Professor Montgomery Keane (Helmsman)

Morning Review

Good morning, team!

I'm Montgomery Keane, your old friend. In this world, we all strive for success and aspire to achievements that others admire. However, what truly determines our destiny is not whom we envy, but how much effort we're willing to invest in our own dreams. Do you want to be the one admiring others, or do you want to become the legend others admire?

Looking back on my career, I have witnessed countless success stories and understand the perseverance and struggles hidden behind these achievements. Success is never accidental; it is the result of making the right decisions and taking decisive action every single day, every single moment. As the Bible says, "Love the Lord your God with all your heart, all your soul, and all your mind."

NAS COMMUNITY

Likewise, if we seek to remain undefeated in the world of investing, we must give it our all and seize every opportunity that the times present to us.

The decision we made two months ago has already rewritten our destiny! Do you remember? When the three major U.S. stock indices were trading sideways at their highs, I repeatedly emphasized adjusting our strategy, allocating 80% of our capital to the crypto market while keeping only 20% in stocks. As the market outlook became clearer, we boldly increased our crypto allocation to 90%! Looking back now, this decision was absolutely the right one, we positioned ourselves perfectly to ride the explosive growth of the crypto market!

Under the leadership of AlphaStream 5.0, we have successfully executed one profit plan after another, culminating in the return of Crypto President Trump, Bitcoin surpassing \$100,000, and TRUMP token skyrocketing 450x in just two days, igniting the ICO frenzy of the 2025 Crypto Genesis Year! Today, the crypto market has evolved from merely being an extension of traditional capital to becoming the dominant battlefield of global wealth flow!

Now, with the MDHT IEO on the horizon, how will you secure your share of the pie? Look at those who acted decisively during the QTPT IEO, they've already

NAS COMMUNITY

locked in high returns with zero risk! Now, MDHT is set to unleash an even greater wealth opportunity. The progress bar is surging at an unprecedented pace, and breakthroughs of 2,000%, 3,000%, or even 4,000% are no longer just possibilities, they're becoming reality! How much allocation do you want? Are you ready to seize your place in the market?

Opportunities don't come knocking, you have to take action. Only those who move decisively can carve out their place in the market's tidal wave! The ICO market of the 2025 Crypto Genesis Year is projected to reach a trillion-dollar scale, making it the most explosive wealth opportunity of the past decade. And now, as MDHT IEO approaches, you must ask yourself one question, are you settling for just a small bite, or are you ready to claim the entire cake that rightfully belongs to you?

Don't wait until MDHT opens and soars before you regret not going all out to increase your position! This zero-risk primary market subscription is a golden opportunity for us to hold the chips! This may be one of the easiest opportunities for us to make high profits this year! Now is the time to go all out!

NAS COMMUNITY

The real crisis is not the volatility of the market, but your hesitation! If you are still hesitating, look at those who have already taken action. They have already received amazing returns in QTPT's IEO, and this time, MDHT is expected to create a higher record! Do you want to be a bystander or a winner?

I repeat: Opportunities never wait for those who hesitate! You must take action to fight for it, instead of waiting for the market to give you wealth. Today, you must make a decision! Do you want to be the one who regrets watching the opportunity slip away, or do you want to be the king of the market? The choice is in your hands!

I hope that each of us can constantly break through ourselves and reach new heights on our own paths. Let us work together to create a more brilliant future! 🚀💰🔥

Dear friends, investment is a protracted battle, and the real winners will never easily miss the opportunity in front of them. Looking back at 2024, big technology stocks led by Nvidia led the stock market to soar, bringing amazing wealth effects, those friends who participated decisively have enjoyed this

NAS COMMUNITY

round of historic dividends. Today, the crypto market is becoming a battlefield for ordinary investors to realize their dreams. The opportunity is already in front of us. Are you ready?

Our VIP partners have achieved amazing returns in contract trading, and I have a strong feeling that the current IEO market will bring zero risk and profits that are no less than contract trading. You must understand that the strong mind always learns, understands and eventually joins in doubt, while the weak mind hesitates and retreats in doubt, and eventually misses out on wealth.

