratio. The rules of the market game are simple - those who dare to bet can win the biggest pie, while those who hesitate and wait and see can only pick up the scraps.**

**How much you can get depends on several key factors.**

- 1. Timing is everything. The earlier you enter the IEO subscription, the higher your allocation ratio will be. When the market frenzy reaches its peak and the progress bar soars, your allocation ratio will only be diluted.**
- 2. Bet big. The more you bet, the more you win, this is not speculation, but the iron law of the market. Large capital investment means a larger allocation ratio. If you want to eat a lot of meat, you must go all out.**
- 3. Go all out to get big returns. If your goal is to double or even increase your profits, then you should not hesitate to maximize your funds.**

**NAS COMMUNITY**

**Tentative investments will only bring tentative returns, and the real winners are those who dare to bet.**

- 4. The market is a battlefield where competition never stops. When all funds are competing for the quota of high-quality projects, whether you can win the competition depends on the scale of your funds and your ability to act.**
- 5. Activity is crucial. The exchange prefers active accounts and is willing to give higher allocation ratios to users with high trading volume and high participation. This means that accounts participating in contract trading will be given priority.**

**Guys, now that you have mastered all the key strategies, the real test is here, are you willing to act decisively and lock in your share of profits? The progress bar of QTPT is soaring at an alarming rate, and whether you can come out on top in this wealth race depends entirely on your decision now. This is not just an opportunity, but a ticket to wealth leap. It's time to put aside your hesitation, move forward at full speed, and make your account the winner in this IEO storm. This market will not wait for those who hesitate, and QTPT's IEO will not leave too many opportunities for latecomers. Now is the time to seize the opportunity, lock in your share of the pie, move forward at full speed, and welcome the brilliant gains that belong to you!**

**NAS COMMUNITY**

**Guys, the insights we discussed today are not just empty talk, but investment wisdom carefully extracted after the helmsman deeply studied the three core fairness principles of IEO. This is not only a strategy used by exchanges to attract investors, but also a beacon that illuminates the investment path, providing a real treasure map for all those who dare to sail in the IEO investment wave.**

**The hot topic today is: What does it mean if the actual allocation ratio is lower than the theoretical expectation? Will this also happen with QTPT's IEO? How can we adjust our strategy to ensure that we get more allocation ratios? The answer is actually very simple! If the actual allocation ratio is lower than the theoretically calculated ratio, it means that more small investors are scrambling for quotas. Since QTPT's IEO is open to a large number of retail investors, this is very likely to happen. In other words, competition in the market is intensifying and quotas are becoming scarce!**

**So, how can you ensure that you can occupy a favorable position in this competition? The only way is to increase your investment, exceed the average investment level, and ensure that your capital is large enough to obtain a higher**

**NAS COMMUNITY**

**allocation ratio. There is no complicated formula here, only a simple logic: if you want to get more, you have to invest more!**

**Now, let's focus on our three trump cards:**

- 1. Many of us decisively laid out the online subscription of QTPT last week and seized the opportunity.**
- 2. Our account activity is extremely high, and the recent contract transactions are frequent. The trading center is naturally more willing to give active users a higher allocation weight.**
- 3. The scale of our capital pool has been recognized by the exchange, which means that we are already in a more favorable allocation position.**

**But guys, that's not enough! These advantages are just a VIP ticket to wealth. What really determines your returns is still the amount of money you invest. The more you invest, the higher the allocation ratio, and the more impressive the final profit! Where are we now? The progress bar of QTPT is soaring, and there are more and more competitors. If you don't increase your stake as soon as possible, you may end up with only a small portion, not the share you really deserve!**

**NAS COMMUNITY**

**So, my advice remains the same, if you want to win, you must go all out! For those who made a profit in contract trading this morning, congratulations! But now, it's time to maximize your profits, invest all your funds in QTPT subscriptions, increase your quota, and increase your allocation weight! This is not only the best strategy to lock in benefits, but also the only way to ensure that you come out on top in this wealth race.**

**Today's sharing ends here, but the story is far from over. Tomorrow, we will continue to follow QTPT's voyage and explore more hidden treasures together. Now, let's hold the steering wheel tightly and rush to the finish line at full speed to welcome our glorious victory! 🚀🔥**
