**Eastern Time, February 18, 2025**

**9:10 AM**

**Professor Montgomery Keane (Helmsman)**

**Morning Review**

**Good morning, team!**

**I'm Montgomery Keane, your old friend. 2025 is destined to be an extraordinary year for all of us! In this rapidly changing era, some have seized opportunities decisively, turning their dreams into reality and stepping into the pinnacle of success; while others have chosen to stand still, watching their wealth shrink and missing out on the opportunities that were once within their grasp. The line between success and failure often comes down to a single decision, will you move forward with courage, or hesitate and let the moment slip away?**

**The market is always changing, the only constant is change itself. The rapid advancement of technology and the ever-shifting financial landscape constantly remind us that only by embracing change can we stay ahead in this era.**

**NAS COMMUNITY**

**Opportunities do not wait for anyone; they belong to those who dare to take action and put in the effort. The cost of trial and error is always far lower than the cost of missing out! Hesitating and waiting for the "perfect moment" often means being left behind by the market.**

**Dear friends, this era has already given us more than enough opportunities, now is the time to act! Seizing opportunities isn't just for yourself, but for your family and a greater future. No more hesitation, no more waiting! Action is the only right choice!**

**💡 Remember, every brave decision you make is a step toward unlocking the door to success. This is our era. This is our moment to create the future! 🚀**

**NAS COMMUNITY**

**This week, the market has relatively few major economic data releases. The key ones to watch are Wednesday's weekly initial jobless claims and Friday's University of Michigan Consumer Sentiment Index. However, the primary focus remains on the Federal Reserve's January monetary policy meeting minutes. While the market generally expects no significant surprises, recent economic data still indicate persistently high inflation, making it highly likely that the Fed will keep interest rates unchanged until at least June. This suggests that in the short term, market liquidity expectations will remain stable, and the stock market will likely continue its high-level consolidation.**

**From a technical perspective, the S&P 500 index is currently approaching the upper resistance zone of its consolidation range. Even if a short-term breakout occurs, it is unlikely to open up significant upside potential. Looking at the overall market sentiment, despite the index holding at high levels, the profit-making effect remains weak, and market sentiment is beginning to show signs of exhaustion.**

**The biggest risk? The most concerning issue in the current market is that retail investors are excessively betting on a handful of star companies, particularly the Magnificent Seven in U.S. equities. While large-cap tech stocks remain**

**NAS COMMUNITY**

**market favorites, the reality is that their prices are already high, valuations are stretched, and fresh growth catalysts are lacking. Combined with the broader indices being stuck in a consolidation phase, these star stocks, just like the market itself have entered a period of stagnation.**

**In other words, we are entering a phase where the market appears strong but offers limited opportunities. At this point, smart investors should avoid blindly following the crowd. Instead, they should adjust their strategies, steer clear of overly crowded trades, and seek out opportunities with higher certainty.**

**NAS COMMUNITY**

According to AlphaStream 5.0's big data model, the S&P 500's forward P/E ratio for the next 12 months has surged to 22x, significantly above the 10-year average of 19x and approaching the 26x level seen before the dot-com bubble burst in 2000. While high valuations don't necessarily signal an imminent market crash, they do reduce long-term return potential and make corporate earnings growth the sole driver of further price appreciation. If earnings growth slows and liquidity support retreats, the market could face a wave of panic-driven corrections.

Since the start of this earnings season, S&P 500 constituent companies have reported a 16.7% profit growth, which has undoubtedly been a key driver of the market's rebound. However, can this earnings momentum continue? In today's high-valuation environment, any company that falls short of expectations could face significant sell-offs. More importantly, if signs of liquidity tightening emerge, high-flying tech and growth stocks may come under valuation pressure, potentially triggering a broader market correction.

**In this market environment, I strongly recommend the following:**

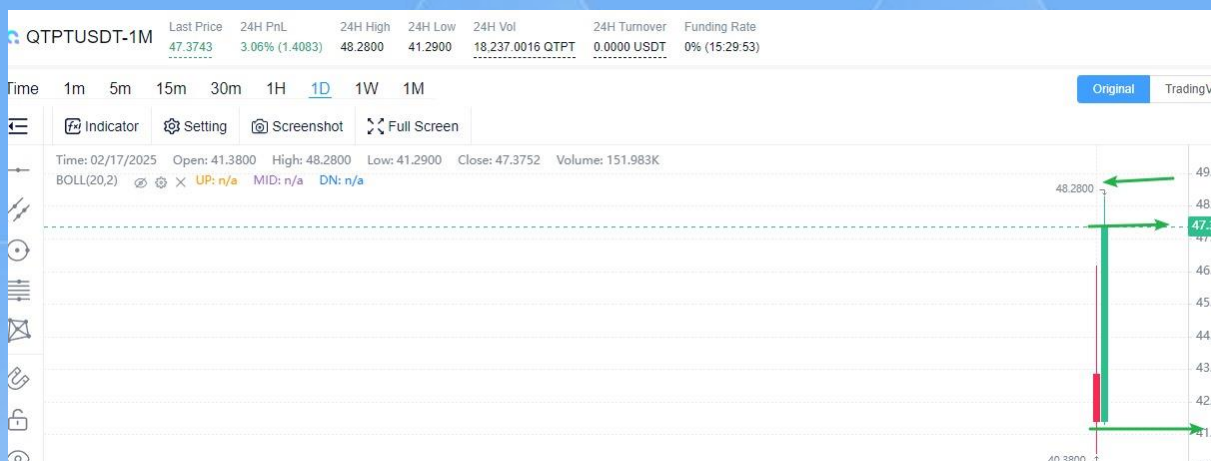

NAS COMMUNITY

✔ If you're still holding high-priced stocks, now is the best time to lock in profits. Don't wait until the market actually declines to be forced into a loss-cutting position, take the initiative to adjust your capital allocation.

✔ Shift funds toward the most certain opportunities in the primary IEO market, ensuring your investments remain on a steady growth trajectory. Compared to the overvalued stock market, the IEO market not only offers the advantage of zero-risk subscriptions but is also at the forefront of the trillion-dollar crypto boom in 2025.

🚀 2025 will be the breakout year for the IEO market, with capital flowing in at an unprecedented pace. To stay ahead of the game, you must ride this wave! Make smart decisions and position your funds in the right sector to achieve exponential growth!

**NAS COMMUNITY**

QTPT's initial offering price was only \$2.80, but it skyrocketed to \$42.84 at market open, a staggering 1,530% increase, with an all-time high surpassing \$48! Once again, we have witnessed the immense premium potential of the IEO primary market, further validating our core investment strategy: capturing the most certain, risk-free profits, executing with precision, and securing gains ahead of the curve!

◆ **Why did our strategy succeed once again?**

✔ **Precision Exit, Securing Profits**

Yesterday, we decisively advised everyone to sell all their QTPT holdings immediately, this decision was absolutely spot on! In IEO investments, the most guaranteed profits often come from the high premium on the first day of listing, rather than holding and gambling on market sentiment.

