9:30 AM

Professor Montgomery Keane (Helmsman)

Morning Review

Good morning, team!

I am Montgomery Keane, your old friend. Today is a day filled with love, and love is not just an emotion, it is a force that drives us to be positive and forward-looking. It is the anticipation of a better future that enriches our inner world, filling each day with hope and motivation. The pursuit of a better life is what keeps us moving forward.

The beauty of life is often hidden in those unnoticed moments, embedded in the simplicity of everyday life. If you are willing to see it, you will be amazed to discover that the world is far more beautiful and filled with hope than you ever imagined. On the other hand, if you choose to be a pessimist, your world will be dominated by doubt, fear, and hesitation. Your mindset shapes your world, and

NAS COMMUNITY

the kind of person you choose to be ultimately determines the quality of your life.

Investment is no different. In the ups and downs of the market, smart investors know how to identify real opportunities instead of being swayed by short-term fluctuations. In the face of the current high-level volatility in the stock market, we must learn to make choices, dare to let go of uncertain small opportunities, and instead seize those that bring long-term value. This is not just an investment strategy but a mindset for success.

Faith and goals are the bridges to a better life. As Jesus said on the mount: "But seek first his kingdom and his righteousness, and all these things will be given to you as well." This is not just a guiding principle of faith but also wisdom in life and investment, when you have unwavering belief and focus on what truly matters, wealth and success will naturally follow.

So, my friends, on this journey, let's stay true to our original intentions and firmly grasp the opportunities that can truly change our destinies. Opportunities never wait for those who hesitate; they belong only to those with courage, vision, and the determination to act. Use wisdom to judge, courage to execute, and faith

NAS COMMUNITY

to persist, laying a solid foundation for our future. Let expectations become reality, and let greatness be inevitable!

My friends, today, I come to you with great enthusiasm and anticipation! Yesterday, Daniel Robert and I had an in-depth discussion on the core strategies of IEO investment, covering the powerful advantages of the funding pool, the secrets behind daily allocation distribution, and how to strategically increase winning rates in the final stage of IEO subscriptions. These are the critical elements that determine investment success. Seeing everyone listening attentively and engaging actively fills me with pride because we are not just investing, we are learning and growing together!

A special highlight from yesterday was Daniel's mini quiz, the 10 challenge questions were not just a test of knowledge but also a special gift for all participants. Seeing members of the NAS community actively engaging and pushing their limits filled me with immense joy! Even more exciting was the fact that many participants achieved perfect scores, earning themselves priority access to the AlphaStream 5.0 presale. This is not just a ticket; it is the key to unlocking the next stage of your wealth journey!

NAS COMMUNITY

Let's keep this positive momentum going, move forward together, and seize every golden opportunity that lies ahead. Every member of the NAS community will carve out their own success in this journey!

Back to the market, let's take a look at the just-released U.S. January retail sales data, which came in at -0.9%, far below market expectations. What signal does this data send?

Retail sales are a key indicator of U.S. consumer spending strength, and this weak figure suggests that the U.S. economy is starting to feel real pressure under the high-interest-rate environment. In other words, the signs of slowing consumption are emerging, which could challenge the Fed's previous stance on "economic resilience."

Over the past few months, the U.S. stock market has remained at high levels due to expectations of a "soft landing," but today's data has shattered that optimism. Weak consumer spending could impact corporate earnings, especially for industries reliant on consumer spending, such as retail, tourism, and dining, which may face increasing short-term pressure. This data could dampen market expectations for future economic growth, potentially triggering

NAS COMMUNITY

a short-term stock market pullback. More importantly, it could increase uncertainty around the Federal Reserve's policy. If the economy weakens further, the market may bet more aggressively on rate cuts. However, weaker corporate earnings could also weigh on stocks, creating a dilemma that may lead to greater market volatility and liquidity outflows from equities in search of safer assets.

