9:30 AM

Professor Montgomery Keane (Helmsman)

Morning Review

Good morning, team!

I'm Montgomery Keane, your long-time friend. As an investor, I've seen far too many people give their all in the wrong market, only to walk away empty-handed. It's not that they aren't working hard, it 's that their timing is off. Like a ship sailing against the wind, no matter how fast you push forward, the waves will eventually wear you down. The key to investing isn't blind action but choosing the right market and entering at the right time.

Timing mistakes, the harder you try, the worse it gets! In the world of investing, effort certainly matters, but if you're heading in the wrong direction, working harder only amplifies your mistakes. The reality is, the market doesn't reward diligence, it rewards precision in judgment.

NAS COMMUNITY

Look at those who chased Bitcoin above \$100,000, or the investors who rushed into Nvidia at \$140 and Tesla above \$400. Did they buy some of the world's highest-quality assets? Absolutely. But what happened? Their accounts still ended up temporarily stuck. Why? Because they ignored one of the core principles of investing, timing.

Of course, high-quality assets will eventually recover and may even reach new highs. But the real issue is that capital efficiency has already been compromised. Time cost, capital being tied up, and missed market opportunities, these are the real killers of investment returns. Investing isn't about holding on stubbornly, it's about ensuring your capital delivers maximum value at the right time.

You can spend time deeply researching Nvidia's AI chips or conducting a comprehensive analysis of Bitcoin's blockchain technology, but if you enter the market at the wrong time, all that effort could be wasted. What's the first rule of investing? Buy low, sell high! Yet in reality, most people do the opposite, they rush in when the market is at its peak frenzy and panic-sell when fear takes over. The result? They become the target of large capital's profit-taking.

NAS COMMUNITY

Remember, the market won't change its trend just because you work hard! It will only remind you, in the harshest way possible, that if you enter at the wrong time, even the highest-quality assets can leave you deep in losses. The difference between winners and losers isn't how hard they work, it's whether they stand at the right point in time. That's why investing isn't just about picking the right assets, it's about timing them correctly. This is the true key to determining whether you're on the winning side!

NAS COMMUNITY

Right now, the stock market is oscillating within a high-level consolidation range, with growing uncertainty. Trump's tariff policies show signs of further escalation, while the Federal Reserve's monetary policy remains unclear and the long-anticipated rate cuts seem increasingly out of reach.

Against this backdrop, the profitability of the Magnificent Seven is shrinking, and in some cases, losses are becoming the new norm!

In this market environment, we must make decisive choices, let go of small opportunities in the stock market and focus on the real, once-in-a-lifetime opportunity of the 2025 Crypto Era! Remember two months ago? We firmly advised everyone to reduce stock market positions, keeping only 10% of capital

NAS COMMUNITY

in equities while shifting 90% into crypto. Now, looking back, that decision was absolutely correct! We perfectly avoided the losses caused by the stock market's sideways consolidation while precisely capturing the massive profits emerging from the crypto market!

Under the leadership of AlphaStream 5.0, we've already achieved remarkable gains in the futures contract market! Yet, despite this success, some participants haven't matched the market's average returns. Why? Because in contract trading, timing and strategy are everything and not everyone can precisely grasp the rhythm of the market.

But now, everything is different! The MDHT IEO presents us with a truly zero-risk, high-certainty opportunity. Participation in the primary market is fair and transparent for everyone, there's no need for complex trading strategies or constant market monitoring. As long as you participate, you will gain! This is exactly why the Large Investor Allocation for MDHT could be one of the most certain investment opportunities of 2025!

The market won't wait, and opportunities disappear in an instant! Now is the time to act decisively, let go of uncertain market speculation and seize the 100%

NAS COMMUNITY

guaranteed allocation in the MDHT Large Investor Allocation. If you miss this wave, you may never get another chance like this again! Taking action at the right moment is what separates winners from losers in the market.