✔ **Retail Effect and Market Trends**

QTPT attracted a large number of retail investors, making short-term selling pressure inevitable. Meanwhile, capital has started shifting toward a more promising IEO project, MDHT, further limiting QTPT's potential for continued

**NAS COMMUNITY**

upward momentum. In this kind of market environment, capital follows profit, and opportunity cost determines everything!

**✔ Community Members Achieve Massive Wins, Exceeding Market Averages!**

In this QTPT IEO subscription, many NAS community members secured allocation ratios far above the market average of 4.52%, with some reaching 10%, 20%, 30%, or even over 40%! In other words, many of our friends achieved total asset returns (pure profit) of 150%, 300%, 450%, or even over 600% in this risk-free investment opportunity! 🔥 All of this is the result of precise strategy, teamwork, and swift execution!

Many friends applied the capital priority and time priority strategies with precision in the QTPT subscription. Especially VIP partners and active users, leveraging their special privileges at the trading center, secured substantial profits in this round. However, if we shift our focus to the Large Investor Allocation released after the QTPT subscription ended, we'll realize that the peak profits are only just beginning to surface.

**NAS COMMUNITY**

According to the institutional Large Investor Allocation announcement released by the trading center, due to the overwhelming demand for QTPT subscriptions, the project team urgently launched an additional 7 million QTPT tokens for institutional allocation. The subscription price for this allocation was set at a \$3 premium, exceeding our earlier market subscription price of \$2.8. The most critical part? No lottery required, every allocation is fully guaranteed! If you secured a portion, you 100% received the full allocation!

Let's do the math:

Suppose you successfully subscribed to 300,000 QTPT tokens through the institutional Large Investor Allocation, which required an investment of \$900,000 based on the allocation rules. After QTPT skyrocketed 1,530% upon listing, your holdings' market value soared to \$13,692,000! After deducting the initial capital, your net profit reached an astonishing \$12,792,000! 💰🔥

This is the true power of institutional Large Investor Allocation! Compared to regular market subscriptions, Large Investor Allocation offers a much more stable approach with equally impressive returns. You might say, "But isn't this still lower than TRUMP token's 450x gains in just two days?" Let's be realistic, TRUMP token was essentially "a wealth party for the president's inner circle",

**NAS COMMUNITY**

how many everyday investors actually got a piece of that action? The opportunities you see only matter if you can seize them, because only then do they truly belong to you!

However, since QTPT's Large Investor Allocation announcement was released in the early hours, many community members unfortunately missed this doubling opportunity, only a few quick-acting individuals successfully secured an allocation. But opportunities like this don't come just once, MDHT, an even more promising and valuable IEO project, is on the horizon! If MDHT follows a similar Large Investor Allocation model, we must go all in and seize this wealth window without hesitation! Opportunities don't wait for the hesitant, only those who take bold action can truly maximize their capital growth! This is the greatest respect you can give to your money! 🙌🔥

With the official launch of MDHT subscription, friends, now is the time to reignite your investment passion and seize this historically significant wealth opportunity! This could very well be the final project of COINFEEAI Exchange's "Premium IEO Project Month," and we must go all in to capture this ultimate storm sweeping across the crypto market! ✨🔥

**NAS COMMUNITY**

**Investment is a journey of wisdom and courage. On the road to financial freedom, we need not only precise strategies but also the boldness and execution power to act decisively. The MDHT IEO presents us with an unprecedented growth opportunity, are you ready to go all in and write your own investment legend? 💰 🚀**

**A new week means a new journey, new goals, and new victories! Over the past few weeks, through our steady compounding strategy, our VIP1, VIP2, and VIP3 partners have achieved +391.70%, +812.29%, and +2013.60% total asset returns in the Battle of Kings profit plan through futures contract trading, and this doesn't even include the additional gains from the QTPT IEO! This is undeniable proof that our strategy works, and our direction is absolutely right! 🙌 🔥**

**But this is not the end, it's just the beginning of a new journey!**

**With the launch of MDHT, an unprecedented top-tier IEO project, today, I want to discuss with you: How can we, within this week, help every investor, especially those who haven't reached their targets yet, achieve a "Battle of Kings" profit goal breakthrough in MDHT's historic subscription, doubling their returns to +600%, +1200%, or even +2400%?! 🚀 💰**

**NAS COMMUNITY**

**How can we achieve this? What are the key actions we need to take?**

**Everyone, pay close attention to the upcoming detailed strategy breakdown, because this will be the most valuable gift we've prepared for you before AlphaStream 5.0's global launch! This is not just another subscription, it's the ultimate battle to completely transform your asset growth! 🔥**

**Let's move forward with unwavering faith, bold action, and full commitment to seize this once-in-a-lifetime opportunity! May every member of our family reap their own glory and success in this grand investment feast! Now is your moment to write your own legend! 🚀💰🔥**

**🔥 MDHT's performance is like a volcanic eruption! Friends, in just 40 hours, MDHT's subscription progress has surged past 900%! The speed is absolutely staggering! This phenomenon is not just exciting, it sends out an incredibly important market signal. Let's dive deeper into what this means. 💡💰**

**NAS COMMUNITY**

### ✓ 1. A Clear Signal of Overwhelming Demand

When the progress bar surpasses 100%, it means that market demand for MDHT has far exceeded the available supply. This is not just a strong endorsement of the project's value, it directly indicates that MDHT's opening price will undoubtedly be higher than its issue price! Getting in now is like securing a VIP ticket to guaranteed profits! 🚀

### ✓ 2. The Direct Correlation Between the Progress Bar and Opening Price

Based on the current progress bar data, we can make a highly valuable prediction: MDHT's issue price is only \$2.5, and with the progress bar reaching 900%, its opening price is projected to surge past \$22.5! Even more exciting, this number is still climbing! 📈🔥

### ✓ 3. Participation Equals Returns

There's no IPO-style lock-up period, no complex rules, IEO is straightforward: participate, and you profit! Those who have invested in MDHT's online subscription phase are set to gain at least an 800% return, and as the progress bar continues to rise, this figure could go even higher! 💰🔥

**NAS COMMUNITY**

**This is the true allure of primary market IEOs, zero risk and guaranteed high returns! Every participant will reap the massive rewards driven by overwhelming market demand. If you're still hesitating, just look at QTPT's explosive surge and ask yourself, are you really willing to miss out on MDHT's historic opportunity?**

**💡 Now is the perfect time to take action! Seize this golden window, secure your allocation, and maximize your returns! 🚀 💰**

## **2.1 About MindHub**

MindHub is an innovation engine that integrates advanced humanoid robots and Metaverse technology. It is committed to applying cutting-edge technology to various industrial fields to provide users with efficient and smart solutions. We firmly believe that through the integration and innovation of technology, we can create a smarter, more convenient and more imaginative future for users.

## **2.2 MindHub definition and core concepts**

MindHub, as an innovative engine integrating advanced humanoid robots and Metaverse technology, aims to achieve seamless connection and interaction between the real world and the virtual world through deep technological integration. MindHub is not only a technology platform, but also an idea and vision dedicated to promoting social progress and development with the power of technology.