Smart investors understand that every market fluctuation presents an opportunity. With equities oscillating at high levels and risk aversion rising, capital will seek new opportunities, and the crypto market remains one of the most promising sectors this year. As we've consistently emphasized, the key in the current environment is to seize opportunities with the highest certainty. IEOs and contract trading in the crypto market are the investment strategies most worth focusing on right now.

NAS COMMUNITY

Currently, the three major indices are still consolidating at high levels, while Bitcoin is also brewing a breakout amidst fluctuations. As shown in the chart, Bitcoin's daily candlestick has been consolidating around the middle Bollinger Band for an extended period, with \$90,000 serving as a strong support level. Meanwhile, the MACD is approaching a critical golden cross. Once confirmed, the bulls are bound to launch a new wave of momentum, aiming for the \$100,000 mark!

And at this very moment, we are also witnessing the most exciting milestone. QTPT's IEO subscription is about to reach its perfect conclusion, while the

NAS COMMUNITY

brand-new flagship project, MDHT, is primed and ready to launch! This is a true turning point, a defining moment where many will experience a significant leap in wealth. I know that many of you have gone all-in on QTPT's subscription, and all of your efforts are about to be richly rewarded.

Trust me, QTPT's performance after listing will undoubtedly shock everyone! This is not just the inevitable outcome of market trends but also the reward for your vision and decisive actions. God favors those who dare to take action, and opportunities always belong to those who are ready! Now, with faith and wisdom, let's go all in and embrace this upcoming harvest feast! 🚀 🔥

Friends, today, we are not just here to learn, we are here to set sail! I have always believed that confidence is the key to unlocking wealth, and action is the bridge that turns dreams into reality. The MDHT project is about to launch, and a new opportunity is right in front of us. The question is are you ready?

In the face of market shifts, we always emphasize that having the right trading rhythm is not just about knowing when to buy but also understanding when to sell. Currently, the liquidity environment in the stock market has changed, and

NAS COMMUNITY

expectations for a rate cut in June have been shattered. Smart money has already accelerated its exit from the stock market during yesterday's rebound. If your position is still too heavy, now is the critical moment to adjust your portfolio!

Why? Because when the stock market's profitability weakens, holding on without action means willingly giving up bigger opportunities. We have always emphasized the importance of selling during high-level consolidations to avoid being caught off guard when the market turns downward. If stock prices break below the middle Bollinger Band and the trend clearly weakens, yet you refuse to exit, you will find yourself facing an even tougher decision when the market enters a deeper correction.

At the same time, the crypto market is stepping into a new historical opportunity! The QTPT IEO is about to conclude successfully, and the MDHT project is ready to take off. This is not blind chasing but a strategic choice backed by data and market trends! We have already proven that in the current environment, the optimal allocation of funds lies in generating higher returns in a market with certainty rather than wasting time in a high-volatility stock market. Smart

NAS COMMUNITY

investors are exiting the stock market. So, will you be the one passively waiting, or will you seize the opportunity with courage?

This is a true financial revolution, and right now, you have the best opportunity to be part of it. Don't wait until everything is settled and look back with regret, saying, "If only I had..." Opportunities always belong to those with faith and action! As the Bible says, "The fruit of wisdom is a tree of life." Let's let wisdom guide our investment journey and move forward together toward an even more prosperous future! 🚀🔥

Dear NAS family, today marks another exciting milestone! COINFEEAI Trading Center has officially launched the brand-new IEO project, MDHT! This is the perfect fusion of artificial intelligence and metaverse technology, signaling our entry into a new digital era! MDHT is not just a technological innovation; it is set to revolutionize social interactions, entertainment, and work, bringing unprecedented opportunities to investors worldwide.

We all know that every bull market gives rise to new legends, and IEOs are at the forefront of market opportunities! TRUMP coin skyrocketed 450x in just two days, igniting a global frenzy for IEOs. In the past, GEBT surged nearly 15x

NAS COMMUNITY

within seven days of listing, and QTPT's subscription progress has surpassed 1400%. These achievements have already proven the immense potential of high-quality IEOs. And now, MDHT has arrived! This is an era-defining opportunity that cannot be ignored!