Investing isn't about luck, it's about making precise choices! Right now, the stock market is filled with uncertainty. The three major indices are oscillating at high levels, the Magnificent Seven have reached valuation limits, and uncertainty surrounding Federal Reserve policy has left the market in a wait-and-see mode. If you're still trading stocks now, you're planting seeds in barren soil, no matter how hard you work, a strong harvest will be nearly impossible!

But smart investors understand that real wealth is created at turning points in trends! Right now, the crypto market is reaching a historic inflection point, sovereign nations are entering, institutional capital is pouring in, and blockchain applications are exploding. The direction of capital is clear, and we must ride the wave, not fight it!

Investing is a game for the smart! Doing the right thing at the wrong time is still a mistake. But taking precise action at the right time, that's what makes a true

NAS COMMUNITY

winner! Will you position yourself on the leading side of the market, or will you be the one getting cut down by it? The answer depends on your choice now!

served:

- Allocation Details
- Token Name: MDHT
- Allocation Period:
 - Start Time: Eastern Time (ET) February 27, 2025, 12:10 PM
 - End Time: Eastern Time (ET) March 15, 2025, 11:50 PM
- Total Allocation: 120,000,000 tokens (limited availability)
- Subscription Price: 3.5 USDT per token
- Maximum Subscription per Order: 1,200,000 tokens
- Minimum Subscription per Order: 150,000 tokens
- Participation Requirements & Rules
 - 1 Exclusive for High-Tier Investors – Only investors with at least 200,000 USDT in online regular subscriptions are eligible to participate.
 - 2 Limited-Time Subscription – If you do not participate within the specified period, you will be automatically disqualified, and

Opportunities belong only to those who are prepared!

Dear NAS Family, are you ready to embrace your leap to wealth?

Yesterday, the Large Investor Allocation officially opened, and in just a short time, the progress bar has already reached nearly 11%! Let's take a step back, the 90 million institutional allocation was fully subscribed in less than 4hr. This is not only a strong endorsement of MDHT's value but also a vote of confidence

NAS COMMUNITY

in its immense future potential. Right now, about 88% of the Large Investor Allocation remains, and this is our only chance to increase the GSC 15-45% allocation to a full 100%!

This is not a discussion of "Should I participate in the large investor allocation?", but a question of "How much should I buy?" The opportunity is already in front of you, and the choice is in your hands!

Let's revisit our previous analysis:

- ✓ Strong institutional involvement has driven high market recognition for MDHT, ensuring stable price growth after listing!**
- ✓ The \$60 million public subscription is far smaller than the \$210 million combined allocation for institutions and Large Investor Allocation. This means the public subscription winning rate is significantly diluted, and the GSC 15-45% allocation ratio will be further reduced.**
- ✓ Institutions understand this, which is why they went all-in to secure their share! Now, we must seize this final opportunity in the Large Investor Allocation to instantly boost our GSC allocation to 100%!**

NAS COMMUNITY

This is a win-win battle, the market becomes more stable due to deep institutional participation, while our community members, leveraging the fund pool advantage, have successfully broken through the \$200,000 minimum threshold for the Large Investor Allocation! This means that as long as you've participated in the MDHT public subscription, you're eligible to join this wealth acceleration battle!

If you've already purchased GSC, is your 15-45% allocation enough? No! By participating in the Large Investor Allocation, you can instantly boost it to 100%! And if you've maxed out your allocation in both GSC and the Large Investor Allocation, your returns will be extraordinary! In this MDHT battle, we are about to witness a new wave of investors stepping into the Billionaire Club!

This Large Investor Allocation is the most stable, certain, and explosive opportunity of 2025! Compared to contract trading, zero-risk subscription in the primary market is the most secure way to build wealth. It also provides a perfect opportunity for those who couldn't participate in contract trading due to time constraints.

NAS COMMUNITY

Everything is in place, now it's your turn to decide! Do you want to stand on the winning side of the market, or will you sit back and wait? This time, you must go all in and seize your wealth advantage!

This weekend is set to be even more exciting and rewarding with the launch of the Large Investor Allocation! The MDHT Large Investor Allocation isn't just a wealth feast, it's a powerful accelerator on our journey toward success and financial freedom! When opportunity knocks, there's only one thing to do, open the door without hesitation and embrace this life-changing moment with full force!