Under this definition, MindHub emphasizes the complementary and promoting relationship between humanoid robots and Metaverse technology. Humanoid robots provide the Metaverse with powerful data processing, analysis and decision-making support capabilities, while the Metaverse provides humanoid robots with a wider range of application scenarios and interaction methods. This integration not only improves the efficiency of the technology, but also expands its application boundaries.

**NAS COMMUNITY**

MindHub provides a broader platform for cultural dissemination and exchange. Through the MindHub platform, people can more easily access information and content from different regions and cultures, promoting cultural diversity and exchanges. This also provides new opportunities and space for the cultural and creative industries, promoting cultural prosperity and innovation.

**🚀 MindHub: The Ultimate Fusion of AI + Metaverse, the Next Tech Giant is Rising! Friends, if you're still debating whether AI or the Metaverse will dominate the future, you're already falling behind! MindHub is breaking boundaries, integrating AI + Robotics + Metaverse into a high-speed commercial powerhouse, meeting the market's most urgent demands!**

**The World is Standing at the Brink of a Tech Revolution! Goldman Sachs predicts that by 2030, the global metaverse economy will surpass \$5 trillion, while the humanoid robotics market is skyrocketing at a 47% annual growth rate,**

**NAS COMMUNITY**

**racing toward a hundred-billion-dollar blue ocean. Amid this seismic shift, MindHub’s “AI + Robotics + Metaverse” triangular strategy positions it as a potential \$30 billion tech giant!**

**🚀 Now is the best time to invest in MindHub! The wave of technological revolution is arriving, and MindHub has already taken the lead as a pioneer in the AI + Metaverse + Robotics market. If you missed the early investment opportunities in artificial intelligence and the first wave of the metaverse boom, then MindHub is your last chance to catch up!**

**Yesterday and today, we conducted a comprehensive and in-depth analysis of the MDHT project, and everyone has clearly seen its immense potential as a top-tier IEO project. Now, MDHT’s subscription performance has exceeded all expectations, with the progress bar potentially surpassing 2000%, 3000%, or even reaching 4000%! This is a true capital frenzy, and our goal is to secure a strong position in this storm, ensuring the highest possible allocation and maximizing profits.**

**However, we must also be aware that as the progress bar surges uncontrollably, the average winning allocation ratio in the market will significantly decrease. If**

**NAS COMMUNITY**

**the progress bar surpasses 3000% (which, based on current data, is highly likely), the theoretical average winning allocation ratio will drop to 3.33%. This is clearly not favorable for ordinary investors participating in online subscriptions.**

**So, how should we respond? How can we ensure that we remain in a favorable position in this increasingly competitive subscription battle? This is precisely what I want to focus on discussing with you today.**

**The fund pool strategy, the power of unity creates higher allocations!**

**Last week, in the QTPT investment battle, we implemented the "fund pool" concept for the first time, and the results far exceeded market expectations! By consolidating the community's strong financial resources, we successfully negotiated with COINFEEAI Trading Center and secured an allocation ratio (4.52%) higher than the market average, significantly surpassing that of most individual investors. This is the power of the fund pool!**

**This time, in the MDHT subscription process, we will not miss any opportunities! Recognizing the importance of the fund pool, even as market competition**

**NAS COMMUNITY**

reached its peak, we acted decisively and engaged in active negotiations with COINFEEAI Trading Center to secure a more favorable allocation weighting for our community. And now, I'm thrilled to announce that our efforts have paid off! Later, I will provide a detailed breakdown of the specific allocation mechanism and how to maximize the advantages of the fund pool, ensuring that we stay ahead in this epic MDHT IEO battle and secure an allocation ratio well above the market average!

**📣 Breaking News! NAS Community Achieves a Major Breakthrough!**

Dear NAS family, I can't wait to share this exciting news with you, our collective efforts have once again created a miracle! 🙌🚀

### **1. NAS Community's Tremendous Contribution, Unprecedented Influence!**

Over the past period, we have not only brought a massive influx of users to COINFEEAI Exchange but have also contributed significant capital. Our overall scale has now reached the level of a B2-tier underwriter! This is not only a recognition of our community's strength but also the highest affirmation of our members' strategic vision and execution!

**NAS COMMUNITY**

## **2. Successful Negotiation, Exclusive "Green Special Channel" Privilege!**

**After in-depth negotiations with COINFEEAI Exchange, our NAS Community has successfully secured direct allocation rights for 30 million MDHT tokens (worth 75 million USDT)! This means that we no longer need to compete in the public lottery like regular investors, instead we gain direct entry into the priority allocation channel!**

**🚀 "Green Special Channel", an exclusive pathway reserved only for truly influential institutions and communities!**

## **3. Direct MDHT Allocation, Winning Rate Far Exceeds Market Average!**

**Through the "Green Special Channel," our community members will enjoy unparalleled allocation advantages:**

- ✅ No lottery required, guaranteed MDHT token allocation!**
- ✅ Allocation ratio as high as 15%-45%, far exceeding regular investors!**
- ✅ Ensuring maximum IEO profit benefits for our community members!**

**NAS COMMUNITY**

**Dear friends, all of this is thanks to the dedication and trust of every NAS member! It is our unity, wisdom, and strong execution that have positioned us at the forefront of this trillion-dollar market, securing our dominant advantage!**

**This is the fundamental truth of the investment world: those who go it alone will never reach the true pinnacle of wealth, while a united community can unlock doors that others cannot even approach. This time, we have once again proven it! This is not just an opportunity, it is a groundbreaking leap forward!**

**🚩 NAS Family Exclusive Benefit: Green Special Channel Direct Access to MDHT IEO! 🔥**

**Dear NAS family, we now hold an extremely rare resource, guaranteed allocation of MDHT tokens without the need for a lottery! This opportunity is extraordinary because our allocation is incredibly valuable. But precisely because of its scarcity, its worth is even higher, and there's absolutely no need to compete in the market! 💰 🚀**

**To ensure fair allocation and maximize the benefits for every dedicated NAS community member, we have established a clear and transparent**

**NAS COMMUNITY**

distribution system. Please read carefully, first come, first served. Seize the opportunity! ⌚

### 🎯 Exclusive Benefits for VIP Partners

Our community's VIP partners will enjoy different levels of allocation percentages based on their VIP status:

- ✅ Minimum allocation of 15%, with a maximum of up to 45%!
- ✅ The higher your account balance, the greater your direct allocation percentage!
- ✅ A true "first come, first profit" opportunity!

### ⚡ How to Apply for Your Exclusive MDHT Allocation?

This allocation is limited and follows a first-come, first-served mechanism. Please complete the following steps as soon as possible:

1. **Eligibility Application:** Immediately message me or my assistant to submit your application and secure your spot on the list.