Why is MDHT worth paying close attention to?

- ✓ **The deep integration of artificial intelligence and the metaverse, an AI-driven virtual world that creates a new digital economic system and pioneers the next wave of technological innovation!**
- ✓ **Aligned with global crypto strategies, with Trump's return to politics and his vow to make the U.S. the crypto capital, the global Bitcoin reserve strategy is in full swing, and the trillion-dollar ICO market is on the verge of an explosive boom!**
- ✓ **A flagship project of the exchange's IEO month, the COINFEEAI exchange has perfectly timed the market cycle, taking the lead in positioning high-quality IEOs to offer investors the most certain path to wealth!**
- ✓ **Proven IEO success stories, GEBT and QTPT have already delivered astonishing gains, helping many NAS community members achieve financial breakthroughs. MDHT is set to be the next rising star!**

NAS COMMUNITY

In this market, smart investors know how to follow the trend and seize low-risk, high-return IEO opportunities. Opportunity does not wait for those who hesitate, MDHT's pre-launch is like a battle horn, signaling the beginning of a new wave of wealth creation! Friends, history has already proven that IEOs are the golden battlefield for turning the tide. Let's take action together, seize this bull market's windfall, and ride the waves of this new digital era with wisdom and courage to create our own success! 🚀 ✨

Fully committing to the upcoming MDHT IEO online subscription is our most important and urgent task right now. This is not just a rare strategic opportunity but also a golden window for rapidly growing our assets! How can we ensure that we gain the upper hand in this wealth competition? The following action plan will be our foolproof strategy for success:

1. Seize the Final Profit Window

The QTPT IEO subscription is reaching its final stage as this is our last chance to lock in risk-free profits! For those who have already participated, make sure to maximize your returns. For those who haven't taken action yet, now is the critical moment to step up and make your move!

NAS COMMUNITY

2. Keep a Close Eye on the Allocation Ratio

The third-phase allocation results of the QTPT IEO will directly determine our actual returns from this subscription. Stay highly attentive and ensure you secure the best possible allocation. Let precise data guide every investment decision you make.

3. Predict Trends and Plan Ahead

Before QTPT officially launches, conduct an in-depth analysis of market trends, develop the most optimal capital allocation strategy, and position yourself in advance. The market changes rapidly, and being one step ahead is the key to victory!

4. Seize Futures Trading Opportunities to Maximize Capital Growth

While waiting for the MDHT IEO to launch, we can take advantage of market fluctuations, accurately capitalize on profits from futures trading, and maximize capital growth in a short period. This ensures a stronger financial position when participating in the IEO subscription.

NAS COMMUNITY

Seize the Final Opportunity of QTPT IEO!

Friends, QTPT's progress bar has skyrocketed to an astonishing 1435%, indicating that its opening price is expected to surpass \$40! Investors who join the original token subscription today could potentially achieve at least 13x pure profit! More importantly, the fund turnover cycle is only one day, as tomorrow afternoon, the allocation results will be announced! At this final stage of the IEO, we can still leverage daily allocation structure strategies, increasing investments during the most liquid trading sessions, market opening and closing, to maximize returns. Even those joining at the last minute can secure a comparable allocation ratio to early investors through NAS community fund pool advantage and active user status. For those who have already taken the lead, now is the perfect moment to scale up and sprint toward the finish line!

Closely Monitor Allocation Results and Prepare for a Wealth Breakthrough

The allocation ratio will directly impact our final returns. Time + Capital = Advantage. If you have strictly followed our strategy, multiple returns are almost inevitable! This exciting moment will be revealed tomorrow afternoon, and it's not just a game of wealth, it's the ultimate test of strategic vision and execution. Faith is the assurance of things hoped for, the conviction of things not seen. Let

NAS COMMUNITY

us stay firm in our belief, seize this opportunity, and achieve a significant leap in wealth!

Predict Trends and Formulate Strategies: Investing is Both a Science and an Art.