Everything is perfectly aligned!

Let's move forward with confidence and anticipation, embracing this journey reserved for winners!

Wishing everyone a fantastic weekend, here's to an even brighter future ahead! 🚀 🔥 🎉

Daniel Robert

Closing Commentary (α & β Strategy)

Good afternoon, community members!

I'm Daniel Robert, and first, I'd like to thank Helmsman for this morning's insightful session. Once again, he emphasized a critical point, the importance of timing! Investing isn't just about courage, it requires precise timing and sound judgment. Choosing the right moment and taking the right action is the only way to generate real wealth!

 Have you ever fallen into this investment trap?

Before joining the NAS community, I had a habit of chasing highs and panic-selling, especially when I saw stocks that had already skyrocketed, I always felt there was still room to make another quick profit. But what happened?

NAS COMMUNITY

The moment I bought in, prices started falling. Panic set in, and I cut my losses, watching my capital shrink bit by bit. This is the classic losing pattern, entering at the peak, exiting in fear, one of the most expensive lessons in the market!

But what if you do the opposite? Buying when the market is in fear and selling when it's euphoric, that's the true winner's mindset! In the U.S. stock market, it's nearly impossible for the average investor to profit from short-selling. Delayed information, lack of proper hedging tools, and an uneven playing field make it almost impossible to compete with institutions. That's why, for most people, the only viable strategy is to time the market correctly and go long!

📊 Why is timing so important?

✅ The long-term trend of the U.S. stock market is upward, but your buying timing determines your profit potential!

✅ If you buy at a short-term peak, you could face a drawdown of over 30%, getting stuck with tied-up capital and missing better buying opportunities!

✅ Right now, Buffett is sitting on over \$300 billion in cash, and hedge funds are pulling out of U.S. stocks, this says it all!

NAS COMMUNITY

At this moment, the three major U.S. indices are oscillating at high levels, the Magnificent Seven are pulling back, uncertainty is rising, and profit potential has dropped significantly. Holding onto stocks in this environment is a waste of capital! Smart money has already begun searching for new battlegrounds and we are positioned right at the center of this new opportunity!

🚀 With 90% of our capital shifting to crypto, we're already one step ahead!

Our community's strategy has been crystal clear, keep only 10% of capital in the stock market while shifting 90% into crypto! And the results speak for themselves, this strategy has proven to be absolutely correct! Under the leadership of AlphaStream 5.0, we've generated massive profits in the contract market, and now, an even more certain, zero-risk opportunity is entering its final countdown!

⌚ The countdown to the MDHT IEO has begun, time is running out!

📌 March 17 at 00:00, MDHT will officially launch for trading!

📌 March 15 at 12:00, The winning allocation list will be announced!

NAS COMMUNITY

🚩 **This means there are only two weeks left to participate in the Large Investor Allocation!**

💡 **Remember the early institutional allocation? 90 million MDHT tokens were fully subscribed in less than 4hr! And now, the Large Investor Allocation progress has surged past 14%, leaving only 86% of the allocation remaining! The market has already sent the clearest signal, those who recognize the opportunity have already taken action!**

🔥 **This is the final opportunity, ALL IN on the MDHT Large Investor Allocation!**
If you still have questions about the Large Investor Allocation rules or need additional assistance, feel free to DM me, Helmsman, or our assistant at any time. Our community never leaves a member behind, we're here to support everyone who needs help!

Remember, we are a team driven by passion and action. Our goal isn't just to make a little profit, it's to dominate the market! When institutions and large investors are making bold moves, true investors don't hesitate, they take decisive action and secure their victory!