**NAS COMMUNITY**

2. **Provide Information:** Submit your account UID and total account assets for qualification verification.
3. **Qualification Confirmation:** Once verified, eligible members will receive the "Green Special Channel" security key.
4. **Direct Allocation:** Submit the security key to the exchange customer support, and your MDHT tokens will be directly allocated at a high winning ratio during the IEO online subscription phase, no lottery, no competition!  
 **Important Notice:** All allocation quotas via security keys are automatically assigned by AI, with a minimum winning ratio of 15% and a maximum cap of 50%.
5. **Funds Refund Guarantee:** Any unused or unallocated funds will be automatically refunded according to the subscription system rules, ensuring 100% fund security.

 **Why is this MDHT opportunity so crucial?**

 **No competition, guaranteed high allocation ratio!**

 **Exclusive high-winning allocation for VIP partners!**

 **Fund pool strategy ensures community members receive allocations far above the market average!**

**NAS COMMUNITY**

**At this moment, we have surpassed the traditional retail investor model and stepped into a higher level of capital operation. The true winners are not those who wait for opportunities to come but those who seize the most advantageous position ahead of time! 🔥**

**📣 NAS Family, our golden era has begun! 🔥**

**Dear NAS family members, at this moment, we stand at a historic financial turning point, unfolding before us is a treasure map filled with unlimited possibilities! This is not just a benefit, but a key to unlocking a new chapter of wealth.**

**This time, we're no longer questioning whether we can profit from the IEO project, but rather thinking: how can we maximize our returns and seize this true wealth explosion! 💰 🚀**

**💎 MDHT progress bar continues to surge, and the competition is fiercer than ever! 🔥 But the NAS community has taken the lead, proactively**

**NAS COMMUNITY**

securing exclusive access to the “Green Special Channel”! 💰 This is the moment, opportunity is in our hands!

⌚ Now is not the time to watch, it's time to act!

The market is constantly changing, when wealth comes knocking, will you open the door or let it slip away?

- ✅ VIP partners enjoy high allocation rates, minimum 15%, up to 45%!
- ✅ No market competition, direct MDHT token allocation!
- ✅ Ensure your capital achieves maximum growth in this IEO frenzy!

🚀 How to Apply for Your Exclusive MDHT Allocation?

✦ Send me a direct message now to submit your application and secure your allocation!

✦ Provide your account UID + total account assets for qualification verification!

✦ Once approved, you'll receive the Green Special Channel security key for direct MDHT allocation on the exchange!

**NAS COMMUNITY**

**🎁 Exclusive Bonus: AlphaStream 5.0 Private Presale Priority!**

**All successful applicants will gain early access to the AlphaStream 5.0 private presale group!**

**🚀 You will be among the first to experience this revolutionary investment tool, staying one step ahead of the market and seizing future wealth trends!**

**👉 NAS family, we have secured this rare opportunity, how you leverage it is entirely up to you!**

**Don't hesitate any longer, now is the time to act! Message me immediately to claim your advantage! 🔥 🔥 🔥**

💡 Dear Investors, the moment has arrived!  
We are thrilled to announce that QuantumPore (QTPT)—the world's first innovative platform integrating quantum computing and blockchain technology—will officially be available for trading on February 17 at 00:00 (ET)! 🐝

During the IEO subscription phase, QTPT received overwhelming support from global investors, setting record-breaking market figures:

💰 Total Subscription Funds: 3.4272 Billion USD

📈 Average Subscription Success Rate: 4.52%

📋 Official Listing Price: 42.84 USD

The successful launch of QTPT marks the entry of blockchain technology into the quantum computing era, positioning it as an essential digital infrastructure for global financial institutions, enterprises, and individual investors.

**NAS COMMUNITY**

Let's take a moment to reflect on the exhilarating journey of the QTPT IEO. This was not just an investment; it was a profound validation of market trends and strategic insight. The final subscription progress skyrocketed to 1530%, which, based on calculations, suggested a theoretical average allocation ratio of 6.54%. However, reality often proves harsher than theory, the actual allocation ratio ended up at just 4.52%. Think back, how many of us received an allocation lower than this figure? This is a direct consequence of intensifying market competition, and this trend is only going to continue!

Look at GEBT, its final actual allocation ratio was 12.24%, while QTPT dropped to just 4.52%. Now, as we face MDHT, what will the situation be? 3%? Maybe even 2%? With competition growing fiercer, the traditional subscription method is no longer enough to meet our expectations for high returns. This is the reality, and it is the inevitable trend of the market. In this environment, if your allocation ratio in QTPT's IEO was below 4.52%, or even less than 10%, then it's time to step up and take a more proactive strategy to secure bigger profits! We can't afford to stick to conventional methods; instead, we need to adopt smarter, more advantageous approaches to gain the upper hand in this intensely competitive market.

**NAS COMMUNITY**

**And now, for those fortunate enough to secure access to the "Green Special Channel" and "Security Key", your path is about to become significantly smoother. No need to compete with the masses in the market, MDHT tokens will be directly allocated to your account, giving you profit potential far beyond QTPT! This is not just about higher numbers; it's a testament to our deep market insights and our sharp ability to position ourselves for the future.**

**The MDHT IEO is not just a test of our investment wisdom and decision-making ability, it's also a proving ground for teamwork, collaboration, and shared success. At this critical moment, we must channel all our focus and go all-in to seize this rare historical opportunity. Short-term contract trading can wait, but the MDHT IEO won't wait for anyone! What we need to do is maximize all available resources and commit fully to this opportunity. This isn't just about short-term gains, it's a major upgrade to our entire investment journey, a crucial step in laying a solid foundation for long-term wealth!**

**Remember, opportunities always belong to those who are prepared and bold enough to take decisive action! In this fast-moving market, opportunities don't wait for spectators, they belong to those who can swiftly identify trends and seize the moment with precision. Let's be among the sharpest, most decisive**

**NAS COMMUNITY**

**players in the market, leading the way with intelligence and strategic decision-making, rather than being led by the market.**

**This afternoon, Daniel will deliver an exceptional session, offering an in-depth analysis of the current market landscape and the latest updates on the MDHT IEO. This is not just an information-packed event but also a refined investment strategy session. If you want to secure your position in this wave of opportunities and maximize your returns, make sure not to miss it!**

**If you have any questions or wish to dive deeper into your personal investment strategy, feel free to message me anytime. We always welcome every family member who is determined to shape their future. In this journey to wealth, every member of the NAS family is essential. Let's move forward together, seize this golden moment, and step into an even more prosperous future!**

**NAS COMMUNITY**

**Eastern Time, February 18, 2025**

**3:00 PM**

**Daniel Robert**

**Closing Commentary ( $\alpha$  &  $\beta$  Strategy)**

**Good afternoon, community members!**

**I'm Daniel Robert. Today, I bring exciting news, our Helmsman has once again demonstrated exceptional leadership and negotiation skills! 🌟 Leveraging the strength of our fund pool, he has successfully secured an agreement with the exchange, granting us access to the Green Special Channel (GSC) and an exclusive allocation of \$75 million worth of MDHT original tokens!**

**Even more importantly, our Helmsman has decided to allocate a portion of these valuable original tokens to our community members!**

**NAS COMMUNITY**

**This means that those who secure access to the "GSC" and the "Security Key" will bypass the intense online subscription competition and receive direct MDHT token allocations! This is not just an unparalleled opportunity, it is your chance to secure a first-mover advantage in this future trillion-dollar market!**