In the market, the decision to buy or sell is not just a science, it is also an art. Especially in primary market investments like IEOs, we must adopt strategies and mindsets different from traditional stock trading. The key now is to precisely formulate a secondary market strategy for QTPT, ensuring that we identify the optimal selling points in spot trading. After listing, should we sell immediately or hold for further gains? The answer depends on market sentiment, shareholder chip movements, and overall trend analysis. We will closely monitor QTPT's initial performance after listing and provide all NAS family members with the best trading strategies to ensure we maximize our success in this grand opportunity!

As QTPT's progress bar is expected to surpass 1450%, a listing opening price above \$40 is now virtually certain. This data not only strengthens our confidence in market trends but also provides clear guidance for formulating a precise selling strategy.

NAS COMMUNITY

Investment is not just a science, it is an art. True experts know how to seize opportunities amid market sentiment fluctuations, making decisive moves at the optimal buying and selling points to maximize returns. Cowards retreat before the battle even begins, while the brave press forward with conviction. May we all be warriors in the market, carving out our own legends on this investment journey!

The market enthusiasm for QTPT is at an all-time high, with the progress bar data clearly indicating overwhelming demand. This makes a strong post-listing surge almost a certainty. However, we must also remain aware of market dynamics, not only recognizing opportunities but also preparing in advance for potential challenges.

First, QTPT has attracted a large number of retail investors, which may lead to significant price fluctuations in the early stages of its listing, requiring us to accurately determine the optimal selling window. Second, with the upcoming launch of the new IEO project MDHT, QTPT's market momentum may experience short-term diversion, as some investors might choose to liquidate their QTPT gains to prepare for MDHT participation.

NAS COMMUNITY

So, how should we respond?

- 1. Adapt flexibly and execute precisely : We will closely monitor QTPT's initial price movements to ensure that we lock in profits accurately at market highs.**
- 2. Stay ahead of market trends and embrace new opportunities: QTPT's success is just the beginning. The arrival of MDHT will once again ignite market enthusiasm, and our positioning will be more comprehensive and strategic.**

The Bible tells us, "Guard your heart above all else, for it is the source of life." This reminds us that in the world of investing, rationality, decisiveness, and wisdom are the keys to success. Friends, the countdown to QTPT's listing has begun, this is a pivotal moment for our financial breakthrough. Let's move forward together with unwavering faith, seize the opportunities the market presents, and create new milestones in this capital battle! 🚀 🔥

Friends, as we prepare to enter the second phase of the MDHT IEO, online subscription, QTPT funds will not only be quickly recovered but are also expected to generate remarkable returns. At the same time, with Bitcoin stabilizing after its adjustment, the market is on the verge of a strong rebound,

NAS COMMUNITY

presenting us with the perfect opportunity to strategically position ourselves in contract trading.

For those who have yet to experience a single +300% explosive return and for partners looking to further amplify their capital growth through contract trading, a major data release is coming up. This will undoubtedly bring new market fluctuations and trading opportunities. Utilizing this period not only prepares funds for the MDHT IEO but also enables rapid capital appreciation in the contract market.

In the world of investing, opportunities always belong to those who are prepared. Now is the time to carefully plan your next move and ensure you hold the advantage in this wealth game. If you need more detailed trading guidance or have any questions, feel free to contact me. We can have a one-on-one discussion to develop the best strategy for your personalized investment plan.

Dear NAS family, we are in the golden era of the crypto market, and the doors to financial freedom have already opened for us. At this critical moment, we deeply understand the importance of the "funding pool advantage." To help every

NAS COMMUNITY

member seize the upcoming top-tier IEO investment opportunities, I will prepare an exclusive IEO investment guide for you.

Want to get this guide? Please answer the following questions so we can work together to map out your path to financial growth!