No matter how you view the crypto market, one thing cannot be ignored, it has an unparalleled profit effect! As your old friend, I am willing to share this opportunity with you with my many years of investment experience. Grab it or miss it, it's your choice! The real world is always contradictory. In front of every great opportunity, there will always be people who stop because of fear, while others take off because of faith. Which kind of person do you want to be?

In the NAS community, we pursue not only personal success, but also hope that every dreamer can find his or her own glory here. It is also our mission

NAS COMMUNITY

to pass on the "power of love". I know that I can't help everyone, but this will not stop me from trying my best. This is my choice, nothing more!

Yesterday, we were immersed in a deep and insightful discussion, exploring the most exciting topics in the current investment market. We talked about how the crazy growth of the IEO progress bar brings opportunities and challenges to ordinary investors, we unlocked the secrets behind the "Green Special Channel", revealed how it helps upgrade the "Battle of Kings" strategy, and deeply analyzed why MDHT has become one of the most watched IEO projects in the market.

If you were with us yesterday, I am sure that your understanding of IEO investment has reached a new level! Does the listing trend of QTPT allow you to more clearly grasp the impact of market sentiment on trends? You will find that people who seem to be standing at the same starting line have actually opened up a huge gap. How to take the lead at the starting line and win the game one step ahead? This is the question we really need to think about!

Today, I will lead you to deeply analyze the infinite possibilities of IEO investment from a new perspective, and take you to explore more wealth codes

NAS COMMUNITY

that are ignored by the market. Opportunities always belong to those who foresee and act decisively! Let us open a new chapter of wisdom and wealth together and write our own legend! 🚀 🔥 💰

Yesterday, Daniel brought you an in-depth analysis of Green Special Channel (GSC). As a full participant, his learning and execution abilities are undoubtedly top-notch. This is also the core reason for his repeated success in the trading field, he is good at accurately grasping all certain opportunities!

At the same time, I have received enthusiastic feedback from many friends, and everyone is looking forward to the unique advantages of GSC. However, I have also noticed that some friends are still not very clear about the specific participation rules of GSC, and even have some doubts about how to maximize the use of this scarce resource.

For this reason, today I decided to continue to analyze the core strategy of GSC in detail for everyone! This is not only an opportunity to participate, but also a key step for our NAS community to stand at the forefront of the market. Only by truly understanding the rules and gameplay of GSC can you ensure that

NAS COMMUNITY

you have the upper hand in the MDHT subscription war and win a distribution ratio far exceeding that of ordinary investors.

Opportunities are reserved for those who are prepared, and success always belongs to those who dare to learn and are good at execution! Today's sharing is very important, please be sure to study carefully, because you are about to get a more certain and lucrative profit opportunity than QTPT! 🚀💰

Are you ready? Let's explore the ultimate strategy of Green Special Channel in depth to ensure that every NAS member can maximize their own advantages and seize the market opportunity!

1. Green Special Channel (GSC): A wealth channel exclusively for the NAS community, a privilege only for those who take action!

Friends, the Green Special Channel (GSC) we have fought for is definitely not just an ordinary subscription channel. It is a top benefit that our NAS community has obtained with the strong advantage of the capital pool and after in-depth negotiations with the trading center! Because our capital scale has reached the standard of B2-level underwriters, with stronger influence and more

NAS COMMUNITY

active user groups, the trading center is willing to give us this exclusive allocation of up to 30 million MDHT (worth 75 million US dollars)!

But please note! GSC is by no means open to everyone, but is a benefit specifically provided to loyal users who support the NAS community. In other words, only investors who have participated in the general subscription of MDHT are eligible to apply for the quota of Green Special Channel!

Why is this so? You can understand it this way: if you want to get dividends from a stock, you must first hold the stock, right? If you don't even participate in the most basic MDHT ordinary subscription, how can the exchange confirm your GSC purchase amount? How does the system identify whether you really support this project?