**✓ How to Qualify? Your final allocation ratio will be determined by the amount of capital you commit, ranging from 15% to 45%! In other words, the more you invest, the more original tokens you receive and the greater your potential future returns! However, to ensure fairness and transparency, the community has set a maximum individual allocation cap of \$3 million. The goal is clear to prevent ultra-large investors from monopolizing the allocation too quickly, ensuring that more community members can benefit from this exclusive opportunity.**

**Guys, this is game-changing news! Have you ever imagined skipping the fierce subscription battle and securing a massive token allocation directly? This isn't just an opportunity, this is a moment that redefines the game, a chance to create something extraordinary! The Green Special Channel (GSC) isn't just a perk, it's an exclusive community-tailored advantage! This means you can bypass the complex subscription process and lock in your MDHT allocation with certainty, positioning yourself at the forefront of the market wave!**

**NAS COMMUNITY**

**This is a decision about the future: Will you take action now and secure your future wealth, or hesitate and let this opportunity slip through your fingers? Now is the moment. If you miss GSC, you'll have to compete in the open market with no guarantee of allocation size. Opportunities don't wait. Take action now, claim your MDHT allocation, and be part of this epic investment surge!**

**NAS COMMUNITY**

**This morning, our mentor provided an in-depth analysis of the challenges facing the stock market this week, multiple complex factors are unlikely to dissipate in the short term, and the overall market sentiment remains unfavorable for major indices. The three major indexes continue to oscillate at high levels, with the Dow Jones hovering near the upper boundary of its consolidation range. Meanwhile, the MACD death cross has already formed on the daily candlestick chart, signaling a potential downward expansion at any moment. The signs of an impending market shift are becoming increasingly clear.**

**But this is exactly the moment to showcase our strength! WEALTH MATRIX has already identified a more certain opportunity, the crypto market, specifically the high-quality IEO sector. If you haven't yet fully grasped the immense potential of IEOs, especially the high-value opportunity of MDHT, then now is the time to learn and take it seriously!**

**Opportunities always belong to those who act decisively and make precise decisions. The market is ever-changing, but we don't drift with the tide, we stand at the eye of the storm, controlling our own financial destiny. MDHT is not just another token, it represents the perfect fusion of future technology and capital. Missing out on it could mean missing the next great wealth revolution! So, guys,**

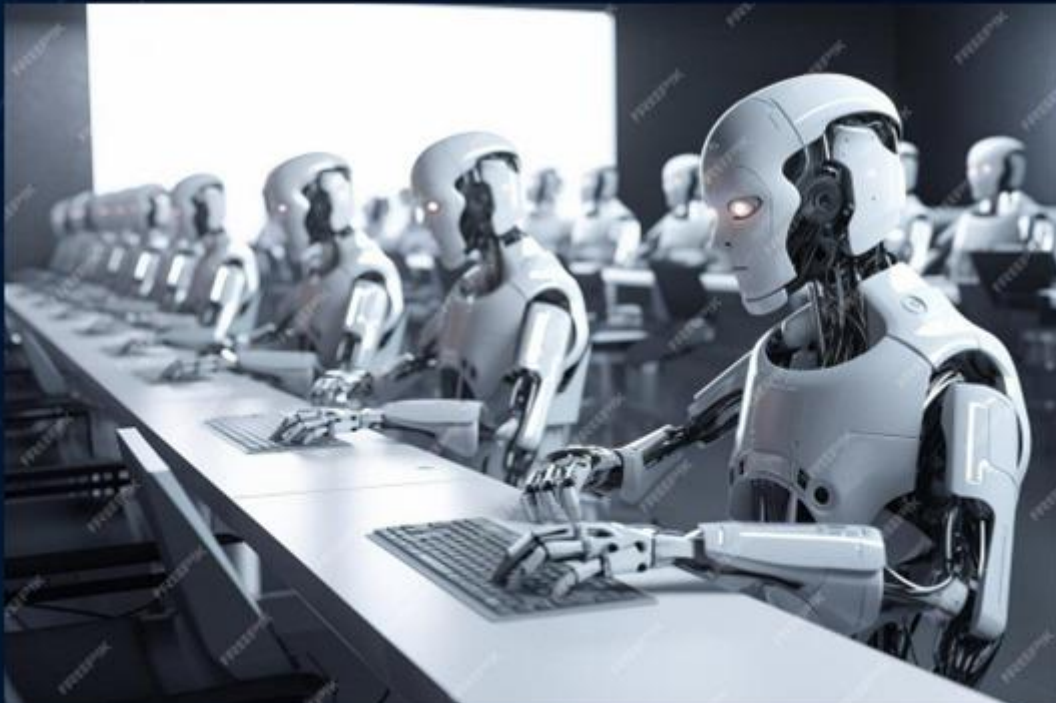

**NAS COMMUNITY**

**will you wait passively, or will you join this epic race for wealth right now? Make the right choice, secure your future today!**

#### **Healthcare and smart diagnosis**

In the field of healthcare, the MindHub platform has brought revolutionary changes through the combination of humanoid robots and Metaverse technology. Using deep learning technology, MindHub can intelligently analyze medical images and assist doctors in disease diagnosis and treatment planning. Using Metaverse technology, MindHub can create virtual operating rooms and medical training environments to provide doctors with immersive operating experience and training opportunities. MindHub can also instantly monitor and analyze users' health data, provide personalized health management suggestions and early warning services, and help users better maintain their health.

**NAS COMMUNITY**

**This is exactly what our Helmsman has repeatedly emphasized, true investors don't just follow market trends, they cultivate a macro perspective and anticipate future developments. Behind the market frenzy, we must ask ourselves: Why has MDHT's subscription volume already surpassed QTPT in less than two days? This is absolutely not a coincidence, it stems from its unique value proposition and forward-thinking applications.**

**As the Helmsman has pointed out, in every crypto bull run, ICO/IDO/IEO have been core investment themes and even key drivers of market growth.**

**And in this bull cycle, the real focus is real-world application! MDHT is the answer to this era, not just a high-quality project, but the pinnacle of AI-driven technology merging with blockchain innovation.**

**A deep dive into MDHT's whitepaper leads us to a key conclusion: The MindHub platform demonstrates remarkable application potential across multiple industries, including smart manufacturing, fintech, cloud computing, and healthcare. It's not just creating a token, it's driving the digital and intelligent transformation of entire industries, providing cutting-edge AI-powered solutions for both enterprises and individuals.**

**NAS COMMUNITY**

**🔥 Why is MindHub (MDHT) the investment opportunity you can't afford to miss?**

**Buckle up, guys because we are heading straight into the AI + Humanoid Robotics revolution! This will fundamentally transform how we live, work, and reshape entire economic structures. The question isn't "Will this happen?" it's "Are you positioned at the forefront of this revolution?"**