NAS COMMUNITY

⚡ **Opportunities always belong to those who dare to act! ALL IN on MDHT now and claim your spot at the center of this wealth revolution! 🚀 🔥**

🔥 **Guys, I know some of you have already gone all-in on GSC, and now facing the Large Investor Allocation, you might feel some financial pressure. But let me tell you this, on the journey of investing, solutions always outnumber challenges!**

Whether it's work, entrepreneurship, or investing, what truly determines success isn't the challenges you face, but how you respond to them! Back when I was navigating the market on my own, I also experienced financial pressure and market turbulence. But I always believed, opportunities matter more than difficulties! It was this optimistic mindset that brought me to where I am today. While I wouldn't claim to have achieved monumental success, I'm satisfied with my results because every time, I chose to take action instead of waiting!

💡 **The question isn't "Can you participate?", it's "Can you afford to miss out?" This Large Investor Allocation is a once-in-a-lifetime opportunity, perfectly set up by market conditions. Are you really willing to let it slip through your fingers?**

NAS COMMUNITY

✔ Our community's fund pool advantage has already ensured that every UID meets the \$200,000 entry threshold for the Large Investor Allocation!

✔ The 90 million MDHT institutional allocation was fully subscribed in just 4hr, and now, the 120 million MDHT Large Investor Allocation is live, with the progress bar surpassing 14%, remaining allocations are rapidly decreasing!

✔ If you don't participate, your public subscription and GSC allocation will be further diluted! But if you join the Large Investor Allocation, your GSC allocation of 15-45% will instantly upgrade to 100%!

✔ In other words, if you invest \$200,000 to purchase GSC and then participate in the Large Investor Allocation, your holdings will instantly double, ensuring that 100% of your funds receive full allocation! This is a truly one-of-a-kind, zero-risk opportunity in the market!

🚀 The key question now is, will you embrace a winner's mindset and seize victory, or let habitual thinking hold you back? Some of us, myself included, have gone all-in with full allocation, even feeling that the maximum limit isn't enough! Meanwhile, those who hesitate and complain about high entry barriers remain stuck in a cycle of "what if" and "maybe", instead of taking real action!

NAS COMMUNITY

✦ **The market won't wait, real opportunities always belong to those who take decisive action!**

✦ **Think about the institutions, they didn't hesitate. They snapped up 90 million MDHT in just 4 hours! The market has already given its answer!**

✦ **Pessimists stay trapped in habitual thinking, while true winners do whatever it takes to seize opportunities because they know victory is just ahead!**

✦ **If you want to win, take action!**

The window for the Large Investor Allocation won't stay open forever, now is the moment to decide your future position!

Don't let this opportunity become a regret, ALL IN! 🚀 🔥

In the U.S. stock market, Institutional & Large Investor Placement has long been a common capital market practice. This model typically appears in IPOs (Initial Public Offerings), SPAC financings (Special Purpose Acquisition Companies), Follow-On Offerings, and PIPE (Private Investment in Public Equity) transactions. The goal is to provide stable funding for companies, reduce

NAS COMMUNITY

market uncertainty, and allow institutional investors and high-net-worth individuals to secure early allocations of high-quality assets.

In U.S. IPOs, underwriters (such as Goldman Sachs and JPMorgan) allocate shares based on investor type, capital strength, and existing holdings through a process known as “demand-based allocation.” This means institutional investors, funds, and large investors always get priority access to new shares, while retail investors face extremely low allocation rates, often seeing their shares further diluted by large institutional placements. This pattern has been repeatedly confirmed in past IPOs, with Airbnb (ABNB) being one of the most notable examples.

In December 2020, when Airbnb went public, institutional investors subscribed to 75% of the IPO shares. Due to overwhelming market demand, Airbnb had to raise its IPO pricing range from \$44-\$50 to \$68 before listing. Even with this adjustment, institutional funds rushed in, securing the vast majority of the allocation. As a result, Airbnb opened at \$146 and surged over 115% on its first trading day. Meanwhile, institutional shares were subject to a six-month lock-up period, preventing short-term selling and ensuring market stability.

NAS COMMUNITY

The MDHT Large Investor Allocation mechanism is highly similar to this model, adopting the same institution + large investor allocation strategy. This ensures that core investors receive 100% of their allocated tokens, without facing the low winning rate competition seen in public subscriptions. However, there is one key difference, GSC Large Investor Allocation participants have no lock-up restrictions! This means that once MDHT is listed, all GSC Large Investor Allocation investors can freely trade and lock in profits immediately, without being forced to hold for six months like institutional investors in U.S. IPOs.