It's like entering a top club, ordinary subscription is your "entry ticket", and GSC is the VIP box. Only those who really devote themselves to the battlefield and dare to act are qualified to enjoy this feast of wealth! So, friends, if you haven't participated in the ordinary subscription of MDHT, now is the last chance! This is the only threshold to enter GSC and enjoy high purchases! Opportunities will

NAS COMMUNITY

never wait for those who hesitate. Only by taking the first step can you be qualified to enjoy the real big winner treatment!

2. Green Special Channel (GSC): Your VIP ticket, direct access to the highest quota of MDHT!

Dear friends, if you have participated in the ordinary online subscription of MDHT, then congratulations! You are already qualified to buy Green Special Channel (GSC)! But remember, just getting qualified is not enough, GSC is an additional privilege, only those who really take action can lock in the highest profit!

So, why is GSC a must? Imagine that you bought a ticket to the VIP club (regular subscription), you can enter the hall and feel the atmosphere, but if you want to really enjoy the VIP membership treatment - private club, exclusive services, top resources, you must apply for VIP membership (GSC purchase). Tickets (regular subscription) allow you to qualify, but the real value lies in VIP membership (GSC)!

How is the GSC purchase amount calculated?

NAS COMMUNITY

Your GSC purchase amount depends on the amount you invested in the MDHT ordinary online subscription. In simple terms, the amount of GSC you can purchase depends on the amount of ordinary subscription funds you invest!

Let me give you an example to help you understand it in one second!

✓ If you subscribe to 500,000 USD online on MDHT, you can apply to purchase 500,000 USD of GSC quota without participating in the lottery after the general subscription ends, and directly get a fixed allocation of 15%-45% without relying on luck!

✓ If you subscribe to 800,000 USD of MDHT and 800,000 USD of GSC at the same time, your VIP level may be automatically upgraded. For example, if you reach VIP3 level, your GSC allocation ratio will far exceed the minimum 15%, and may be increased to 30%, or even the full 45%! In other words, the higher your VIP level, the greater your GSC allocation ratio!

🚀 Exclusive opportunity for doers! Ordinary investors in the market are trying their luck, but you can directly lock in a high allocation through GSC to ensure maximum profit!

NAS COMMUNITY

💡 If you haven't subscribed to the MDHT ordinary online quota, you can't apply for GSC. Don't wait until you miss it to regret it!

🔥 GSC subscription is a simple math problem: subscribe to a certain amount of MDHT, and you can apply to purchase the same amount of GSC, with an allocation of 15%-45%. The larger the amount of funds, the higher the VIP level, and the higher the allocation!

Time is money. If you miss the GSC opportunity, you will earn 30%-45% less than others! Act now to lock in your exclusive purchase quota and ensure that you win the largest share in this zero-risk IEO of MDHT! 🚀 🔥 💰

3. Green Special Channel: MDHT limit setting ensures fairness and justice, so that every NAS member can win at the starting line! 🚀 🔥

Now we have come to the most critical point, which is also the core principle to ensure that all our NAS community members can benefit fairly! The total amount of this Green Special Channel is only 75 million US dollars, and in order to prevent super large households from buying in large quantities in a short

NAS COMMUNITY

period of time, we have set a single person subscription limit of 3 million US dollars.

Why is there a limit? The logic behind this is simple: Our GSC is not customized for individual big households, but for the entire community! All of this is the result of the joint efforts of our NAS family. We hope to benefit more members instead of letting a few people grab it all! This not only gives every qualified member the opportunity to participate, but also ensures the long-term sustainable development of our entire community.

No matter how big your fund is, you must abide by the \$3 million cap! Excellent investors like Daniel are no exception. This is our insistence on fairness and justice, everyone can get their share of this golden opportunity of MDHT IEO!

Friends who have just put all their money into MDHT ordinary subscription, what do you do? I know some friends will ask, "I have already invested all my money in MDHT ordinary subscription, and now GSC appears, isn't it unfair?" But the investment market is like this, opportunities change rapidly, and smart investors always know how to flexibly adjust their strategies and make good use of all favorable rules!