### **1. AI + Humanoid Robots = A Disruptive Force Shaping the Future**

**Did you know? Tesla's Optimus robot is set for mass production in 2025, unlocking a market projected to exceed \$10 trillion! 🌍 Tech giants like Meta, Boston Dynamics, and Figure AI are going all-in, and MindHub (MDHT) is at the very core of this revolution!**

**✅ AI-Powered Humanoid Robots + Metaverse Technology – Enabling independent decision-making, emotional recognition, and personalized interaction, bringing robots seamlessly into our daily lives!**

**✅ Full-Spectrum Integration – From healthcare and education to business and industry, humanoid robots are revolutionizing every sector!**

**✅ Cutting-Edge AI Neural Network – Utilizing a "Metaverse Pre-Training + Real-World Fine-Tuning" model, achieving a learning speed 5x faster than industry peers!**

**NAS COMMUNITY**

✔ **Blockchain-Backed Data Ownership – Robot behavior data is tokenized and tradable, pioneering a new era of the smart economy!**

## **2. Industry-Level Breakthrough: AI + Metaverse Unlocks Unlimited Market Potential**

🔥 **Explosive Growth in the Humanoid Robot Market:**

**With breakthroughs in key technologies, we are standing at the tipping point of large-scale commercialization!**

✔ **Household Service Robots: AI-powered home assistants, health monitoring, and smart home integration, soon, every household could have its own personal robot!**

✔ **Industrial Smart Manufacturing: Robotic workers, intelligent diagnostics, and automated maintenance, businesses are on the verge of a revolutionary efficiency leap! 🏭**

✔ **Healthcare & Elderly Care: Remote medical assistance, surgical support, and senior companionship, AI robots will fill critical gaps in global healthcare resources! 🩺**

**NAS COMMUNITY**

✔ **Retail & Business Services: AI shopping assistants, cashier-less stores, and smart customer service, redefining the global business landscape! 🚀**

Goldman Sachs predicts that within the next 10 years, the humanoid robot market will surpass \$100 billion, becoming one of the core pillars of the global tech industry! This isn't just an emerging sector, it's the "next Internet." Your move? Seize the opportunity before it's too late!

💰 **A Capital Frenzy Is Unfolding, Unprecedented Investment Opportunities!**

Tech giants are going all in, so what are you waiting for?

🚀 **Tesla Optimus: Expected to deliver 10,000 units in 2025, with full-scale production in 2026!**

🚀 **Meta AI Robots: \$60 billion investment in AI + robotics to seize first-mover advantage!**

🚀 **Boston Dynamics, Figure AI, and UBTECH – Securing massive funding to drive humanoid robot commercialization!**

**NAS COMMUNITY**

**This isn't just a technological revolution, it's a capital-driven race! Whoever captures the market first will become the next tech giant!**

**Now Is the Golden Time to Enter!**

**20 years ago, the Internet created legendary wealth for early investors. 10 years ago, the rise of smartphones changed everything.**

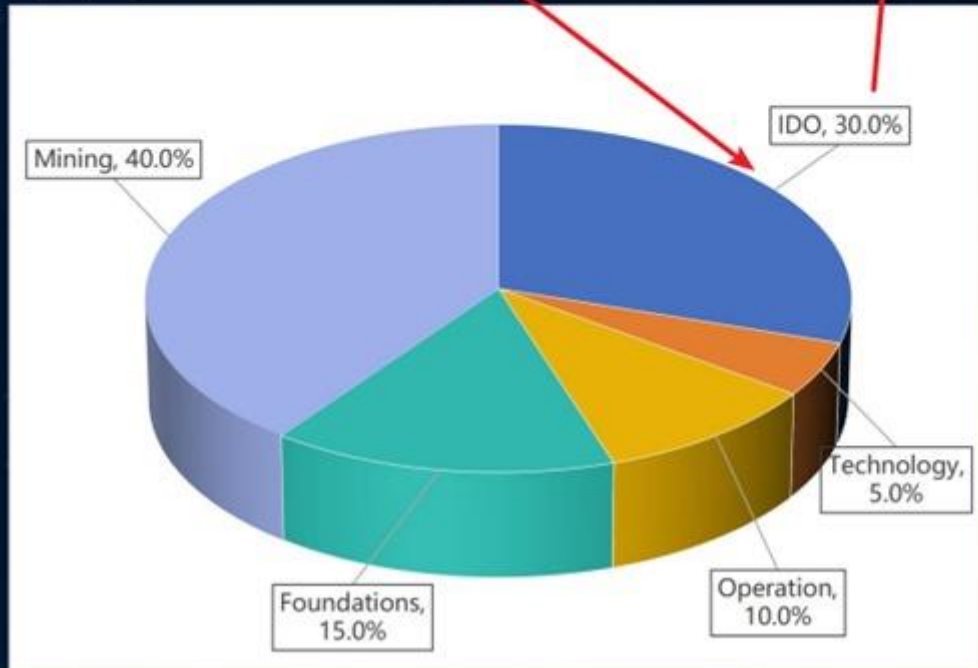

**And today, AI + robotics are reshaping the world! If past smart devices were just tools, future humanoid robots will become an integral part of life, managing households, optimizing productivity, and enhancing societal efficiency! And MindHub (MDHT) is leading the charge in this revolution!**

**△ The essence of investing is seizing the right trend at the right time! Do you want to be a participant in this tech revolution, or just a spectator? MindHub isn't the future, it's happening now! The opportunity is right in front of you, are you ready to take it?**

## 5.2 Token distribution model

- Token name: MDHT
- Total supply: 1 billion tokens
- IDO: 30% (online subscription and allocation. Online subscription accounts for 20% and allocation accounts for 80%)
- Team: 5%
- Marketing: 10%
- Base: 15%
- Mining: 40%

Analyzing MDHT's token distribution, we can clearly see an exceptionally attractive structure. The total supply is 1 billion tokens, with 30% allocated to IEO subscriptions, while only 20% is available for public online sales. This

**NAS COMMUNITY**

means that retail investors can only compete for 60 million tokens, a highly limited allocation in a high-demand market.

Honestly, the 60 million tokens available for public sale isn't the most exciting part for me. After all, with such a high-demand IEO, the allocation success rate is expected to be below 6% or even lower. This means that investors relying solely on standard public subscriptions will receive extremely limited allocations. It's also why many traders feel that their IEO allocations don't match the profitability of contract trading. But what truly excites me is MDHT's token distribution model, 80% of the supply is allocated to institutions, early investors, and ecosystem incentives. This is where the real market potential lies!

Take a look at GEBT and QTPT, both were successful cases, yet their IEO allocations were relatively small, with very limited additional market distribution. This led to extremely low subscription success rates, making some investors feel that trading contracts was more profitable than competing for new token subscriptions. But MDHT is completely different! It provides sufficient market liquidity while reserving a strong early allocation, which means the market's anticipation for MDHT's secondary market performance will be even higher!

