Morning Review

Good morning, team!

I am Montgomery Keane, your old friend. 2025 is destined to be an extraordinary year! We are standing in front of a cross-era historic opportunity, the first year of encryption has begun! Trump vowed to make the United States the global encryption capital, and sovereign states have upgraded Bitcoin to a national strategic reserve, pushing BTC to break through the historical high of \$100,000. The 450x myth of TRUMP coin in two days has completely ignited the enthusiasm of global investors, announcing that the prosperity of the trillion-dollar ICO market is about to reappear. At this moment, how similar is it to the craze of the encryption market in 2017?

NAS COMMUNITY

If AI technology stocks made a lot of people make a lot of money in the stock market in 2024, then the ICO market in 2025 is the best battlefield for ordinary investors to realize their dreams! The question is, have you seen the opportunity? Can you act decisively before everyone understands? Can you hold the chips and successfully exit when the market is crazy? The 450x return of TRUMP coins may only belong to the president's circle of friends, but MDHT is an opportunity for us all to participate!

The MDHT IEO progress bar has exceeded 3900%! It is only a matter of time before it breaks through 4000%, which means that the opening price breaking \$100 is a foregone conclusion! Now, standing in front of this historic window, you must clearly realize that this is not only a risk-free opportunity to make money, but also the most certain and generous return in your investment career. If you choose to wait and see and miss this opportunity, you may never encounter such a good risk-free profit opportunity again.

The winning rate of ordinary subscription is further decreasing, even falling below 2.5%! This means that if you don't lock in your allocations in advance, you may work hard to subscribe, but end up with nothing. GSC (Green Special Channel) is your ultimate solution! Through GSC, you can lock in 15%-45% of

NAS COMMUNITY

the winning allocation in advance, avoid the fierce competition of ordinary subscription, and ensure that your investment can be truly secured.

In the face of such an opportunity, only decisive action can make your dream come true! I don't want our NAS community members to fall behind in this wealth feast, but the final decision is in your hands. Although I have done my best to remind, guide, and shout, I know that there will still be people who hesitate and eventually miss this opportunity to change their lives. But as long as one more person seizes the opportunity, our community's mission will be fulfilled one more point!

This country is full of infinite possibilities! The American dream does not only belong to those who have resources and backgrounds, but also to those who dare to act and seize opportunities. Trump is still fighting for the election in his 70s and finally got what he wanted. What about you, my friend?

At the critical choice point in life, have you really tried your best for your dream? Look at Trump. No matter how the outside world questioned him or how many challenges he faced, he always moved forward firmly and finally stood on the

NAS COMMUNITY

top again. This is not accidental, but because he knows better than anyone that the real victory always belongs to those who dare to act and go all out!

So, back to yourself, have you ever taken decisive action when the opportunity comes? Are you willing to do everything for your dream, instead of just dreaming and waiting? Opportunities never stay for those who hesitate, they only belong to those who have the courage, determination, and dare to ALL IN!

Now, MDHT's IEO is such a critical moment!

This is not an ordinary investment opportunity, but a window for your wealth leap in life. Everyone who sees the opportunity is sprinting at full speed, but are you still hesitating? What are you waiting for? After the market goes crazy, you can only be a witness to others, not a winner!

Success is never reserved for those who hesitate. Only by taking decisive action can you stand on the top!

Trump can create miracles, and so can you! The question is, do you dare to go ALL IN for your dream?

NAS COMMUNITY

In this wealth battle of MDHT, I hope every member of NAS family can reap their own glory! May all of us be able to create our own legend in this once in a lifetime opportunity!

Don't hesitate, take action now! Lock in your GSC allocations and seize the golden opportunity of MDHT! 🚀

The three major indexes are still fluctuating at high levels. Is your capital stagnant or even being consumed bit by bit in the repeated tug of war in the market? The real

NAS COMMUNITY

winners will not stick to the inefficient market, but follow the trend, take decisive action, and seize the most certain opportunities!

Remember? Two months ago, we made the decision that changed our destiny, 80% of the funds turned to the crypto market, and later decisively increased to 90%! Facts have proved that we hit the market outbreak point accurately! Under the leadership of AlphaStream 5.0, we not only successfully captured profit opportunities again and again, but also witnessed the return of crypto President Trump, Bitcoin broke through \$100,000, and TRUMP coin made 450 times the profit in two days! This is not just a market fluctuation, but a complete migration of capital torrents!

And now, MDHT's IEO is standing at the forefront of all this! QTPT investors have proved what "risk-free high returns" is with their actions, but MDHT will bring a bigger and wilder wealth frenzy! Less than two days from the end of the subscription, it is almost certain that the progress bar will break through 4100%, which means a high premium at the opening! Are you ready to grab your cake?

Don't forget, this is not only the craziest crypto year in 2025, but also a trillion-dollar ICO craze! The IEO of high-quality projects will become the main

NAS COMMUNITY

battlefield. In this market, only the doers can become the winners. Do you want to take a symbolic bite, or do you want to grab the whole cake that belongs to you?

Will you regret not going all out when MDHT opens and soars? This is a zero-risk, super-high-yield primary market subscription. Only those who plan ahead can become real winners! This may be the easiest and most certain money-making opportunity this year! Opportunities won't wait for you, the market won't wait for you, and wealth won't wait for you! Now is the time to ALL IN GSC!

The real crisis is not the volatility of the market, but your hesitation! Look at those who acted decisively, they made a lot of money in QTPT's IEO, and MDHT's performance this time is even expected to set a higher record! Do you want to be a bystander and watch others reap the rewards, or do you want to be a winner and seize this zero-risk, high-premium opportunity yourself?