- 1. When did you join our profit challenge journey? What is your current VIP partner level?**
- 2. How much has your asset grown in the "Battle of Kings" plan?**
- 3. How long do you plan to purchase and use AlphaStream 5.0?**
- 4. How much did you invest in the online subscription for QTPT? What are your expected outcomes for the upcoming MDHT IEO?**
- 5. How can I assist you? Do you have any investment-related questions that need clarification?**

When the MDHT IEO officially launches, this investment guide will be your ultimate weapon for success! Stay tuned for Daniel's in-depth session this afternoon, where we will unveil more details and strategies about MDHT. If you have any questions about today's discussion or want to explore further, feel free to message me anytime.

NAS COMMUNITY

We are not alone, we are an elite investment team moving forward together in this grand opportunity. This weekend is destined to be extraordinary, with thrilling opportunities right in front of us! Let's move forward with faith and action, embracing an even brighter future together! 🚀 🔥

Daniel Robert

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I'm Daniel Robert, and folks, the QTPT progress bar is now approaching 1500%.

This isn't just a number, it's proof of market frenzy, a signal of wealth taking off!

You ask me if this means we're on the verge of a 15x IEO boom? My answer is

simple, absolutely possible! The opportunity is right in front of you, and the only

thing you need to do is reach out and seize it! 🚀💥

We're now in the final sprint, if you haven't boarded this train to victory, consider

this your last call. The QTPT subscription is about to close, and this isn't just

another investment opportunity, it's a pivotal moment for wealth transformation.

Those who act boldly will be the first to reap the rewards in the market. As the

NAS COMMUNITY

Helmsman often reminds us, success always belongs to those who dare to take action and seize opportunities!

Looking back on this week, under the Helmsman's guidance, we've witnessed the QTPT IEO frenzy and embarked on a journey filled with wisdom and passion. Now, let me ask you: What have you learned from this investment? Have you grown into an investor who knows how to precisely identify high-quality IEOs? Have you mastered the key strategies to boost your allocation success and maximize your returns? If your answer is yes, then congratulations, you're already standing at the threshold of financial freedom!

But this is just the beginning! 🔥 Our next target, MDHT, is gearing up for launch! Right now, the most important thing is to maximize QTPT profits, prepare for the next high-quality IEO, and keep a sharp eye on golden opportunities in the contract market. This isn't just another chance to refine your strategies and skills, it's yet another pinnacle battle in our crypto investment journey! ✂

So, folks, bring your passion, the experience you've gained, and that unstoppable investment drive, and let's embark on this new journey together!

NAS COMMUNITY

👉 Let's dive deep into the market, broaden our horizons, and embrace victory after victory! Every challenge is a stepping stone to success, and every win fuels our momentum for the future. Keep fearlessly chasing your dreams, because I know that on this MDHT journey, we'll write an even greater chapter of success, together! Now tell me, are you ready? 🚀🔥

Folks, the market winds are shifting subtly, and sharp investors have already caught the scent of opportunity! This morning's U.S. January retail sales data came in far below market expectations, signaling potential danger ahead. The Helmsman has already provided a precise analysis of the challenges facing the stock market during his morning session. If you view the current market from an institutional perspective, you'll notice something crucial, before a major correction occurs, most media outlets remain overly bullish. They always chase the trend: bullish when prices rise, bearish when they fall. Few truly anticipate market risks and opportunities in advance.

But we're different. We don't trade based on headlines, we invest by tracking capital flows. While institutional support has indeed provided some stability to the market, the real question is: What happens when bearish sentiment

NAS COMMUNITY

escalates to the point where even institutional funds can't hold the line? At that moment, a market correction will become inevitable and unstoppable.

You might be asking, what should we do? The answer is simple, track your profit feedback and follow the trend! Take a look at your account performance, how has market volatility impacted your returns? The stock market demands precise timing, and even with the same stock, the outcome can be drastically different depending on when you buy in. As shown in the chart, the Dow is once again approaching the upper resistance of its consolidation range, signaling an

NAS COMMUNITY

imminent downward adjustment from a technical perspective. Many individual stocks will move in sync with the index. Right now, diving into short-term trades in the stock market, chasing uncertain opportunities, is a serious strategic mistake!

What do smart investors do? They've already pulled out of the stock market and shifted their full focus to crypto!