**NAS COMMUNITY**

**So, guys, the question isn't whether MDHT is worth investing in, it's how to secure the maximum possible allocation. Seizing the advantage means positioning ourselves ahead of the curve in this once-in-a-lifetime opportunity, ensuring we are the first to capitalize on the massive wealth windfall that this tech revolution will bring!**

**Guys, I've always emphasized one core principle, opportunities always favor those who are prepared and take bold action. The more proactive and committed you are, the greater the rewards. During the GEBT and QTPT IEO subscriptions, I personally witnessed the power of the two golden rules: 1. Time Priority & 2. Capital Priority**

**By fully leveraging these principles, I achieved a 15% allocation success rate for GEBT and 18% for QTPT. But what truly surprised me wasn't just the regular IEO allocation, it was the Large Investor Allocation opportunity for QTPT!**

**At the time, I immediately spotted QTPT's official Large Investor Allocation announcement and decisively participated at the minimum threshold. The result? Over \$10 million in pure profit! No risk. No volatility. Every dollar secured with**

**NAS COMMUNITY**

certainty. Compared to contract trading, this was an almost effortless way to make money, unbelievable, right?

So, if MDHT's IEO offers a Large Investor Allocation, it will be a golden opportunity for everyone! Securing an allocation means securing profits! And now, our Helmsman has delivered an even bigger surprise, leveraging the strength of our community fund pool, he has successfully negotiated with the exchange to secure exclusive access to the "Green Special Channel" (GSC)! What does this mean?

✅ **Maximum allocation of \$3 million—For the vast majority of investors, this is a 100% guaranteed allocation. No need to gamble on probability, your MDHT token share is secured!**

✅ **Absolute market advantage, No competition, no stress over sellouts, just a secure, oversized return on investment.**

So, how do you maximize your investment returns?

👉 **If your account balance exceeds \$10 million:**

**NAS COMMUNITY**

✓ Go all-in on MDHT's standard subscription, leveraging the Time Priority + Capital Priority rules to secure the largest possible allocation.

✓ Max out the \$3 million "GSC" allocation, ensuring that you lock in massive profits from this once-in-a-lifetime MDHT IEO opportunity!

👉 If your funds are below \$3 million:

✓ Apply for the "GSC" allocation immediately to secure your allocation first, ensuring a 100% guaranteed MDHT token distribution based on your committed amount. This is by far the smartest and most efficient strategy!

**Guys, listen up! This is critical, make sure you fully understand it!**

Participating in MDHT's standard subscription means competing with thousands of investors in a lottery system. The higher the subscription progress, the lower your chances of allocation! If the progress bar surges past 3,000% or 4,000%, your allocation rate could drop to 3% or even lower. That means you could go through all the effort of subscribing, only to end up with nothing!

**NAS COMMUNITY**

**GSC Privilege Is Completely Different, 100% Guaranteed Allocation! Whatever you buy, you get. No lottery, no uncertainty just locked-in profits and a guaranteed winning position!**

**How to Maximize Your GSC Allocation?**

**✓ Your GSC allocation = Your standard subscription amount**

**Simply put, if you invest \$500,000 in MDHT's standard subscription, your GSC cap will also be \$500,000. If you want to max out the \$3 million GSC allocation, you must increase your standard subscription amount or be a top-tier exchange user, which the system automatically determines!**

**✓ Didn't participate in MDHT's standard subscription? Sorry, no GSC for you!**

**GSC is a special reward for community contributors. If your account hasn't participated in the MDHT standard subscription, you won't be eligible for GSC allocation.**

**The more you subscribe, the bigger your GSC allocation—simple as that!**

**NAS COMMUNITY**

- ✓ **Max purchase limit of \$3 million to ensure fair participation for mid-sized investors**

**Even for someone like me, with over \$10 million in standard subscriptions, my GSC purchase limit is still capped at \$3 million. This cap is designed to prevent whales from buying up all the allocations, ensuring every investor gets a fair chance to participate!**

**“Is this fair?” Stop complaining, focus on strategy! Some people might say:**

**“I just put all my funds into the standard subscription, and now GSC is available, how is this fair to me?”**

**Listen up, this is how the market works. It moves fast, and opportunities only reward those who adapt!**

**If our Helmsman hadn't led our community fund pool to negotiate with the exchange for GSC, you probably wouldn't even get an allocation in the standard subscription, let alone GSC! Smart investors don't complain, they adjust their strategy to maximize returns!**

**What's the move now?**

**NAS COMMUNITY**

- 1. If you're already subscribed to MDHT, apply for GSC immediately to maximize your profits!**
- 2. If your standard subscription amount is too low, increase it now, or risk missing out on GSC!**
- 3. If you haven't subscribed to MDHT yet, this is your last chance, act now or miss a life-changing opportunity!**

**The capital market is a battlefield, action is the only way to win! Now is the moment to make the right decision! 🌟🚀**

**Guys, if you missed the massive surges of GEBT and QTPT, you cannot afford to miss MDHT this time! 🚀 The opportunity is right in front of you, will you take action, or will you sit back and wait? The choice is yours!**

**Guys, stay focused because this isn't just another opportunity. This is an explosive wealth moment! MDHT's online subscription progress has skyrocketed to 1,100%! This doesn't just mean zero risk, it signals an imminent market-shaking wealth surge!**

**NAS COMMUNITY**

Remember GEBT and QTPT? Their issue prices were \$3 and \$2.80, respectively, with subscription progress reaching 502% and 1,530%. When they hit the market, their opening prices surged to \$15.06 and \$42.84. Now, look at MDHT, its subscription progress has already surpassed 1,100%! What does this mean?

- ✦ Opening price expected to hit at least \$30 or even higher!
- ✦ MDHT tokens in your hands could deliver at least 15x pure profit!
- ✦ Market sentiment is reaching a fever pitch, this is the perfect moment to make big money!

**Why Is MDHT So Dominant?**

- ✓ Powerful Market Pricing Advantage: IEO subscription is on fire, with highly concentrated token distribution, driving skyrocketing demand!
- ✓ Top-Tier Exchange Backing: COINFEEAI exchange's recent IEO successes have ignited market enthusiasm, creating unparalleled momentum for MDHT!
- ✓ Global Investors Are Rushing In: This isn't just a project, it's a worldwide battle for wealth! And right now, you're at the center of it!

NAS COMMUNITY

So, guys, what are you waiting for? This isn't just a chance to make big money, it's your breakthrough moment to climb to a whole new level of wealth! MDHT is ready to skyrocket, are you ready to ride the wave to the top?

Guys, let's put aside the insane IEO gains for a moment. Just through futures contract trading, our Battle of King profit plan has already delivered staggering returns of +391.70%, +812.29%, and even skyrocketed to +2013.60%! These aren't just numbers, they're life-changing returns!

Under the guidance of our mentor, we have not only achieved steady and strategic wins in futures trading and IEO projects, but we have also enabled our capital to experience exponential growth, far surpassing the returns of

**NAS COMMUNITY**

traditional stock investments. Leveraging this fund pool advantage, we secured incredible results in high-quality IEOs like QTPT. And now, thanks to the visionary leadership of our Helmsman, we have gained access to the ultimate privilege, the Green Special Channel (GSC)!