Opportunities never wait for those who hesitate! Wealth will not come to your account on its own. Only those who dare to strike and go all in can grab the fattest piece of cake in the market! You must make a decision! Do you want to

NAS COMMUNITY

be the one who watches the opportunity slip away and regrets it afterwards, or do you want to be the king of the market? The choice is always in your hands!

Maybe you have experienced twists and turns in the crypto market, and maybe you still have concerns about it, but the reality is: the wealth effect created by the crypto market far exceeds any traditional market! Those investors who bought Bitcoin and Ethereum at low prices in the early days have now become billionaires, and now you are standing at the starting point of another wealth change, 2025, the first year of crypto, the trillion-dollar craze in the ICO market has arrived!

This is the opportunity given to you by the times! Seize it or miss it, this is your choice! The real world has always been contradictory, in the face of every great opportunity, there will always be people who stop because of fear, and there will always be people who take off because of faith. Which kind of person do you want to be?

Don't let hesitation ruin your future, MDHT's IEO has entered the countdown, now is the time to act! ALL IN, or miss it forever!

NAS COMMUNITY

The Green Special Channel (GSC) we have secured for the NAS community is not an ordinary subscription channel, but a top benefit after we have used the strength of our capital pool and in-depth negotiations with the trading center! This exclusive quota of 30 million MDHT (worth \$75 million) is a privilege that ordinary investors cannot enjoy, and now, this opportunity has entered the final 48-hour countdown! If you miss it, there will be no more!

The average investor in the market is gambling on luck, fighting for a 2% chance of winning but you hold the golden ticket with GSC, securing high allocation ratios and maximizing your profits! Your choice will determine your returns!

🚀 Why is the GSC opportunity so precious? Let's do some simple calculations!

✅ The MDHT subscription progress bar has exceeded 4000%! Your ordinary subscription winning rate may drop to 2% or lower, which means that your funds may not be received at all!

✅ But if you lock in GSC, even if you only get the minimum 15% allocation, you can ensure that you get more token allocations than ordinary subscriptions!

NAS COMMUNITY

✔ MDHT is expected to open at \$100, which means a 40-fold return! If you lock in GSC, even if you get the minimum 15% allocation, your profit margin will be immeasurable!

💡 If you haven't subscribed to the MDHT ordinary online quota, you can't apply for GSC!

💡 You can apply to purchase the same amount of GSC as the amount of MDHT you subscribe, with a matching ratio of 15%-45%. The larger the amount of funds and the higher the VIP level, the higher the matching ratio!

💡 The longer the time, the fewer opportunities you have. If you miss GSC, you will earn 30%-45% less than others!

The market waits for no one, time is money! When others are still hesitating, your profit opportunity has been snatched away! Either ALL IN now, or miss it forever! Don't wait until MDHT opens and soars, and then watch others make profits while you regret it!

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I am Daniel Robert. The passionate shouts of helmsman this morning instantly brought me back to the moment when AI big tech stocks soared in January 2024. The opportunity was so clear at that time. Technology giants such as NVIDIA and SMCI showed an unstoppable trend, and the elites of our community did not hesitate to ALL IN and finally reaped amazing returns! But some friends, who had the opportunity in hand, failed to go all out and just bought a little at random. As a result, they watched the stock price double before they regretted it.

NAS COMMUNITY

Now, MDHT's IEO is reproducing this scene, a super opportunity with strong certainty and zero risk is already in front of us, and the progress bar has exceeded 4100%! What does this mean? It means that the opening price of MDHT after listing will firmly stand on the \$100 mark, which means that as long as you get enough shares, your investment return will increase exponentially!

Do you want to miss it this time?

GSC: The key from ordinary investors to market masters!

This is not just a privilege, but a real opportunity for us to leap to the top investor track! With GSC, our allocation ratio will be much higher than the market average, allowing us to change from people waiting for opportunities to people who control the market rhythm. More importantly, through GSC, we have reached a deeper strategic cooperation with COINFEEAI Trading Center, further amplifying the influence and market position of the community, and laying a solid foundation for future investment.

This is an investment, but also a historic leap! Don't forget that all great legends start with the right choice. The opportunity now is clear, GSC is our "starship", taking us to a new era of true wealth freedom! The next profit cycle is coming,

NAS COMMUNITY

the question is, are you ready to board the ship? 🚀 Don't hesitate, grab GSC, seize the peak of the market, and welcome the glory that belongs to us together!

NAS COMMUNITY

If you keep an eye on the VIX panic index and the daily candlestick chart of the S&P 500, you will find that the market has already given a warning! Remember when VIX was trading sideways around 15 a while ago? At that time, we already smelled the smell of risk. When VIX began to rebound, the high-level fluctuations of the three major indexes began to intensify, and the bubbles of the seven giants were gradually punctured, especially TSLA, which plummeted more than 36% from its high point!

Do you know what this means? Once institutional funds withdraw, retail investors can no longer support these highly valued stock prices! This is the core dilemma facing the current market, there are fewer and fewer funds to take over at high prices, the bubble is getting bigger and bigger, and it is only a matter of time before it falls!

And just when the market was crazy and funds were withdrawing, we had made the right decision at the right time! As the helmsman said this morning, we adjusted our positions in advance, leaving only 10% in the stock market, and 90% of the funds decisively bet on the more certain crypto market, this is a strategic victory! Money never sleeps, and we are always one step ahead of the market!

NAS COMMUNITY