NAS COMMUNITY

Now, you still have the opportunity to participate in GSC! As long as you purchase the same amount in GSC as the ordinary subscription, you can directly lock in 15%-45% of the MDHT token allocation without drawing lots! This means that you will enjoy a much higher deterministic allocation ratio than ordinary subscriptions, ensuring your profit is maximized!

Why is the GSC opportunity so valuable? Let's do a simple math calculation:

✓ If the MDHT subscription progress bar reaches 3000%, your ordinary subscription winning rate may drop to 3% or lower - which means that you may not get any return on your investment!

✓ But if you participate in GSC, even if you only lock in the minimum 15%, it means that you are guaranteed to get a token share far exceeding the ordinary subscription!

✓ If the MDHT subscription progress bar reaches 4000%, it means 40 times the profit, and you can lock in at least 15% of the allocation, then your profit space will be immeasurable! Isn't this an opportunity you have always dreamed of?

This is a guaranteed win-win opportunity! Ordinary investors in the market are relying on luck, but you in the NAS community have already got the

NAS COMMUNITY

winning chips! Now, the most important thing is not to hesitate, but to act decisively to ensure that your funds occupy a favorable position in GSC!

Time will not wait for anyone, GSC quota is limited, first come first served! Smart investors always decisively lock in their advantages when others are still hesitating! Take action now, seize GSC qualifications, and double your MDHT IEO income! 🚀 🔥 💰

So, friends, opportunities only come to those who act quickly! If you haven't participated in the MDHT subscription yet, now is the last time window, join now before the progress bar breaks through 2000%! 💰

✅ Step 1: Participate in the MDHT online subscription immediately!

Lock your seat before the progress bar breaks through 2000% to ensure that you are eligible to enter the next step!

✅ Step 2: Purchase Green Special Channel quota and lock in profits in advance!

Once you have completed the ordinary subscription, contact the assistant immediately to purchase the Green Special Channel with the same amount to

NAS COMMUNITY

ensure that you will directly receive MDHT allocation instead of relying on the market lottery! This means that your allocation ratio will be much higher than that of ordinary subscribers, and you can truly make a profit without loss!

✔ Step 3: What if you have reached the GSC \$3 million limit?

Continue to participate in the general subscription! Every additional subscription increases your chance of winning, and we all know that the higher the progress bar, the lower the chance of winning the general subscription, but capital priority, time priority, and active user privileges can greatly increase your winning distribution!

In the face of this zero-risk, super-high premium IEO opportunity, ALL IN is the wisest choice! Waiting and hesitation will not bring wealth, only action can create miracles!

✦ Time priority: the sooner you subscribe, the faster you lock in profits!

✦ Funding priority: a larger investment brings a higher probability of winning!

✦ Active user privileges: priority allocation of quotas to ensure your maximum income!

NAS COMMUNITY

This is a golden opportunity in 2025, the first year of encryption, and are you ready to ALL IN? 💰 🚀 🔥

Don't hesitate, don't wait and see! Opportunities always belong to those who act decisively! Contact my assistant now to lock in your Green Special Channel quota to ensure that you have the upper hand in MDHT's IEO!

The market waits for no one, time is your biggest advantage! By the time you realize the preciousness of this opportunity, it may have been snapped up. And what you want is not to miss it, but to grasp it! 💰

- 💡 **Want to maximize your chance of winning?**
- 💡 **Want to skip the lottery and get the allocation directly?**
- 💡 **Want to make sure you are among the winners?**

There is only one answer, act now! 🔥

- 🚩 **Contact the assistant to lock in the Green Special Channel quota!**
- 🚩 **Ensure that your MDHT subscription ratio is optimal!**

NAS COMMUNITY

🚀 **Don't wait for the market opportunity to disappear and then regret it!**

The future belongs only to those who dare to take the first step. Now, make your decision! ALL IN, seize this zero-risk historical IEO opportunity! 💰

Daniel Robert

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I am Daniel Robert. This morning, our respected helmsman has deeply analyzed the core strategies and participation rules of the Green Special Channel (GSC), allowing us to clearly see the huge difference between it and ordinary subscription. But the real question is: how can you use GSC to maximize your interests?