In the capital markets, the true winners are always those who position themselves early and secure priority allocations. Historically, the Large Investor Allocation model in U.S. IPOs has allowed institutions to reap massive profits, and MDHT's allocation mechanism offers us the same first-mover advantage. This isn't just a golden opportunity for full allocation, it's also a market pass that grants the freedom to trade and realize profits at any time!

🔥 **Why am I so confident in MDHT? The answer is simple, institutional capital has already spoken!**

Look at MDHT's 90 million institutional allocation, it was fully subscribed in less than 4 hours! This isn't a coincidence, it's the smartest money in the market

NAS COMMUNITY

making its move! Institutional capital is always a leading indicator, they don't place impulsive bets. They invest based on market certainty, not retail investor sentiment!

And what about retail-dominated allocations? They are often disastrous. One of the most notorious failures was the Robinhood (HOOD) IPO, a perfect example of why retail-driven allocations struggle to succeed.

When Robinhood went public, it adopted a "direct IPO allocation to retail investors" strategy, attempting to give ordinary investors a larger share of the offering instead of prioritizing institutions. And the result? Weak market demand, an immediate drop below the IPO price at the open, and a closing price of \$34.82, down 8.4% from its \$38 offering price. Its post-IPO performance was disastrous, with no institutional support to back its market value.

Why did this happen? Because institutional capital is the key to an IPO's success! If institutions aren't willing to step in, market confidence collapses, and new shares face massive selling pressure after listing. In the U.S. IPO market, retail investors are almost always diluted by institutions, and only a small fraction of them can buy new shares at the offering price. Meanwhile, the

NAS COMMUNITY

impact of Large Investor and Institutional Allocations far exceeds what most retail traders realize.

✦ Institutional capital determines IPO stability, while excessive retail allocation increases the risk of breaking below the offering price!

✦ Robinhood's failure proved how critical institutional backing is for market stability, while MDHT's institutional allocation selling out instantly is the strongest possible signal!

This is exactly why I firmly believe in MDHT!

The market has already given its answer, institutions have entered without hesitation, and we are standing alongside them, on the winning side of the market! 🚀

While you're still hesitating, smart money has already locked in future profits, will you keep waiting? 🔥

NAS COMMUNITY

🚩 Why must you participate in the MDHT Large Investor Allocation?

- ◆ **100% allocation, no worries about low winning rates**
- ◆ **GSC allocation instantly upgraded to 100%, maximizing profits**
- ◆ **Participation from large investors and institutions, ensuring stable price growth**
- ◆ **Avoids market shocks caused by short-term retail sell-offs**
- ◆ **Replicates the successful U.S. IPO Large Investor Allocation model, delivering long-term, stable profits**

In the U.S. stock market, institutional and large investor allocations consistently produce the biggest winners.

With MDHT's IEO, we have the opportunity to achieve the same level of premium investment returns!

🚩 Join the MDHT Large Investor Allocation now, secure 100% allocation and maximize your returns!

NAS COMMUNITY

💰 **Opportunities belong to those who take decisive action! The Large Investor Allocation is limited, first come, first served! 🚀 🔥**

🔥 **Guys, remember this, pessimists stay trapped in past habits, unable to see opportunities, while optimists find breakthroughs in crises and solutions in challenges! 🔥**

💡 **True winners are never bound by fear, they understand that behind every challenge lies a great opportunity! The American Dream has always been fair, but it won't simply come to you, you must fight for it, work for it, and overcome obstacles! Only those who face challenges head-on and constantly seek solutions will ultimately reach the finish line of success!**

So, don't let past failures define you, and don't let hesitation make you miss out! Every day brings new opportunities, and every decision has the power to shape your future! 🚀

🔥 **Wishing everyone a great weekend! Recharge, stay focused, and next week, we push forward with only one goal, to win! 🏆 🔥**