**Will MDHT's IEO Be Enough to Reach the Battle of King VIP3 Partner Profit Target?**

If your capital exceeds \$5 million and you have fully leveraged the IEO strategies we've shares, especially if you secured an early position this morning then let me be clear: Not only is this goal achievable, it's practically inevitable!

The opportunity is right in front of you, guys! Now is the time to show your strength and take a decisive step toward financial freedom. Take action immediately, maximize our strategies and resources, and seize this once-in-a-lifetime investment opportunity! This isn't just an investment, it's a wealth revolution!

Of course, what I just described is the standard approach to participating in online subscriptions. But the reality is, not everyone has millions of dollars in

**NAS COMMUNITY**

available capital. So, how do we break past these limitations and achieve even higher profit targets?

Why was our Helmsman so confident this morning when he announced that, starting this week, everyone could double their Battle of King profit challenge targets within this historic MDHT project, reaching +600%, +1,200%, or even +2,400%?

The answer is simple: The ultimate power of GSC privileges!

- ✓ Bypass market competition and go straight into final allocation
- ✓ 100% guaranteed MDHT token allocation, no waiting for lottery results 🏆
- ✓ Allocation size ranges from 15%-45%, meaning larger holdings and exponentially bigger profits 💰

This isn't just an investment opportunity, it's a historic wealth transformation that will be remembered for years to come! Take action now, secure your GSC allocation and lock in your MDHT holdings! This is not the time for hesitation,

**NAS COMMUNITY**

**it's the time for absolute commitment. Go all in and join the battle for victory, reserved for the bold! 🔥 🔥 🔥**

**Guys, have you actually calculated how much your total asset returns could multiply if you secure GSC privileges? Isn't this the fastest and most direct way to achieve the targets our Helmsman outlined this morning? And more importantly, have you ever wondered why our Helmsman is willing to share this priceless opportunity with everyone?**

**First and foremost, as our Helmsman emphasized this morning, the reason why our community was able to secure GSC privileges is entirely due to the collective efforts of every single member! It is because of your dedication and contributions that we now have access to this exclusive benefit. As a result, the community has decided to give back by allocating a portion of these precious GSC slots to members, while also implementing a maximum cap to ensure fair access for everyone. This isn't just a reflection of NAS's mission to "turn dreams into reality", it's also a true testament to the charitable spirit we have upheld over the years.**

**NAS COMMUNITY**

**Secondly, this is not just a privilege, it is a strategic move for NAS community's future expansion! Our top priority right now is the global launch of AlphaStream 5.0 in April. This isn't just a revolutionary smart trading system, it's a transformational tool that will redefine how investors achieve wealth growth. And before its official release, attracting more supporters and early adopters is crucial for its market expansion, commercial value, viral growth, and long-term subscriptions, all of which will have an immeasurable impact on its success.**

**Finally, there's one more major announcement you can't afford to miss, our Helmsman is preparing to step away from the frontlines of community trading discussions to focus on building the Elite Club, NAS Community Charity Fund. This isn't just his final gift to the NAS community, it's also a heartfelt farewell token before the official launch of AlphaStream 5.0. Isn't this moment worth giving it everything we've got?**

**🚀 So, guys, seize this rare opportunity! This isn't just a chance to elevate yourself as an investor, it's a turning point to achieve the Battle of King advanced profit targets and take a major step toward financial freedom! Think about it without GSC privileges, you'd be stuck in a crowded market, competing**

**NAS COMMUNITY**

**with thousands of investors for MDHT's IEO online subscription. What would your allocation ratio look like then?**

**Will you passively wait for a lottery draw, or will you secure your winner's seat right now? The choice is yours, but time won't wait! Take action now and ensure you have no regrets!**

**🔥 Time is running out, this opportunity won't last! 🔥**

**Guys, the progress bar has already surged to 1,300%, this is your best chance to subscribe! As demand skyrockets, once we hit 3,000%, the allocation rate will drop to just 3%. At 4,000%, it will shrink further to 2.5%. And by 5,000%, your odds of securing an allocation could be as low as 2%! How much allocation do you think you can get in such fierce competition? Act now before it's too late!**

**Now, there are two critical questions you must consider immediately:**

**1. Do you have enough funds in your account?**

**If you don't have sufficient capital and didn't secure an early position in the subscription, do you really think you can outperform in this highly competitive battle? Can you guarantee that your allocation will be above average? When**

**NAS COMMUNITY**

everyone is fighting for the same pie, do you really want to rely on luck to get a full share?

## **2. Can you afford to miss out on GSC?**

The Green Special Channel (GSC) guarantees you at least a 15%-45% allocation ratio!

This means securing a massive token share upfront without having to fight against tens of thousands of investors in the open market. This isn't just an advantage, it's an entirely different playing field!

If you choose GSC, you'll be holding a massive amount of MDHT tokens on listing day, putting you far ahead of those still waiting for standard allocations. But if you miss GSC, the gap in final returns could be night and day, all because of the decision you make today!

You have two choices:

- Join GSC, lock in your victory, and secure maximum profits.**

**NAS COMMUNITY**

**✘ Hesitate and watch others seize the opportunity, leaving you with crumbs or nothing at all.**

**Do you really want to stand on the sidelines, watching others cash in massively while you're left with nothing but regret?**

**💡 This is an exclusive opportunity, our team's defining moment! Don't look back wishing you had acted sooner, take action now, secure your GSC spot, and step into success. Your future is waiting, make it happen!**

**Guys, let's get straight to the point, secure GSC and accelerate your investment journey! No more detours, let's focus on real results. How do we use GSC to directly lock in golden projects like MDHT, bypass intense market competition, and position ourselves among the winners from day one? Let's make it happen!**

**Secure GSC, and you'll get:**

**🔥 High Allocation Ratio!**

**Lock in 15% to 45% of the allocation instead of the tiny 1-3% available on the open market. This means your investment returns will skyrocket exponentially!**

**NAS COMMUNITY**

**🔥 Exclusive Early Access to AlphaStream 5.0!**

**GSC members will receive priority access to the AlphaStream 5.0 presale, becoming the first to experience next-gen technology! While others wait for the next market wave, you'll already be ahead, securely positioned for success!**

**🔥 This Opportunity Won't Last!**

**The \$75 million allocation is limited and moving fast! Opportunities like this are as fleeting as a shooting star, hesitation means missing out. Now, your next move is simple: Contact your assistant immediately, secure your GSC allocation, and lock in your MDHT tokens before it's too late!**

**The conclusion is simple: GSC = Turbocharger!**

**Fast, steady, and absolutely secure. Our navigator has already paved the way for you. Now, it's up to you whether you step onto this bridge to financial freedom!**

**✅ You can keep hesitating, watching others take the lead and walk away with massive profits.**

**NAS COMMUNITY**

✔ Or you can take action now, secure your GSC qualification, buy your allocated amount, and let MDHT multiply your assets again and again!

Time is limited, and opportunities are priceless, don't hesitate! Jump aboard this wealth express, and ride the wave with us in the world of high-quality IEO investments. Full speed ahead, let's conquer the market together! 🚀 🔥