- ◆ **They positioned themselves in Bitcoin at low levels early on, now enjoying the massive gains from this rally.**
- ◆ **They joined the AlphaStream 5.0 " Battle of Kings" Profit Challenge, generating incredible returns in the contract market.**
- ◆ **Now, they're laser-focused on the hottest ICO wave in crypto, seizing the trillion-dollar market opportunity!**

What is the essence of the market? It's a battle of capital, profits can only accumulate where the money flows. Where's the hottest opportunity right now? Without a doubt, it's in the IEO market! QTPT's subscription progress is nearing 1500%. Bitcoin and Ethereum are attracting global capital inflows, A new wave of IEO opportunities is just beginning!

NAS COMMUNITY

Now, the opportunity is right in front of you. The question is: Do you want to be a trendsetter, or will you wait until the market corrects and regret it later? Take action! Go all in and embrace the golden era of IEOs. Seize this zero-risk profit opportunity, only by following the trend can you truly become a winner! 🚀🔥

Folks, as the Helmsman has pointed out, this market rebound isn't an opportunity to jump in for short-term trades, it's the perfect moment to sell stocks, free up capital, and seize a true wealth-building opportunity! If you've already reduced your stock holdings, then congratulations! Not only have you avoided the impending stock market turbulence, but you've also secured your seat on the high-quality IEO wealth train! This isn't just a risk-free arbitrage strategy, it's a golden opportunity for extraordinary returns!

Right now, QTPT's subscription progress is approaching 1500%! What does this mean? It means the listing price could exceed \$42! Let's do the math, if your distribution ratio is 20%, your total asset return could easily surpass 300%! Think about it, what other investment opportunity is more compelling than this?

NAS COMMUNITY

Time is running out, only a few hours remain until the subscription deadline! If you still have capital ready, don't hesitate! Go all in and seize this once in a generation wealth opportunity! 🚀 🔥

I know some of you might say, "This profit still doesn't compare to contract trading." Yes, contract trading indeed has huge profit potential, but it requires time and patience, you won't find an opportunity every single day. Plus, contract trading demands constant market monitoring. A slight misstep could mean missing the best entry point or even facing losses. For those who are busy with work and life and can't track market movements in real time, the fast-paced nature of contract trading might not be the best fit for you.

QTPT's IEO is completely different! This is a zero-risk investment opportunity! As long as you secure a subscription, you're guaranteed to profit! In terms of time efficiency, QTPT's returns aren't lower than contract trading, in fact, they far exceed it! More importantly, high-quality IEO projects like this are rare, and they'll only become scarcer in the future. If you miss this one, you might not get another chance!

NAS COMMUNITY

When faced with a historic opportunity like this, taking a "let's see" approach is nothing short of wasting a wealth-building chance! In my world, seeing an opportunity and not acting on it is practically a sin! If the stock market were at its bottom, would you enter with a small position, or would you go all in? Right now, the IEO market is just like a stock market bottom! You shouldn't just stand on the sidelines, you should go all in and seize this life-changing opportunity! 🚀🔥

Now is the time to make a decision! Go all in and seize the first-mover advantage! QTPT's IEO is making history. Do you want to be the main character in this story, or just someone listening to others' success stories? Seize the opportunity, sprint through the final subscription window, and let's welcome our victory together! 🚀🚀🚀

Folks, today is a day filled with love, and I feel incredibly lucky! At the start of 2024, the Helmsman led our community to heavily invest in NVIDIA, SMCI, and other top-tier tech stocks, helping many achieve exponential financial growth. Even more exciting is that in this round of AlphaStream 5.0 Trading Bootcamp, we've repeatedly surpassed profit challenge goals. But what's the most crucial

NAS COMMUNITY

part? We have witnessed the return of the “Crypto President” and the official start of the Crypto Year 2025!