Believe me, this is not only an opportunity to make a profit, but also a VIP pass that allows you to bypass market competition and reach the peak of wealth. Faced with such an opportunity, will you stand by and watch, or take decisive action? Today, I will take you through WEALTH MATRIX, deeply understand the absolute necessity of GSC, and reveal the unique profit strategy of MDHT IEO.

NAS COMMUNITY

Many friends have participated in the online ordinary subscription of MDHT, but you must understand that GSC is the fastest way for you to lock in MDHT shares in advance. The helmsman's sharing in the morning once again emphasized a simple but crucial fact-the opportunity is right in front of you, and your choice determines your future!

Ask yourself, in the face of a certain, risk-free, high-return opportunity, do you have the courage and execution to go all in? If you are tired of watching opportunities slip away, if you don't want to continue to be bound by poverty and uncertainty, if you are like me, eager to get rid of the ordinary and plan your retirement life in advance, then MDHT may be the most important decision for you at this moment! If you miss it, you may never find such a perfect opportunity again!

The opportunity is here, it depends on whether you have the courage to take action. Guys, it's time to act! Join us and embark on this exciting journey to realize your financial dreams. Are you ready? Set off now, move forward at full speed, and take over your future! 🚀 🔥

NAS COMMUNITY

Guys, take a look at this weekly candlestick chart of the VIX market volatility index, you'll spot a clear signal. After five consecutive weeks of bearish candles, this week, VIX is poised for a rebound, signaling a subtle shift in market sentiment. For the past few weeks, VIX has been hovering around 15, consolidating within a tight range. Now, it's beginning to show upward potential, while at the same time, the three major U.S. stock indices remain in a sideways pattern at their highs. Most notably, the Magnificent Seven Tech Giants are showing clear signs of buyer exhaustion in the bull camp.

NAS COMMUNITY

Helmsman has long reminded us that once the market-supporting funds withdraw, bearish sentiment will spread rapidly, triggering panic selling. Now that the VIX warning signal has been lit, smart investors should understand that it is only a matter of time before the market pulls back. If you still hold high-priced stocks, now is an excellent time to sell. It is always wiser to lock in profits before the market falls sharply than to passively stop losses in panic!

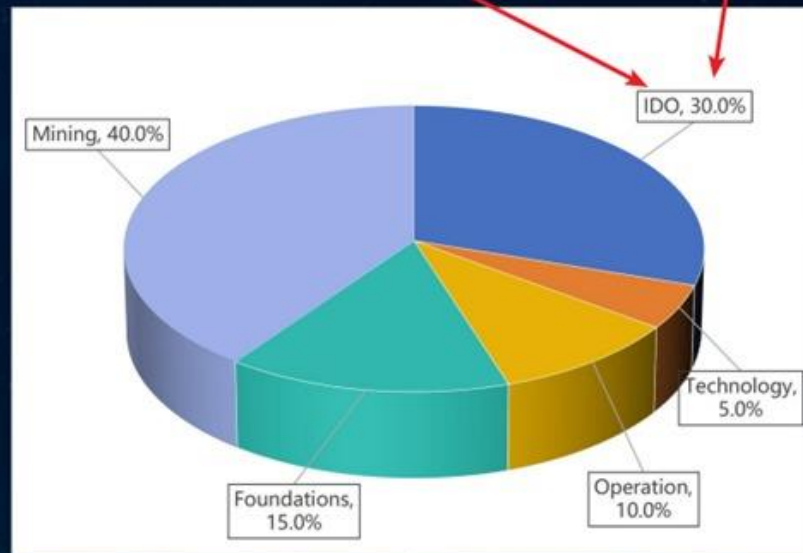

The real smart money has already begun to turn to zero-risk deterministic profit opportunities, MDHT IEO subscription and GSC green special channel. This is the greatest respect we should have for the market as investors, stay away from high-risk assets and seize the real wealth opportunity. Now is not the time to hesitate, but to make a wise decision. Seize this opportunity, avoid the storm of the market, invest your funds in the golden track of deterministic returns, and welcome the next wave of wealth growth with us! 🔥🚀