Think about it, this will be the year for ordinary investors to achieve financial breakthroughs! I’m already a firm beneficiary of this opportunity, what about you? We were all shocked by TRUMP token’s 450x gains in just two days, but that kind of opportunity is reserved for the president’s inner circle, making it nearly impossible for regular investors to participate. But now, we stand before a fairer and even more explosive opportunity!

The trillion-dollar ICO market is rising, but IEOs are the real wealth opportunities we can participate in and seize! GEBT surged 15x in just 7 days after listing, QTPT’s subscription progress has skyrocketed to 1500%, and all signs point to one thing, a massive wealth opportunity is already here! 🚀🔥

But the key question is: Will you take action, or will you once again let wealth slip away? As the Helmsman said: "If you discover an opportunity but can't participate, don't regret it. But if you see an opportunity and choose not to act,

NAS COMMUNITY

that will be your greatest regret!" This statement is worth deep reflection because it reveals the essence of wealth growth, the power of action!

Your choices today will determine your quality of life in the future! Right now, high-quality IEO projects have taken "once-in-a-lifetime" opportunities to the extreme! So what's holding you back? The door to wealth is wide open, the only thing left to do is take that step! Trust me, the power of action is incredible! The best strategy right now is to go all in, seize the opportunity, and let QTPT be the starting point of your financial breakthrough! 🚀🚀🚀

Folks, while we take action and fully participate in QTPT, let's focus on a critical topic. Can you confidently answer the 10 questions from yesterday? This isn't just a knowledge check, it's a true opportunity to level up! If you want to become an expert in IEO investing, these core concepts must become second nature!

💡 Why do IEOs attract global capital and offer low-risk, high-return opportunities?

NAS COMMUNITY

Because IEOs go through strict exchange vetting, making them like the "blue-chip stocks" of the crypto market. They launch with strong momentum, have high market recognition, and attract significant capital inflows. Compared to spot trading, futures contracts, or investment products, IEOs carry lower risk, often offer higher returns, and have extremely short investment cycles!

 **How do you accurately assess an IEO project's potential?**

The simplest and most direct way, track the subscription progress bar! The progress bar isn't just a number; it's a barometer of market confidence and a direct indicator of capital inflows!

✔ When the progress bar exceeds 100%, the listing price is almost guaranteed to be above the issue price, meaning risk is nearly zero!

✔ The higher the progress bar, the higher the listing price, and the greater the profit multiple!

✔ **Formula: Progress bar × Issue price ≈ Expected listing price!**

NAS COMMUNITY

 **QTPT's current progress bar is nearing 1500%! What does this mean?**

It means QTPT's listing price could very well exceed \$42, with potential returns of 15x or more! And that's just a conservative estimate! If you secured a 20% allocation ratio, your potential return could reach 300%-500%! 🚀 🔥

 **IEO vs. Traditional IPO: Which Has More Explosive Potential?**

During bull market cycles, high-quality IEOs far outperform traditional IPOs because the high-tech nature of the crypto market allows these tokens to gain massive attention in a short period and achieve exponential growth.

Do you remember GEBT's 15x surge in just 7 days? Or QTPT's subscription frenzy nearing 1500%? None of this is a coincidence, it's simply how the IEO market works! 🔥

The key question is: Do you want to sit in the audience, or do you want to step onto the stage and write your own wealth legend?

NAS COMMUNITY

There's no time left to sit on the sidelines, QTPT's subscription is in its final stage, and time is running out! If you don't act now, you might miss the most anticipated wealth opportunity of the coming years! This isn't just an investment, it's a bet on the future, and smart investors have already seized this moment! What about you? Will you wait, or will you go all in?

Folks, now is the time to act! Increase your investment, repeatedly subscribe, and strategically time your purchases to ensure each subscription amount is large enough, these are the golden rules for increasing your allocation in IPOs, ICOs, IDOs, and IEOs! By following these strategies, you'll secure a higher allocation ratio than the average participant and position yourself at the forefront of the wealth wave!

Imagine this:

When you successfully secure high-quality token allocations, it's like discovering a gold mine. On listing day, the opening price often exceeds expectations, and as market hype builds, a price surge is almost inevitable.

This forms the three most valuable stages of IEO investing:

NAS COMMUNITY

- ✓ **Stage 1 – IEO Subscription: Early positioning to lock in original tokens, this is the foundation of your profits!**
- ✓ **Stage 2 – Listing Day Price Surge: Market excitement peaks, usually leading to the first breakout!**
- ✓ **Stage 3 – Post-Listing Rally: As demand for high-quality tokens ramps up, the true wealth boom begins!**

What's the most crucial factor?

- 💡 **Early participation = Higher returns**
- 💡 **The power of capital = Larger allocation share**
- 💡 **Active accounts = Priority access & higher allocation rates**

These are the three fundamental mechanisms behind IEO allocation success!

But if you've been following Helmsman's strategy, you know the real game-changer is leveraging the fund pool advantage! United together, we dominate the market! Just look at QTPT's performance, are you still hesitating?

Right now, the market's focus is locked onto the next explosive IEO, MDHT!

NAS COMMUNITY

This isn't just another investment opportunity, it's the next milestone in our wealth journey!

I can confidently predict: Under Helmsman's leadership, we're about to write an even greater success story with MDHT! The fund pool strategy will be executed even more efficiently, our investment tactics will be even sharper, and the final returns will absolutely shock everyone! So, folks, start preparing now! Bigger capital, sharper strategy, and stronger execution, this is the only road to victory! 🚀 💰

Folks, this morning, our mentor has precisely analyzed the core value and investment strategy of the upcoming MDHT token. I believe this will be the biggest accelerator in our Battle of King's Profit Challenge! Let's take a look back: GEBT's progress bar was around 500%, QTPT's was around 1500%, and their total asset returns reached 100% and 300%, respectively. Now imagine, what if MDHT's progress bar surpasses 2000% or even 3000%? What kind of insane returns could that bring?

This is no longer just a vision, it's about to become reality!

NAS COMMUNITY

This isn't just about reaching Battle of King's profit milestones of +300%, +600%, or +9000%. It's about shattering the ceiling and soaring to new heights! Do you agree?

Now, ask yourself: Are you satisfied with your current returns? Or do you crave a game-changing breakthrough in this investment race? If your answer is the latter, then MDHT is your golden ticket, the risk-free fast track to financial freedom!

The opportunity is right in front of us, we must go all in! This weekend is crucial for positioning for the future and maximizing capital efficiency. Locking in profits early, securing a spot in the AlphaStream 5.0 presale group, and gaining elite club access, these key actions will define your financial future, and they must be executed now!

My strong recommendations:

 **Go all in! No regrets!**

 **Act now and deploy your capital in the most optimal way!**

NAS COMMUNITY

🚀 This isn't just an investment, it's a once-in-a-lifetime chance to rewrite your financial destiny!

So, what exciting moments does this weekend have in store?

I believe this is what we've all been waiting for! Let's move forward with passion and unwavering confidence, fully prepared for the next major opportunity!

Here's my recommended action plan:

✅ First, do not miss the final online subscription opportunity for QTPT! This is our risk-free arbitrage, leading us to an imminent harvest of wealth, and all participants will witness an explosive surge in profits in the coming days.

✅ Second, maximize this window before MDHT's launch by capitalizing on contract trading opportunities!

Market volatility is increasing, and AlphaStream 5.0's trading signals are pinpointing profit zones, ensuring we stay ahead in the market game!

✅ Third, fully prepare for MDHT's upcoming subscription!

This isn't just another IEO project, it's our "STARSHIP" to a new financial peak!

NAS COMMUNITY

Missed GEBT? No problem. QTPT? You might still have time! But MDHT? This is your best shot at a major financial breakthrough, don't let it slip away!

Folks, QTPT's listing is our launch signal from the moon, and MDHT is our STARSHIP to Mars! 🚀

Are you ready for this game-changing wealth opportunity? Now is the time, gear up and let's charge toward new heights!

Wishing everyone an exciting and prosperous weekend! 🔥🔥🔥