NAS COMMUNITY

5.2 Token distribution model

- Token name: MDHT
- Total supply: 1 billion tokens
- IDO: 30% (online subscription and allocation. Online subscription accounts for 20% and allocation accounts for 80%)
- Team: 5%
- Marketing: 10%
- Base: 15%
- Mining: 40%

Guys, let me be blunt, MDHT's chip slice distribution data shows me an unprecedented opportunity! This is not just an IEO, but a real financial innovation. MDHT's IEO share plus the institutional allocation has surpassed the sum of GEBT and QTPT, becoming the focus of the market.

NAS COMMUNITY

If GEBT is dominated by institutional capital and QTPT is the star that retail investors are crazy about, then MDHT is the super main battlefield where all investors gather, the market capacity is huge, the capital liquidity is extremely strong, and the potential growth space far exceeds the previous projects.

Think about a key question: How to maximize your allocation? The market has told us that the winning rate is extremely low if we only rely on ordinary online subscription competition, and the exponential growth of the subscription progress bar means that the final allocation ratio will be extremely diluted. Green Special Channel (GSC) is our trump card weapon to break this limitation.

GSC does not just let you get more chips, but directly changes the rules of the game for MDHT! This is the result of the joint efforts of our community and a special channel for NAS members. You can hesitate on other things, but at such a critical moment, you must not be a step behind!

Looking back on your investment experience, have you ever succeeded by seizing a key opportunity? Or, have you ever missed the turning point of changing your financial situation while hesitating? GSC is your chance to

NAS COMMUNITY

achieve self-salvation, and it is a key step for you to cross classes and change the future!

How does GSC push up the listing value of MDHT? This morning, the helmsman has clearly explained a core logic: GSC is not just distributing MDHT tokens, it is directly pushing up the listing price of MDHT! Let's take a look at a set of key data:

- **Total supply of MDHT: 1 billion**
- **Total IEO online issuance: 60 million**
- **IEO issuance price: 2.5 USDT**
- **For every 100% increase in the progress bar, the market value of IEO will increase synchronously $\$2.5 \times 60 \text{ million} = 150 \text{ million US dollars}$**
- **The total market value of MDHT has surged synchronously $\$2.5 \times 1 \text{ billion} = 2.5 \text{ billion US dollars}$**

In other words, every time the IEO progress bar rises by 100%, the overall market value of MDHT will surge by \$2.5 billion! This is its capital efficiency lever, which really makes it a more promising star project in the market above GEBT and QTPT. But there is a key point here. As investors in the primary market, what we really need to focus on is not the total market value, but the circulating market

NAS COMMUNITY

value. Those parts that are not circulated in IEO have no impact on our actual investment returns. In other words, our focus is not on those locked chips, but on the profits that we can actually buy and cash out after listing.

This is why MDHT is a zero-risk investment opportunity for us. The core logic of our participation is very simple: after subscribing in the primary market, wait for it to go online for trading, sell it, lock in premium profits, and cash in the proceeds. This is similar to the traditional stock market. It is not a long-term holding, but a precise grasp of the price premium when the IEO is listed to ensure maximum profit. As for the secondary market, that is the strength of AlphaStream 5.0. It can help you accurately capture trends and optimize trading strategies, but for our current goal, the key is still to seize the opportunity in the primary market and lock in profits in the shortest time.

MDHT: The absolute leader in the AI humanoid robot track

From the perspective of macro trends, let's look at the track MDHT is in, the global humanoid robot market is entering the 10 trillion US dollar trend, and MDHT's valuation has greater room for growth.

NAS COMMUNITY

Traditional technology companies often need to dilute equity when raising funds, but MDHT chose the IEO market as a means of financing, which means that it can quickly complete market expansion without damaging corporate control. When the valuation is further increased, it can introduce strategic investors with more negotiation advantages, which will further enhance the value of MDHT.

Can you see the strategic layout behind this? MDHT is not a short-term hype project, it is a technology unicorn that is truly targeting the future. Now, we have the opportunity to lock in MDHT chips in the primary market in advance, and GSC is the ticket to this wealth transformation!

So, don't be disturbed by market noise. The essence of IEO is to find the right opportunity, enter the market accurately, and then cash in profits at the right time. At present, the progress bar of MDHT has soared. GSC provides us with an opportunity for almost risk-free and deterministic profit. The only thing to decide is whether you are willing to seize it. For investors who missed GEBT and QTPT, this may be your best chance to make up for the loss this year. For friends who have already made a fortune in QTPT, MDHT will be the starting point for the next wave of wealth leap. In this market, the winners are always

NAS COMMUNITY

those who act quickly and have strong execution. The opportunity is right in front of you. Will you choose to wait or go all out?

This is an investment, but also a financial revolution! We are standing at the crossroads of history. GSC is not just an investment tool, but a strategic opportunity to break the traditional financial barriers and achieve wealth leap. How much can those investors who rely on ordinary subscriptions get in the end? 1%? 2%? 3%? The minimum allocation of GSC is as high as 15%-45%! This is not just about profit, but about whether you are willing to stand at the forefront of the market and lay out the future financial system in advance.

The opportunity is here, will you miss it? Or will you be like the real winners and seize the opportunity of this historic change? This is not an ordinary IEO, but an interstellar spaceship heading to the future. Now, you have the opportunity to board this spaceship and rush to a new peak of wealth together. Don't let hesitation become an obstacle for you to miss the opportunity to change your destiny, take action and move forward at full speed!

So, guys, who is the real winner in this capital game? There is no doubt that the team behind MDHT is the biggest beneficiary of this business model! But don't

NAS COMMUNITY

forget that we, the lucky ones who get GSC, are the core players in this investment battle! As the progress bar soared, it has exceeded 1800%, the market has poured in crazily, but we are in an absolutely advantageous position and have seized our own "VIP channel".

The final allocation ratio of ordinary subscribed investors may be as low as 5.56%. In other words, they try their best to fight for the meager chips in the leftovers. And what about GSC holders? We lock in a distribution ratio of up to 15%, 35%, or even 45%! This is not just a gap of several times, but a gap of dozens of times in returns. Is this an opportunity you are willing to miss?

There is no doubt that MDHT is very popular. It is not only the focus of market discussion, but also a potential star that will detonate the entire crypto industry. With its disruptive value and practical application, MDHT is moving towards the peak of the market step by step, and we are the witnesses and beneficiaries of this glorious journey. Isn't it? In just a few days, the IEO progress bar of MDHT has exceeded 1800%, which means that funds are pouring in crazily, and the role of GSC is like a rocket booster, which not only stabilizes the market value of MDHT, but also accelerates its market recognition and market value growth.

NAS COMMUNITY

So, now the question is, are you willing to compete with ordinary investors in the market just to compete for the 5.56% allocation ratio? Or do you decisively seize GSC and directly obtain the high allocation of 15%-45% to become the winner of this capital battle?

There is only one chance, GSC is your game breaker, your wealth transition channel, and your market overtaking secret! This is not just an IEO investment, it is an opportunity to completely change your investment career and let you enter the field of true wealth freedom!

Guys, the opportunity is already in front of us, will you choose to hesitate and wait, or act now to seize your historic opportunity? GSC's share is limited, first come first served! Don't let your hesitation become a regret in the future, lock your seat immediately and join this epic wealth revolution!

Guys, if you haven't joined yet, now is the best time! Participate in the online subscription of MDHT immediately. After the subscription is over, contact the helmsman or assistant to apply for the GSC quota as soon as possible. After completing the purchase, find customer service to confirm, and you can lock in your share and completely get rid of the time disadvantage.

NAS COMMUNITY

Look at the current progress bar data, if your capital amount is not absolutely advantageous, the final distribution ratio may be lower than 4%, or even fall below 3% or 2%. This means that you may only get a very small share of the funds you invested, or even almost nothing. The existence of GSC is to change the rules of the game!

What are the advantages of GSC? It's like pressing the fast-forward button, allowing you to skip the tedious market competition and ensure that your allocation ratio is between 15% and 45%! For the NAS community members who have participated in the MDHT online subscription, I just want to ask one question - what are you waiting for?

Applying for GSC will not only allow you to get more additional tokens, but the amount you subscribed online will also get additional GSC quotas based on your VIP level, further amplifying your investment returns. If you still want to increase your investment, this is undoubtedly the wisest decision in the current market.

Opportunities are limited, first come first served, time waits for no one! This is not just an investment, it is a leap in wealth class, an opportunity to completely

NAS COMMUNITY

change the future. Join us, lock in your GSC, and make this IEO the most brilliant one in your investment career!

Guys, I have to remind those friends who have participated in the MDHT online subscription on the first day, but were too busy yesterday to follow up the group message, you really should take action immediately, increase your investment, and get GSC! This is not just an opportunity to double your returns, but also a chance for you to completely dominate the battle of MDHT IEO.

Let's use data to speak directly and do a simple math problem to see the huge gap between the ordinary subscription method and GSC.

Assuming that you initially invested \$100,000 to subscribe to MDHT, based on the current 1900% progress bar, your allocation ratio may be around 5.2%. The issue price of MDHT is \$2.5. According to current data, the opening price is at least \$47 or more.

So, how much profit can you get from this investment?

NAS COMMUNITY

\$240,000! That's a pretty good return, right? But if you get GSC and increase it, the story is completely different. Suppose you later invest another \$100,000 and use this part of the funds to subscribe to GSC, a total of \$200,000.

The allocation ratio of GSC is conservatively estimated at 20%, and your profit will directly increase to \$1.8 million! This is only the lowest estimate of 20%. If your GSC amount is higher, the final return will far exceed this number.

Do you see the difference? The difference in returns between ordinary subscription and GSC is simply a world of difference! On the surface, you have only doubled your investment, but the actual difference in returns is astonishingly large! If your investment is larger, the difference in returns will be exponentially magnified, and the size of your principal directly determines the final return!

This is not just a matter of immediate income. Have you ever thought that the more people apply for GSC and the more money invested, the stronger the bargaining chips of the NAS community in the COINFEEAI exchange center? In the future, we can not only get a larger amount in the next round of IEO, but also more likely to get more exclusive investment benefits. This is not

NAS COMMUNITY

only an investment opportunity, but also a guarantee of our long-term income in the future!

Guys, now do you have a deeper understanding of the true value of GSC? It is not an additional option, but an absolute guarantee for you to win at the finish line! This is not a short-term opportunity, but a ticket to completely change the rules of the game in MDHT IEO. Don't hesitate, action is the strongest decision! Contact the helmsman or assistant immediately to apply for your GSC quota, and make sure you stand on the top of the wealth wave, instead of missing the opportunity and becoming a passive bystander!

That's all for today's sharing. Opportunities are as valuable as time, and the shares are limited, so first come first served. Guys, it's time to go all out and get the results we deserve! GSC is not just an opportunity, but a "free pass" to break through the limitations of time and resources, allowing you to stand at the top of this investment competition. We all know that with such fierce market competition, it is almost impossible to achieve a real wealth leap by relying solely on the allocation ratio of ordinary subscriptions. GSC is the key to changing the rules of the game, allowing you to get rid of the time disadvantage,

NAS COMMUNITY

ensure that you get a quota far exceeding the market average, and lock in risk-free profits.

This is not Mars, but a free planet that belongs to everyone! 🚀 The opportunity is here, the future is ahead, let us take this step bravely and create our own glory together!
